**To the extent quantifiable*

Note: The amounts may increase on account of additional interest / other charges being levied by the concerned authorities which are unascertainable as on the date of this Draft Prospectus.

For further details, please refer the chapter titled “*Outstanding Litigations and Material Developments*” beginning on Page No. 168 of this Draft Prospectus. We cannot assure you that these legal proceedings will be decided in favour of our Company, Directors and Promoters, as the case may be, or that no further liability will arise out of these proceedings. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and quantifiable, on the basis of documents available, and include amounts claimed jointly and severally. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may have an adverse effect on our results of operations and financial condition.

- We are required to obtain, renew or maintain certain statutory and regulatory permits and approvals to operate our business, and if we fail to do so in a timely manner or at all, then our business, financial conditions, results of operations, and cash flows may be adversely affected.***

We are subject to laws and government regulations, including in relation to safety, health, environmental protection and labour wherein we are required to obtain and maintain various regulatory approvals and registrations for our operations. Certain of these approvals, are granted for a limited duration, and are required to be renewed or extended from time to time upon expiry.

There can be no assurance that these relevant authorities will issue such permits or approvals, or renewals thereof, in the time frame anticipated by us. While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, we are yet to receive or apply for certain approvals, licenses, registrations, permits or renewals. For example, (i) Registration certificate under Maharashtra Shops and Establishment (Regulation of Employment and Conditions of Service) Act, 2019; (ii) Registration under the Contract Labour (Regulation and Abolition) Act, 1970; (iii) NOC for Ground Water Extraction for Factory unit; (iv) Boiler Use Certificate in the name of the Company for unit situated at Valsad, Umbergaon under Boilers Act, 1923; (v) Enrolment Certificate and Registration certificate under Maharashtra State Tax on Professions, Trades, Callings and Employments Acts, 1975 and (vi) Registration certificate under Gujarat Panchayats, Municipalities, Municipal Corporations and State Tax on Professions, Traders, Callings and Employments Act, 1976. For further details, please refer the chapter titled “*Government and Other Approvals*” beginning on Page No. 173 of this Draft Prospectus. Carrying out business activities without obtaining necessary statutory and regulatory permits and approvals may lead to suspension or permanent closure of such business activities and may also attract costs, penal actions and other legal actions against our Company or its officers, which may adversely affect our business, financial conditions, results of operations, and cash flows.

- Our business is dependent on the adequate and uninterrupted supply of electrical power and water at a reasonable cost. Our Company does not have suitable power back-up to meet power failure exigencies. Failure on account of unavailability of electrical power and water may restrict us in utilizing our full capacity and, hence, may impact our business and results of operation.***

Adequate and cost-effective supply of electrical power and water is critical to our operations, which entails significant consumption of electrical power and water. Our manufacturing process requires uninterrupted supply of electrical power and water in order to ensure that we are able to manufacture our products. The shortage or non-availability of electrical power and water may adversely affect our manufacturing process and have an adverse impact on our results of operations and financial condition. Currently, we source our power requirements from the state electricity board. There can be no assurance that electricity supplied will be sufficient to meet our requirements or that we will be able to procure adequate and uninterrupted power

supply in the future at a reasonable cost. If the supply of electricity is not available for any reason, we will need to rely on alternative sources. However, our Company does not have suitable power back-up to meet power failure exigencies such as diesel generator sets. Any failure on our part to obtain alternate sources of electricity, in a timely manner, and at an acceptable cost, may have an adverse effect on our business, results of operations, cash flows and financial condition.

Further, if the per unit cost of electricity is increased by the state electricity board, our power cost will increase and it may not be possible to pass on any increase in our power cost to our customers, which may adversely affect our profit margins. Additionally, we require water for process in manufacturing of our products and for human consumption. Any disruption / non availability of power and water or any failure on our part to arrange alternate sources of electricity and water supply, in a timely manner and at an acceptable cost shall directly affect our production which in turn shall have an impact on operations and results of our Company.

4. *Our manufacturing facilities are located on leased and licensed premises and consequently, we are required to comply with certain requirements given under lease and license agreements. The license agreements for our manufacturing facilities may be inadequately stamped.*

Our manufacturing facilities are situated on premises that we have taken on lease. Although, we have entered long term lease for our manufacturing facilities, however, the lease is subject to certain compliances failing which the lessor shall have a right to terminate the lease of manufacturing facilities.

We cannot assure you that aforesaid lease and license in future will not be terminated by the lessors/ licensors and will be renewed by our Company on expiry of license, as the case may be. On termination, we may also be required to vacate the premises at short notice period prescribed in the lease and license agreements, and we may not be able to obtain alternate location, in a short span of time. Further, we may be required to re-negotiate terms and conditions of such premises during their tenure. Any adverse impact on the ownership rights of our landlords may impede our effective future operations. Occurrence of any of the above events may have a material adverse effect on our business, results of operations and financial condition.

Further, the above-mentioned license agreements executed by our Company may not be stamped adequately. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. Any potential dispute vis-à-vis the said premises and our non-compliance of local laws relating to stamp duty may adversely impact the continuance of our activity from such premises.

5. *There have been certain inadvertent inaccuracies, delays and non-compliances with respect to certain regulatory filings and corporate actions taken by our Company. Consequently, we may be subject to regulatory actions and penalties for any past or future non-compliance and our business and financial condition may be adversely affected.*

In the past, there have been certain instances of delay in filing of statutory forms as per the reporting requirements under the Companies Act with RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company. Further, there have been instances of erroneous filings of statutory forms with RoC as per the reporting requirements laid down under the Companies Act by our Company. For instance: (i) incorrect filing of Form 2 for for Allotment; (ii) incorrect filing of Form MGT-7 for Annual Return, (iii) incorrect filing of Form ADT-1 for appointment of statutory auditor of the Company and (iv) delay in filing of various Forms with Registrar of Companies.

No show cause notice in respect to the above has been received by our Company till date, no penalty or fine has been imposed by any regulatory authority in respect to the same. We cannot assure you that such inaccuracies, delays and non-compliances will not happen in the future and that our Company will not be subject to any action, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in, or non-availability of, or delays in filing of, any of its secretarial records and filings, which may adversely affect our operations and financial position.

6. *Certain records and regulatory filings of our Company are not traceable.*

Our Company does not have access to certain filings pertaining to certain historical secretarial information in relation to certain disclosures in this Draft Prospectus. These include, requisite filings required to be made

with the RoC such as *inter alia* (i) Form 1, Form 1A, Form 1B filed at the time of incorporation and change of name; (ii) Form 2 for allotments; (iii) Form 32 for appointment and regularization of directors; (iv) Form 23ACA; (v) Form 20B; (vi) Form 23B for appointment of auditor and (vii) Form 5 for increase in share capital.

While we believe that the forms were duly filed on a timely basis, we have not been able to obtain copies of these documents from the Registrar of Companies, or otherwise, which has been certified by M/s H. Maheshwari & Associates, Company Secretaries in Practice vide their search report dated March 03, 2022. We cannot assure you that these form filings will be available in the future or that we will not be subject to any penalties imposed by the relevant regulatory authority in this respect.

7. *We derive a significant portion of our revenue from sales to our top 10 customers. Any failure to maintain relationships with such customers could adversely affect our revenue and financial condition.*

Our top 10 customers account for a substantial portion of our sales, and consequently our revenue, and we expect that such key customers will continue to represent a substantial portion of our revenue from sale of products in the foreseeable future. Our total sales to our top 10 customers are 67.78% for the period ended September 30, 2021 and 57.22% for Fiscal 2021. Our customers often undertake vendor rationalisation to reduce costs related to procurement from multiple vendors. Since we are largely dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers or a significant reduction in demand from such customers could have a material adverse effect on our business, financial condition, results of operations and future prospects. We have not entered into formal arrangements or contracts with our customers to purchase the products from us. We work on purchase order basis with our customers based on their demand. Since we have no formal arrangements with our customers, they are not contractually obligated to purchase minimum quantity of products from us and may choose to purchase the products from our competitors. We cannot assure you that we will be able to continue to retain these customers on terms that are commercially acceptable to us, or at all.

8. *Applicability of higher tax rate on our Company could provide a competitive advantage to our new competitors.*

From assessment year beginning on or after April 1, 2020, the Government of India, in order to incentivise manufacturing businesses in India has provided an option to the domestic companies to opt for a reduced income-tax rate of 15% in case they fulfil the conditions specified in Section 115BAB of the Income Tax Act, 1961. The main condition being the company must be incorporated on or after October 1, 2019 and that company is engaged in no other business other than business of manufacturing or production of any article or thing.

We have opted for the tax rate of 22% specified under Section 115BAA of the Income Tax Act, 1961. The abovementioned new Section 115BAB of the Income Tax Act, 1961 having 15% tax rate is not applicable on us as we do not fulfil the condition of a newly set up manufacturing unit. This difference in tax rates specified in Section 115BAA and Section 115BAB could in future, provide a tax advantage to our competitors who set up their businesses on or after October 1, 2019 and opt for reduced income-tax rate of 15%. Thus, this could adversely affect the competitiveness of the Company.

9. *Our Promoters and Directors are also interested as a shareholder or director or partner in Promoter Group entities that are engaged in the business similar to our Company. In addition, Promoter Group entities are engaged in the business similar to our Company. This may lead to conflict of interest of our Promoter Group entities with our Company.*

The predominant business activity of our Company is manufacturing of grey fabrics and readymade cloths. Our

Promoters and Directors are interested as a shareholder or director or partner in Promoter Group entities. The object clause or constitutional documents of our Promoter Group entities, permits them to undertake similar business to that of business of our Company. Accordingly, certain Promoter Group entities of the Company are engaged in the similar line of business which is or may be in conflict of interest with the business of our Company. This may lead to loss of profit/revenue of our Company and could adversely impact our business and results of operations.

10. *Our Promoters, Directors and KMPs may have interest in our Company, other than reimbursement of expenses incurred or remuneration.*

Our Promoters, Directors and KMPs may be deemed to be interested to the extent of the Equity Shares held by them or their relatives or in our Company. For further details, please refer to the chapters titled “*Our Management*” and “*Our Promoters and Promoter Group*”, beginning on Page No. 133 and 145, respectively of this Draft Prospectus.

11. *Our success largely depends upon the knowledge and experience of our Key Managerial Personnel, namely Mr. Krishankant Gupta, Mr. Vijaykumar Gupta and Mr. Hemant Kumar Gupta. Loss of any of such Key Managerial Personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience and continued services and the management skills of our Key Managerial Personnel (namely, Mr. Krishankant Gupta, Mr. Vijaykumar Gupta and Mr. Hemant Kumar Gupta) and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Any attrition of such experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. If we are unable to motivate and retain such Key Managerial Personnel and thereby lose the services of such highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled “*Our Management*” beginning on Page No. 133 of this Draft Prospectus.

12. *We have incurred indebtedness, and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition. Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements with certain banks for short-term and long-term borrowings. As on September 30, 2021, we had total outstanding borrowings of ₹ 7,888.93 Lakhs, certain of which contain restrictive covenants, including requirements that we obtain consent from the lenders prior to undertaking certain matters including altering our capital structure, change in shareholding, not approaching the capital markets for mobilizing additional resources either in the form of debt or equity, changing the management, dilution of Promoters’ shareholding and undertaking any new project, implementing any scheme of expansion/diversification or capital expenditure or acquiring fixed assets (except normal replacements) if such investment results into breach of financial covenants or diversion of working capital funds to financing of long-term assets.

Further, in terms of security, we have created a mortgage over our immovable properties and hypothecation of our movable properties. Additionally, we are required to, among others, to maintain the prescribed debt service coverage ratio, total debt and debt to equity ratio. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. Any fluctuations in the interest rates may directly impact the interest costs of such loans. Our ability to make payments on and refinance our indebtedness will depend on our continued ability to generate cash from our future operations. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest. For details of these covenants, please refer to the chapter titled “*Financial Indebtedness*” beginning on Page No. 153 of this Draft Prospectus.

A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Any failure to comply with the conditions and covenants in our financing agreements that is not waived by our lenders or guarantors or otherwise could lead to a termination of our credit facilities, foreclosure on our assets, acceleration of all amounts due under such manufacturing facilities or trigger

cross-default provisions under certain of our other financing agreements, any of which could adversely affect our financial condition and our ability to conduct and implement our business plans.

13. *We expect the COVID-19 pandemic may have material adverse effects on our results of operations, financial condition, and/or our cash flows.*

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the textile industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the recent wave of the virus, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

During the first wave in India in first quarter of FY 2020-21, our manufacturing facilities were severely affected by government restrictions. During the second wave, the lockdown did not halt operations within our factories after Central Government lifted partial restrictions. However, in case due to recent third or consequent wave of COVID-19, if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

The extent to which the COVID-19 pandemic impacts our business, results of operations and financial condition will depend on future developments, which are highly uncertain and are difficult to predict, including, but not limited to, the duration and severity of the pandemic, the nature and scope of government actions to contain the pandemic or address its impact, and how quickly and to what extent normal economic and operating conditions can resume, other geographies affected and the impact of the pandemic on economic activity in India and globally. In addition, we cannot predict the impact that the COVID-19 pandemic will have on our customers, and each of their financial conditions; however, any material effect on these parties could adversely impact us. Given the rapidly changing implications of the spread of COVID-19, it is difficult to assess its impact on our business and results of operations at this time and we may not be able to quantify or accurately predict the same.

14. *Our Promoters and Promoter Group will continue to retain majority shareholding in our Company after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.*

As on date of this Draft Prospectus, our Promoters and Promoter Group hold approximately 54.31% of the share capital of our Company. Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters and promoter Group as our controlling shareholder could conflict with our interests or the interests of its other shareholders. We cannot assure you that the Promoters will act to resolve any conflicts of interest in our favour.

15. *Industry information of the Company included in this Draft Prospectus has been derived from different industrial association and other governmental sources and reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate. We have referred different industrial association and other governmental sources and reports for purposes of inclusion of such information in this Draft Prospectus. This data is subject to various limitations and based upon certain assumptions that are subjective in nature. None of our Company, the Lead Manager or any other person connected with the Issue has independently verified such information. Although we believe that the data may be considered to be reliable, the accuracy, completeness and underlying

assumptions are not guaranteed and dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or the Lead Manager or any of our or its respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Further, there is no assurance that such information is stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. In addition, statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

- 16. *We are subject to risks resulting from foreign exchange rate fluctuations, which could adversely affect our results of operations. Further, a decline in India's foreign exchange reserves and higher interest rates in the Indian economy could also adversely affect us.***

We derive a significant portion of our revenue from export outside India that are denominated in foreign currency. Changes in currency exchange rate therefore influence our results of operations. The exchange rate between the Indian Rupee and foreign currencies, primarily the U.S. dollar, has fluctuated in the past and our results of operations may be impacted by such fluctuations. A decline in India's foreign exchange reserves could impact the valuation of the Indian Rupee and could result in reduced liquidity and higher interest rates which could adversely affect our financial condition. A future material decline in these reserves could result in reduced liquidity and higher interest rates in the Indian economy which in turn, could adversely affect our business and future financial performance.

- 17. *We are dependent on third-party transportation providers for the supply of raw materials and delivery of our finished products.***

Our success depends on the supply and transport of the various raw materials required for our manufacturing facilities and of our finished products from our manufacturing facilities to our customers and distributors, which are subject to various uncertainties and risks. We use third-party for the delivery of our products and transportation restrictions, if any, could have an adverse effect on supplies and deliveries to and from our customers and suppliers. In addition, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be a delay in delivery of raw materials and products which may also affect our business and results of operations negatively. In the event we fail to maintain a sufficient volume of raw materials and delivery of such materials to us is delayed, we may be unable to meet our purchase orders in a timely manner or at all, which may result in loss of sales opportunities that our competitors may capitalize on, thereby adversely affecting our business, financial condition, results of operations, and cash flows. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers and distributors. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

- 18. *Our business requires significant amount of working capital. If we experience insufficient cash flows from our operations or are unable to borrow funds to meet our working capital requirements, it may materially and adversely affect our business and results of operations.***

Our business requires significant amount of working capital for carrying-out its activities. Consequently, there could be situations where the total funds available may not be sufficient to fulfil our commitments, and hence we may need to incur additional indebtedness in the future, or utilize internal accruals to satisfy our working capital needs. Our future success depends on our ability to continue to secure and successfully manage sufficient amounts of working capital. Further, our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. As we pursue our growth plan, we expect that we will have to raise additional funds by incurring further indebtedness or issuing additional equity to meet our capital expenditures in the future. If we experience insufficient cash flows or are unable to borrow funds on a timely basis, or, at all, to meet our working capital and other requirements, or to pay our debts, it could materially and adversely affect our business and results of operations. If we are unable to manage our

working capital requirements, our business, results of operations and financial condition could be materially and adversely affected. For further information on the working capital facilities currently availed of by us, please refer to the chapter titled “*Financial Indebtedness*” beginning on Page No. 153 of this Draft Prospectus.

- 19. *The objects of the Issue include funding working capital requirements of our Company, which are based on certain assumptions and estimates and such working capital requirements may not be indicative of the actual requirements of our Company.***

The objects of the Issue include funding working capital requirements of our Company, which are based on management estimates and certain assumptions in relation to inter alia cost and holding periods of inventories of raw materials and finished goods as well as capacity utilisation. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on Page No. 70 of this Draft Prospectus. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions and availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

- 20. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval, which may restrict our ability to respond to any change in our business or financial condition and thereby, may adversely affect our business and results of operations.***

Our Company intends to use Net Proceeds raised pursuant to the Issue in the manner set out in the chapter titled “*Objects of the Issue*” beginning on Page No. 70 of this Draft Prospectus. In accordance with Section 27 of the Companies Act, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of Shareholders of our Company through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the approval of the Shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the Shareholders of our Company may adversely affect our business or operations. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

- 21. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.***

We have not declared any dividend during the current Fiscal and in the last three Fiscals. For further information, please refer to the chapter titled “*Dividend Policy*” beginning on Page No. 151 of this Draft Prospectus. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. The declaration and payment of dividends will be recommended by the Board and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders’ investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

- 22. *We may be unable to attract and retain employees with the requisite skills, expertise and experience, which would adversely affect our operations, business growth and financial results.***

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. Our employees may terminate their employment with us prematurely and we may not be able to retain them. Experienced and skilled workers in the textile industry are highly sought after, and competition for talent is intense. If we experience any failure to attract and retain competent personnel or any material increase in

labour costs as a result of the shortage of skilled labour, our competitiveness and business would be damaged, thereby adversely affecting our financial condition and operating results. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

23. *We have not entered into any technical support service for the maintenance and smooth functioning of our equipment's and machineries, which may affect our performance.*

Our manufacturing processes involve use of technical equipment and machineries. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Our company has not entered into any technical support service agreements with any competent third party. Our failure to reduce the downtime in case such events occur may adversely affect our productivity, business and results of operations.

24. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amount outstanding and payable by us as secured loans were ₹ 7,031.80 Lakh as on September 30, 2021. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, security interest on our properties may be invoked by lenders, which in turn could have significant adverse impact on business, financial condition or results of operations. For further information, please refer to the chapter titled “*Financial Indebtedness*” beginning on Page No. 153 of this Draft Prospectus.

Though the above orders have no effect and relevance as on date of this Draft Prospectus, however, we cannot guarantee that such non-compliances and violations will not take place and the same if occurred, may affect our goodwill and future prospects.

25. *We have entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into transactions with our Promoters, Directors and Promoter Group. While we believe that most of such transactions have been conducted at arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Such related party transactions may potentially involve conflicts of interest. Furthermore, it is likely that we enter into related party transactions in the future as well.

There can be no assurance that any transaction, individually or in aggregate, will always be in the best interests of our Shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details on the transactions entered by us, please refer to the chapter titled “*Restated Financial Information*” beginning on Page No. 152 of this Draft Prospectus.

26. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, loss-in-transit for our products, accidents and natural disasters. The policies insure us against loss or damage caused by burglary, fire, earthquake etc. and insure inter alia our godown, plant and machinery, accessories, furniture, fixture and fittings, goods, etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

27. *Our individual Promoters and certain other persons have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our individual Promoters and certain other persons have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

28. *We do not have any long-term agreement or contract of supply of raw materials and consequently are exposed to price and supply fluctuations for our raw materials.*

Our Company is engaged in the business of manufacturing of grey fabric and readymade cloths, and yarn is used as the primary raw material during our manufacturing process. Therefore, we are highly dependent on yarn, and it forms the most important and primary component of our manufacturing process.

We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacturing of our products, could have a material adverse effect on our business. Further, any discontinuation or a failure of these suppliers to adhere to the delivery schedule or failure to deliver the required quality and quantity could hamper our manufacturing schedule.

Further, we are also exposed to fluctuations in the prices of yarn. Thus, we may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our products becoming unaffordable if pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our margins. Upward fluctuation of price of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial conditions and results of operations.

29. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of purchase orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers, including overseas customers. However, we have not entered into any long-term contracts with these customers and we cater to them on purchase order basis. We are bound to comply with different terms and conditions stipulated in the purchase orders failing to which led to termination or cancellation of the purchase orders by our customers. Our customers may also terminate their relationships with us without any notice which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, timely delivery of our products, etc., in the absence of contracts, any sudden change in the buying pattern of customers could adversely affect the business and the profitability of our Company.

30. *Our manufacturing units and other operations are geographically located in Valsad. Any unscheduled or prolonged disruption of our manufacturing operations could materially and adversely affect our business, financial condition, results of operations and cash flows.*

Our manufacturing units are based in Valsad, Gujarat and we rely on said manufacturing facilities for manufacturing, product assembly and storage. We manufacture, assemble and store all our products at our

manufacturing facilities located in Valsad, Gujarat. Any unscheduled or prolonged disruption of our manufacturing operations, including power failure, fire and unexpected mechanical failure of equipment, obsolescence, labour disputes, strikes, lock-outs, earthquakes and other natural disasters, industrial accidents or any significant social, political or economic disturbances, could reduce our ability to manufacture our products and adversely affect sales and revenues from operations in such period. The occurrence of any such incidents could also result in a destruction of certain assets, and adversely affect our results of operations. Any such disruption may interrupt our operations, which may interfere with manufacturing process, requiring us to either stop our operations or repeat activities that may involve additional time and increase our costs. Our customers and distributors rely on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. We may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facilities to cease, or limit, production until the disputes concerning such approvals are resolved. As regulatory approvals are site specific, we may be unable to transfer manufacturing activities to another location immediately. Catastrophic events may also destroy any inventory located in our facilities. The occurrence of such an event could materially and adversely affect our business.

- 31. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.***

Our Company has employed 665 employees all of whom are on our payrolls. The above includes employees in the top and middle management and also employees who are part of processing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected. In order to retain flexibility and control costs, we also appoint independent contractors who in turn engage on-site contract labour for performing certain of our ancillary operations. Any failure to hire the appropriate contract labour may impact the operations, production and revenue.

- 32. *We appoint contract labour for carrying out certain of our ancillary operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations, cash flows and financial condition.***

In order to retain flexibility and control costs, we appoint independent contractors who in turn engage on-site contract labour for performing certain of our ancillary operations. The numbers of contract labourers vary from time to time based on the nature and extent of work contracted to independent contractors. Although we do not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. All contract labourers engaged at our manufacturing facilities are assured minimum wages that are fixed by the state government from time to time. Any upward revision of wages that may be required by the state government to be paid to such contract labourers, or offer of permanent employment or the unavailability of the required number of contract labourers, may adversely affect the business and future results of our operations. Further, in the event of any non-compliance by contractors with statutory requirements, legal proceedings may be initiated against us. While the Contract Labour (Regulation and Abolition) Act, 1970 does not require us to retain contract labourers as our employees, the Indian courts on a case-by-case basis have directed employers in the past to absorb contract labourers as employees. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

- 33. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the objects of the Issue in the manner stated in the chapter titled “Objects of the Issue” beginning on Page No. 70 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our working capital limits resulting in unprecedented financial mismatch and this may affect our revenues and results of operations. Further, our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability.

34. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on Equity Share price of our Company.

35. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology upgradation are essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of newly found technology in the textile processing business, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorized access to our networks. Further, the commercial success of our business is highly dependent on the developmental and innovative break throughs of our design division. In the event, any breach of our systems or software leads to the leaking of our designs or any inventive design techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors. Additionally, the government authorities may require adherence with certain technologies, and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

36. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The state of Gujarat is a national hub for the textile industry and this has resulted in huge competitive pressures. We may have to confront pressures in respect of pricing, product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Our products compete with local retailers, non-branded products, economy brands and products of other established brands. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. We are also in direct competition with the leading textile processing units in India as well as the local units. Our competitiveness is also measured by the technology we adopt as the textile industry is rapidly growing in India and in international markets. Some of our clients are based outside India which in turn compel us to meet international standards also. Our inability to compete with this intense competition; local, national and international will have material adverse impact on our Company's financial position. For further details, please refer to the chapter titled "*Industry Overview*" beginning on Page No. 81 of this Draft Prospectus.

38. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition.*

We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations. Our products might have certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence, human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the quality standards by our customers and agencies as deviation from the same may cause them to reject our products and cause damage to our reputation, market standing and brand value. In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and image, as well as entail significant costs.

39. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.*

Our Company is involved in various business transactions with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

40. *Our Company does not have enough documentary evidence for the Capital Built-up of our Company.*

Our Company is unable to trace all documents evidencing their capital built-up. Due to lack of documents and relevant information, we have relied on Allotment Register and Counter Folio of Share Certificate Book available. The same is confirmed by M/s H. Maheshwari & Associates, Company Secretaries in Practice vide their search report dated March 03, 2022 in this regard. For further details, please refer to the chapter titled "*Capital Structure*" beginning on Page No. 56 of this Draft Prospectus.

41. *Our Promoters do not have any documentary evidence for their Capital Built-up.*

Except Share Certificates with Transfer details, Mr. Krishankant Gupta, Mr. Vijaykumar Gupta and Mr. Madanlal Gupta are unable to trace any documentary evidence for transfers. Due to lack of enough documents and relevant information from promoters, we have relied on Transfer Register of the Company.

For further details, please refer to the chapter titled “*Capital Structure*” beginning on Page No. 56 of this Draft Prospectus.

42. *We are unable to identify exact Cost of Acquisition by our Promoters.*

Except Share Certificates with Transfer details, Mr. Krishankant Gupta, Mr. Vijaykumar Gupta and Mr. Madanlal Gupta are unable to trace any documentary evidence for transfers. Due to lack of documents and relevant information from promoters, we have obtained necessary affidavits from promoters in this regard. Based on these affidavits, we have disclosed details of their cost of acquisition in the chapter titled “*Summary of Offer Document*” as is required under the SEBI ICDR Regulations. For further details, please refer to the chapter titled “*Offer Document Summary*” beginning on Page No. 19 of this Draft Prospectus.

43. *Our Company does not have any documentary evidence for the educational qualifications of three of our directors.*

Mr. Krishankant Gupta (Chairman and Managing Director), Mr. Vijaykumar Gupta (Whole Time Director) and Mr. Madanlal Gupta (Non-Executive Director) are unable to trace documents evidencing their educational qualifications. Due to lack of documents and relevant information from these directors, we have obtained necessary affidavits from directors in this regard. Based on these affidavits, we have disclosed details of their educational qualifications in biography in the chapter titled “*Our Management*” as is required under the SEBI ICDR Regulations. For further details, please refer to the chapter titled “*Our Management*” beginning on Page No. 133 of this Draft Prospectus.

44. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.*

We may expose to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business practice, we supply our products directly to certain customers without taking any advance payment against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it may have a material adverse effect on our Company’s results of operations and financial condition. For the Fiscals 2021, 2020 and 2019 our trade receivables were ₹ 3,310.32 Lakh, ₹ 3,829.96 Lakh and ₹ 4,299.35 Lakh respectively and for the period ended on September 30, 2021 is ₹ 3,445.36 Lakh. There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

45. *We do not have any offshore offices to manage our international operations.*

A significant portion of our revenue is derived from our export operations however, we have not set up any offshore offices to supplement our international operations. Consequently, we may not be able to properly market our products, capitalised opportunities offered by the international markets or co-ordinate with the intermediaries of such markets to effectively forecast market demands, fashion trends in a timely manner. We cannot assure you that in the near future we will be able to set up our offices overseas to manage our international operations and that the lack of same will not adversely affect our business.

46. *Our operations can be adversely affected in case of industrial accidents at our manufacturing unit.*

Any fire or mishap or accidents of such nature at the Company’s facilities could lead to accident claims and damage and loss of property, inventory, raw materials, etc. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability. Our manufacturing process requires the use of machines, which makes the labour employed at our manufacturing unit prone to accidents that occur during the course of our operations resulting in personal injuries causing permanent disability or even death.

Further, the key raw material used by us for manufacturing our products is yarn. Based on its kind, yarn is an inflammable commodity, every stage from procurement, processing, storage and transportation to trading is fraught with an imminent danger of an instant fire. Due to its combustible nature of yarn and the semi-finished or finished products manufactured by us, we may be exposed to fires or other industrial accidents and every stage from procurement, processing, storage and transportation to trading is fraught with an imminent risk of loss by fire. With the use of chemicals, boilers, etc. the risk of fire hazard increases exponentially. The stocks of finished goods, raw materials, godowns and the main manufacturing area are more prone to such accidents, which could cause substantial loss to our machinery, thus hampering our business operations. Further, any fire or industrial accident, any shutdown of our manufacturing units or any environmental damages will increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. We have adopted adequate safety measures; however, we cannot assure you that, in the future no such cases will be instituted against our Company, alleging that we were negligent or we did not provide adequate supervision therefore, holding us liable for injuries that were suffered during the manufacture of our products. In the event any such accidents take place in the manufacturing unit of our Company, we may get involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it may adversely affect our results of operations and financial position.

EXTERNAL RISK FACTORS

47. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in India as well as other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

In addition to the above, our Company is incorporated in India and its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 pandemic;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend our operations;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;

- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any slowdown or perceived slowdown due to these factors could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

48. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the capital markets may depend significantly on the credit ratings of India. India's sovereign rating was revised in October 2021 from Baa3 with a "negative" outlook to Baa3 with a "stable" outlook by Moody's, and from BBB- with a "stable" outlook to BBB- with a "negative" outlook by Fitch in June 2020; and from BBB with a "negative" outlook to BBB (low) with a "stable" outlook by DBRS in May 2021. India's sovereign ratings from S&P is BBB- with a "stable" outlook. Any further adverse revisions to India's credit ratings by international rating agencies may adversely affect our ratings or terms on which we are able to raise additional finances or refinance any existing indebtedness. This may have an adverse impact on our business and financial performance, shareholders equity and the price of Equity shares.

49. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

50. *Changes or uncertainty in international trade policies or tariffs could disrupt our export sales outside India or negatively impact our financial results.*

Our export sales outside India expose us to number of risks related to trade protection laws, tariffs, excise or other border taxes on products exported to certain countries. Changes or uncertainty in international trade policies or tariffs could impact our global operations, as well as our customers. We may be required to incur additional costs to manufacture and distribute certain of our products. This could adversely impact our business and results of operations.

51. *If inflation rises in India, increased costs may result in a decline in profits. Inflation rates in India have been volatile in recent years, and such volatility may continue.*

India has experienced high inflation in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs.

Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our clients. Additionally, if we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future

52. *A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our Shareholders, such a takeover may not be attempted or consummated because of SEBI (SAST) Regulations, 2011.

RISKS RELATING TO EQUITY SHARES

53. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

54. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the issue price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price as may be decided by the Company in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters, please refer chapter titled "*Offer Document Summary*" beginning on Page No. 19 of this Draft Prospectus.

55. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM through the Fixed Price process. This price will be based on numerous factors, as described under the chapter "*Basis for Issue Price*" beginning on Page No. 75 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to resell their Equity Shares at or above the Issue Price.

56. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the stock exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

57. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by the Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters or members of the Promoter Group may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed by the GoI in the Consolidated FDI Policy dated October 15, 2020. These investment restrictions shall also

apply to subscribers of offshore derivative instruments. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, please refer to the chapter titled “*Restrictions on Foreign Ownership of Indian Securities*” beginning on Page No. 244 of this Draft Prospectus.

58. *Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

59. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management’s attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely manner.

60. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India.

61. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the listing and commencement of trading of Equity Shares. Investors’ book entry, or ‘demat’ accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Issue is approved by the Stock Exchanges. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant’s demat account with depository participant could take time from the Bid/ Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval

or otherwise any delay in commencing trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

62. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, please refer to the chapter titled "*Terms of the Issue*" beginning on Page No. 185 of this Draft Prospectus. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

63. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Global Economic Overview

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

The following graph shows the rise in inflation across the globe due to varying factors.

Emerging Markets Lead the Rebound

Emerging markets, excluding China, have faced numerous cyclical challenges in recent years. Now, with more favourable COVID-19 dynamics in many developing nations, emerging markets could set the pace for global growth. Morgan Stanley economists expect this momentum to continue into next year. At the same time, emerging markets should benefit from widening U.S. current account deficits, low U.S. real interest rates, a weaker dollar, and accommodative macroeconomic policies.

GDP and Inflation rate in India

(Source: <https://www.imf.org/en/Countries/IND>)

India's economy is poised for a rebound after enduring a second wave of COVID-19 infections this year that further constrained activity and took a heavy toll on its people.

India's broad range of fiscal, monetary and health responses to the crisis supported its recovery and, along with economic reforms, are helping to mitigate a longer-lasting adverse impact of the crisis.

(Source: <https://www.imf.org/en/News/Articles/2021/11/02/na111121-indias-economy-to-rebound-as-pandemic-prompts-reforms>)

Following the deadly ‘second wave,’ growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labor reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India’s labor force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labor market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound.

(Source: <https://www.worldbank.org/en/country/india/overview#1>)

Real GDP of India increased by 8.4% YoY in Q2 of FY 22, recovering more than 100% of pre-pandemic output in the equivalent quarter of FY 20. India is one of the few countries to have grown for four consecutive quarters in Covid-19 (Q3, Q4 of FY21 and Q1, Q2 of FY22), demonstrating the economy's resiliency.

The recovery was fuelled by a resurgence in the services sector, a complete recovery in manufacturing, and continued expansion in the agriculture sector. In addition to successful pandemic management and signalling impact of promised measures, recovery was aided by a quick increase in vaccine coverage from 32% of the adult population at the end of Q1 to 75% at the end of Q2 of FY 22. According to the latest GDP estimates issued by the NSO, the Indian economy increased by 8.4% YoY in Q2 of FY 22, after growing by 20.1% YoY the previous quarter.

Global Textile Market

The textile industry works on three major principles, namely designing, production, and distribution of different flexible materials such as yarn and clothing. A wide array of processes such as knitting, crocheting, weaving, and others are largely used to manufacture a wide range of finished and semi-finished goods in bedding, clothing, apparel, medical, and other accessories.

The U.S. is anticipated to be the largest market in the North American region for textiles. It is one of the largest producers, raw-cotton exporter, and top raw-textile importer. Fashion is the largest application segment in the region owing to the fast-changing fashionable trends and ease of adoption for the same due to increasing online fast fashion companies.

There has been an increasing trend of smart textiles in the market that use optical fibers, metals, and various conductive polymers to interact with the environment. These help in detecting and reacting to various physical stimuli such as mechanical, thermal, or chemical and electric sources. This is expected to propel the growth of the technical application segment in the market for textile during the forecast period.

Increasing consumer preference towards sustainable products is forcing major textile companies to focus on restructuring their business and investing in manufacturing practices that target sustainable products. For instance, DuPont's plant-based faux fur for performance fashion apparel and Eastman's usage of discarded carpet into new material is expected to open new industry avenues over the forecast period.

Impact of Covid-19 on Global Textile Industry

The recent outbreak of coronavirus disease has acted as a restraint to the market. Global trade restrictions due to disrupted supply chain and decline in textile product consumption amid imposed lockdown have further negatively impacted the market. However, the market is expected to recover strongly during the forecast period with government support and increasing public awareness in terms of effective precautionary measures.

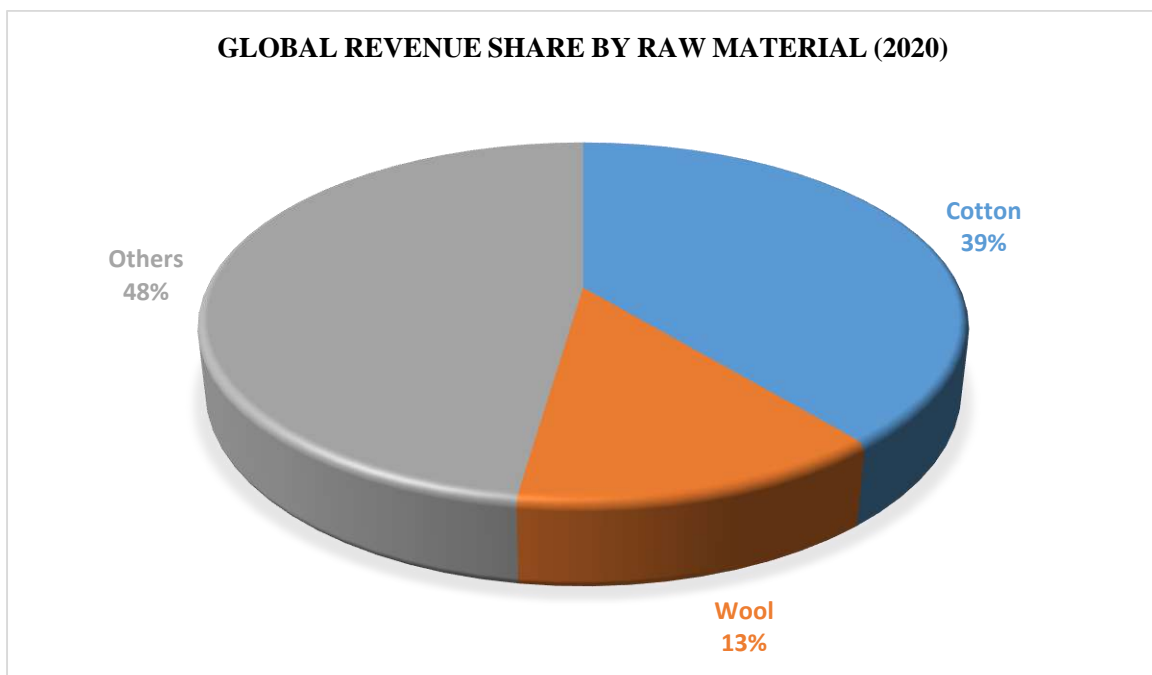

Market size

The global textile market size was projected at USD 1000.3 billion in 2020 and is expected to expand at a compound annual growth rate (CAGR) of 4.4% from 2021 to 2028. Increasing demand for apparel from the fashion industry coupled with the growth of e-commerce platforms is expected to drive the market over the forecast period.

Raw Material Insights

Cotton led the market for textile and accounted for the largest revenue share of more than 39.0% in 2020. Cotton is the world's most important natural fiber, which is attributed to its superior properties such as high strength, absorption, and color retention. China, India, and the U.S. are the major producers of cotton and cotton-based products in the world.

Chemical-based textiles accounted for a volume share equivalent to 98,052.6 kilotons in 2020, as they play an important role in the entire textile manufacturing industry. Though chemicals are hazardous to human health and the environment, they are extensively used as mercerizing agents, neutralizers, levelling agents, binders, thickeners, and stain-removers in the textile industry.

The wool segment accounted for a revenue share of 13.3% in 2020. Wool primarily composed of hydrogen, carbon, sulphur, and nitrogen, is extensively used to manufacture insulation products such as winter wears, blankets, carpeting, upholstery, and others. In addition, the products made from the same are used to absorb odour and noise in heavy machinery, thereby contributing to segment growth.

Other raw materials used in the production of textiles are silk, minerals such as glass fibers and asbestos, and other synthetic material. Silk finds extensive use in the manufacturing of clothing, surgical suture, parachutes, silk comforter, and various others owing to high strength and elasticity, which is expected to drive the segment over the forecast period.

Product insights

Natural fibers

It has led the market for textile and accounted for over 44.0% share of the global revenue in 2020, on account of their use in the diverse application of the fashion and apparel industry. Increasing environmental concerns coupled with the consumer shift to use sustainable products is further expected to increase the demand for natural fibers, thereby aiding positive growth in the market.

Polyester

It is expected to witness a growth rate of 4.2% from 2021 to 2028, which can be attributed to its different properties such as high-strength, chemical and wrinkle resistance, and quick-drying. It is used in both, households as cushioning and insulating material in the pillows, and in industries for making carpets, air-filters, coated fabrics, and others.

Nylon

It is the third-largest product used in the textiles industry. It is widely used in apparel and home-furnishing applications owing to its high-resilience, elasticity, and moisture-absorbing properties. In addition, it acts as a substitute for silk-based products such as women's stockings, parachutes, flak vests, and various others.

The other product segment includes Polyethylene (PE), Polypropylene (PP), aramid, and polyamide. Properties such as high resistance against acids and alkalis at high temperatures and minimum moisture retention have increased the demand for polyethylene in the market. Moreover, the use of polypropylene in the textile industry is adding positive growth to the market.

Application Insights

The fashion segment led the textile market and accounted for more than 74.0% of the global revenue share in 2020, owing to the increasing consumer spending on clothing and apparel. In addition, high consumer requirements for crease-free suiting and shirting fabrics, as well as quality dyed and printed fabrics across the globe, is likely to drive the global market demand for textiles from 2021 to 2028.

GLOBAL REVENUE SHARE BY APPLICATION (2020)

An increase in demand for formal and casual wear and other fashionable clothing among all age groups of the global population is the major growth driving factor for the market. Moreover, increasing population and urbanization in the emerging economies such as India, Bangladesh, Vietnam, Brazil, and others are likely to increase the demand for clothing and apparel, thereby positively contributing to the market.

Demand for textiles in the technical segment is expected to grow at a significant rate of 3.7% over the projected period, owing to its high-performance properties and end-user applications. In addition, increasing applications in construction, transportation, medical and protective clothing have boosted the use of the same, which is consequently driving the market.

The use of textiles in different areas of a household is one of the prominent growth driving factors. This includes bedding, upholstery, carpets, kitchen cloths, towel, and others. In addition, high-consumption of natural fibers such as linen and cotton along with synthetic fibers used for manufacturing household textiles is further propelling the growth of the market.

Regional Insights

Asia Pacific dominated the market for textile and accounted for over 47.6% share of global revenue in 2020, owing to the increasing sales volume of clothing and apparel goods. In addition, the presence of a high number of customers on e-commerce platforms buying clothing and related accessories in the developing economies is further adding positive growth to the market.

Increased penetration of organized retail, favourable demographics, rising income level, and favourable government policies are expected to drive demand for textiles, especially in countries such as India, Bangladesh, Pakistan, and others. In India, 100 percent foreign direct investment (FDI) is allowed in textiles which are set to focus on positive market growth over the forecast period. In Europe, the market demand was estimated to be 83,298.8 kilotons in terms of volume in 2020 and is expected to grow at a significant rate over the forecast period. It can be attributed to the favourable government policies and trade agreements such as free-trade agreements and Euro-Mediterranean Dialogue on the textile and clothing industry.

The demand for textile in North America and Central and South America is likely to witness promising growth over the projected period owing to the rising demand from sports and apparel and home-furnishing textile products. In addition, consumption of textile fibers such as synthetic and cellulose fibers needed for filtration in industrial applications is expected to have a positive impact on market growth over the forecast period.

Key players

The market has been witnessing an increasing trend of expansion and mergers and acquisitions. The companies are trying to increase their sales through various government trade agreements along with the partnership with e-commerce portals such as Amazon, Flipkart, e-Bay, and others.

The market is fragmented due to the presence of several small- and medium-scale manufacturers, especially in countries such as China and India. Moreover, the easy availability of low-cost labor coupled with government support to establish various major players' business units in the aforementioned countries is expected to add positive growth to the market.

Some of the prominent players in the textile market include BSL Limited, INVISTA, S.R.L., Lu Thai Textile Co., Ltd., Paramount Textile Limited, Paulo de Oliveira, S.A., Successori REDA S.p.A., Shandong Jining Ruyi Woolen Textile Co. Ltd., Sinopec Yizheng Chemical Fibre Company Limited, China textiles Ltd., Rhodia SA, Li & Fung Group, Modern Woollens Ltd., Mayur Suitings, JCT Limited.

Global Apparel Market

The global apparel market is projected to grow in value from 1.5 trillion U.S. dollars in 2020 to about 2.25 trillion dollars by 2025, showing that the demand for clothing and shoes is on the rise across the world.

Revenue of the apparel market worldwide from 2013 to 2026 (in billion U.S. dollars)

Textile & Clothing Manufacturing Chain

Textile Market – India

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital-intensive sophisticated mills sector on the other end. The decentralised power looms/ hosiery and knitting sector forms the largest component in the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce wide variety of products suitable for different market segments, both within India and across the world.

Market Size

India's Textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country. The industry contributed 7% to the industry output (by value) in 2018-19. The Indian textiles and apparel industry contributed 2% to the GDP, 12% to export earnings and held 5% of the global trade in textiles and apparel in 2018-19. Exports of textiles (RMG of all textiles, cotton yarns/fabs./made-ups/handloom products,

man-made yarns/fabs./made-ups, handicrafts excl. handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 22.89 billion between April 2021 and October 2021.

Cotton production is expected to reach 37.10 million bales and consumption is expected to reach 114 million bales in FY21—13% growth over the previous year. The production of raw cotton in India is estimated to have reached 35.4 million bales in FY20[^]. During FY19, production of fibre in India stood at 1.44 million tonnes (MT) and reached 2.40 MT in FY21 (till January 2021), while that for yarn, the production stood at 4,762 million kgs during same period.

India's home textile exports grew at a healthy rate of 9% in FY21 despite the pandemic. The Indian textiles market is expected to be worth >US\$ 209 billion by 2029.

Investments and Key Developments

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.75 billion from April 2000 to March 2021.

The production-linked incentive (PLI) scheme for man-made fibre and technical textiles will help boost manufacturing, increase exports and attract investments into the sector. Companies in home textile are using technology to optimise the value chain. Home textile companies in India are also leveraging strategic partnerships to strengthen their business operations and foothold in the country.

Government Initiatives

Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route. The Rs. 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major booster for the textile manufacturers. The scheme proposes to incentivise MMF (man-made fibre) Apparel, MMF Fabrics and 10 segments of Technical Textiles products.

1. Other Initiatives taken by Government of India are:
2. The Indian government has notified uniform goods and services tax rate at 12% on man-made fabrics (MMF), MMF yarns, MMF fabrics and apparel, which will come into effect from January 1, 2022.
3. Union textile minister Mr. Piyush Goyal announced a mega handloom cluster in Manipur and a handloom and handicraft village at Moirang in Bishnupur. The mega cluster will be set up at an estimated cost of Rs.30 crore (US\$ 4.03 million) under the National Handloom Development Programme (NHDP).
4. In October 2021, Union Minister for Commerce and Industry, Textiles, Consumer Affairs, Food & Public Distribution, Mr. Piyush Goyal, announced the creation of 100 textile machinery champions in the country and to promote it in the global market. Through this, the government aims to make India a global player in textiles machinery.
5. In October 2021, the Ministry of Textiles approved continuation of the comprehensive handicrafts cluster development scheme with a total outlay of Rs. 160 crore (US\$ 21.39 million). Through this scheme, the government aims to support domestic SMEs and local artisans.

Textiles and garments industry is expected to reach \$190 bn by 2025-26 from \$103.4 bn in 2020-21.

The textiles and apparel industry in India has strengths across the entire value chain from fiber, yarn, fabric to apparel. The Indian textile and apparel industry is highly diversified with a wide range of segments ranging from products of traditional handloom, handicrafts, wool, and silk products to the organized textile industry in India.

The organized textile industry in India is characterized by the use of capital-intensive technology for the mass production of textile products and includes spinning, weaving, processing, and apparel manufacturing. The domestic textiles and apparel industry stood at \$108.5 bn in 2019-20 of which \$75 bn was domestically consumed while the remaining portion worth \$28.4 bn was exported to the world market.

The highest contributors to FDI in the Textile sector of India (including dyed, printed) from April 2016 to March 2021 are Japan, Mauritius, Italy, and Belgium. Cotton production supports 5.8 million farmers and 40-50 million people in allied sectors.

Further, the domestic consumption of \$75 bn was divided into apparel at \$55 bn, technical textiles at \$15 bn and home furnishings at \$5 bn. While exports comprised of apparel exports at \$12 bn; home textiles exports at \$4.8 bn; fabric exports at \$4 bn; yarn exports at \$3.8 bn; fiber exports at \$1.8 bn and others at \$2 bn.

Export of Cotton Yarn/Fabrics/Made ups, Handloom Products Etc. was valued at \$1297.82 bn in August 2021 with a positive growth of 55.62% over exports of \$833.95 bn in August 2020.

Export of RMG of All Textiles was valued at \$1235.11 bn in August 2021 with a positive growth of 13.99% over exports of \$1083.53 bn in August 2020.

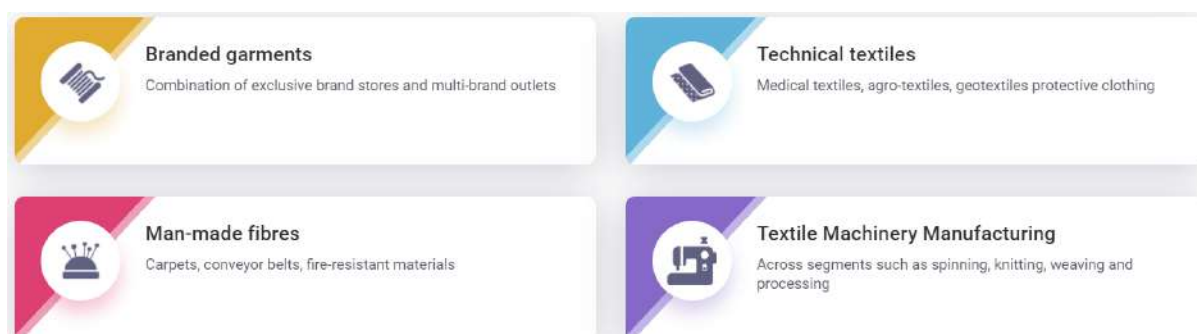

Growth drivers

- Abundance of raw material

- Presence of entire value chains
- Competitive manufacturing costs
- Availability of skilled manpower
- Large and growing domestic market
- Rising per capita income, higher disposable incomes and preferences for brands
- Organized retail landscape & e-Commerce
- Increased focus on technical textiles due to growth of end-user industries such as automotive, healthcare, infrastructure and oil and petroleum
- Production-Linked Incentive (PLI) Scheme in Man-made fiber and technical textiles with financial outlay of INR 10,683 cr under Atmanirbhar Bharat package

Industry trends

Man-Made Fibres

2nd largest producer of both polyester and viscose globally

The domestic MMF industry mainly comprises of two components i.e., polyester and viscose, which together accounts for about 94% (in volume terms). Under this, polyester accounts for about 77.5% while viscose accounts for the remaining share. MMF is primarily used to produce 100% non-cotton fabrics and blended fabrics, which are in turn used in readymade garments, home textiles and other industrial textiles.

MMF production witnessed an increase of about 3.7% yo-y in FY19 after declining about 0.7% in FY18. The total MMF production as of 2019 stood at 2.6 billion kgs.

Factors such as increasing use in nonwovens and technical textiles, changing consumer trends including increasing emphasis on fitness and hygiene, rising brand consciousness, fast changing fashion trends, increasing women participation in workforce will further boost the demand of manmade fibres

Product profiles

Amongst the top 15 traded MMF based categories, India has a comparatively higher share in categories like polyester filament yarn, carpets, dresses, blouses and t-shirts.

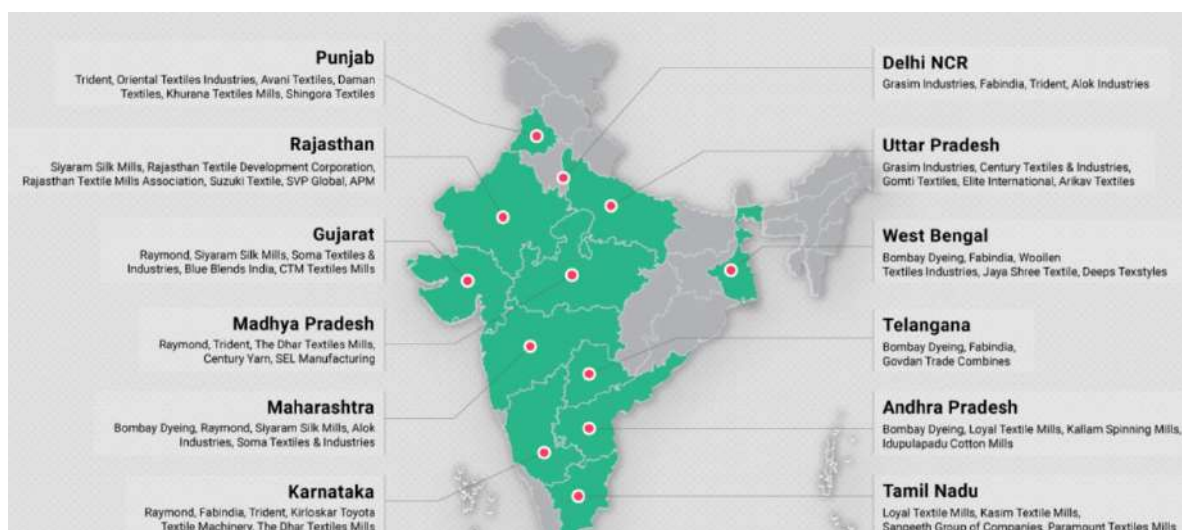

POLYESTER

- Purified Terephthalic Acid (PTA) is a key raw material component in the polyester value chain and reacts with Mono Ethylene Glycol (MEG) in the process of continuous polymerisation for producing polyester.
- The PTA industry is a highly organised industry, with Reliance Industries, Mitsubishi and IOCL being the only PTA manufacturers in India. Likewise, the MEG industry is highly organized as Reliance Industries, India Glycols and IOCL being the only MEG manufacturers in India.
- The polyester staple fiber production as of 2017-18 stands at 852 million kg

VISCOSE

- Growth in viscose fibre is expected with improved GDP per capita and subdued cotton demand in India.
- The viscose staple fibre production as of 2017-18 stands at 370 million kg.
- The key manufacturers of viscose fibre yarn are Century Yarn, Aditya Birla Nuvo, Kesoram Rayon and National Rayon Corporation.

Garment manufacturing industry – Value chain

Garment manufacturing industry is primarily engaged in the design, cutting and sewing of garments from fabric. On industrial basis there are certain areas or sequence through which Garment are manufactured.

Textile industry has been playing a pivotal role in Indian economy. Textile sector alone presently provides for nearly 28% of total organized manufacture sector's employment in India. About 93 million people directly and indirectly are engaged in this industry. Indian Textile Industry enjoys inherent comparative advantage because it is almost self-reliant from the stage of production of raw materials to the delivery of finished products from cotton growing, ginning, spinning, and weaving to Manufacturing of clothing items.

The world fast moving towards natural products and as a result of this trend, demand for cotton Garment is increasing. The demand of hosiery garment is increasing at a fast pace because of the comfort and soft feel of the product.

Garment Dyeing

Dyeing prefabricated items of clothing represent an interesting supplement to the conventional manufacturing of clothing from ready-dyed pieces. This is above all the case because the risks involved in conventional manufacturing with reference to the correctness of the colour shade are substantial and frequently generated a broad colour range with increased storage cost.

Dyeing clothing after fabrication bears the risk of a higher extent of damage should problem in the Dyeing process. In worst-case scenarios, losses in value after irreparable error as exacerbated by an inability to maintain delivery commitment.

Basic Theory of Garment Dyeing

Depending on the wet fastnesses requirements the fabric, garment made from the cotton gray fabric are mainly dyed with direct and reactive dyes. For the low colour fastness direct dyes are used and for high colour fastness reactive dyes are used for cotton garment Dyeing. If the cotton garment dyes with reactive dyes then two types are available in the market, namely:

- Hot brand reactive dyes.
- Cold brand reactive dyes.

Among those two brand of reactive dyes, hot brand reactive dyes are commonly used for cotton garment dyeing. Because cotton garment dyeing with hot brand dyes facilitates easier and quicker dyeing process with reasonable good dyeing quality.

Stages of Production

Apparel Production is generally done in four stages:

Besides these, there may be an additional stage of 'Value Addition', which is a term used to indicate any process that adds to the total cost of the product and hence increases the value of the product. The addition is to enhance use and serviceability/functionality of the product and/or its aesthetic appeal. This includes special finishes to yarn and fabric (e.g., special washes to garments like sand wash or enzymes wash for denims) or surface ornamentation (e.g., prints, embroideries, etc.). This becomes specific to the product style and could be done before, during or after assembly of the product.

1. Procurement and Inspection of Raw Material

The process of apparel manufacture begins with the procurement of raw material and inspection or checking of the same. This includes the fabric and trims (zippers, buttons, interlinings, labels, tags etc.). Fabric inspection is done to find faults or defects in the fabric. Ideally 100 per cent of fabric received should be checked before it is cut. However, when the fabric is procured from a reliable source or when the fabric is certified as fault free by the fabric manufacturer, only representative sample quantities are checked.

Fabric defects can be classified on the basis of the source of the faults as:

- (a) Yarn faults
- (b) Weaving faults
- (c) Dyeing faults
- (d) Finishing faults

Defects arising from yarn faults

- Coarse end and fine end: Warp yarns having a larger diameter or smaller diameter than those normally being used in the fabric.
- Fuzz and Fuzz balls: Fuzz is the loose or frayed fibers originating from the yarns. These may form tiny balls and get woven into the fabric.
- Slub: An abruptly thickened location in a yarn characterised by softness in twist and more or less of short duration.

Defects arising from weaving faults

- Bar: Filling wise band across the full width characterised by a change in appearance from normal color or texture of finish.
- Barre': An unintentional, repetitive visual pattern of continuous bars and stripes usually parallel to the filling of woven fabric or to the course of circular knit fabric.
- Bias filling: The filling yarns or colour pattern not being at right angle to the warp yarns.
- Bowed filling: The filling yarns or the colour pattern having a curvature.
- Broken end: A warp yarn missing for a portion of its length.
- Float: Thread that extends unbound over the threads of the opposite yarn system with which it should normally be interlaced.
- Kink: A short length of yarn spontaneously doubled on itself. Also called curl, kinky thread, looped yarn, snarl.
- Misreed: A warp wise streak caused by improper spacing of the ends across the fabric.
- Smash: An area where the fabric has been ruptured by the simultaneous breaking of a large number of adjacent warp threads.

Defects arising from dyeing faults

- Colour run: The colour of one area has bled or superimposed on the colour of another area.
- Shaded: The colour or bleach is not uniform from one location to another.
- Defects arising from finishing faults
- Baggy: A fabric which will not lie flat on the cutting table.
- Chafe: An area where the fabric has been damaged by abrasion or friction. Cuts, tears, crease, wrinkle and curled selvages.
- Tentering marks: Enlarged pinholes or distorted areas along the edge of the fabric caused by the holding of the fabric to width during finishing. Also called pin marks.
- Uneven finish: The finish is not uniform from one location to another.

Fabric Inspection and Testing

There are internationally accepted systems of fabric inspection which define the way the fabric is to be inspected and what constitutes an "OK" fabric. In all the systems, the fault or defect is assigned points based on its size, type, spread etc. The total points in a given linear length are then totalled and the fabric is 'accepted' or 'rejected'. Some companies have customised their own system by adapting from existing systems according to their need and specialised fabric types. The acceptance criteria also depends on the final product (style, market, functionality, performance base, etc.) being made.

Other than this, certain tests are also conducted to test the suitability of the fabric for its end use. The tests may be standard tests done by any fabric manufacturer or may be specially requisitioned by the buyer of the end product. These tests include colour fastness (against light, moisture, perspiration, chlorine etc.), thread count, fabric weight, shrinkage, flame-retardant etc. Once the defect and its extent are identified, the possibility of repair/rectification is checked. If the fabric can be rectified, it is sent for the selected process. If not, the fabric is rejected. Some faults may be accepted if the extent is not very high i.e. it does not affect a large area of the fabric. Sometimes the decision to accept defected fabric may be taken if the cost and/or time involved in the reprocessing of the fabric are too high to be absorbed by the cost of the order.

Fabric inspection is one of the most important steps in the process of production, as it defines the final quality of the product. The cost of raw material in any garment is about 70%, out of which 90% or above is that of the fabric. In case this process is not carried out properly, the cost factor of the fabric component in the garment would increase leading to less profits and, in some cases, losses.

2. Laying and Cutting of Fabric/Material

The next stage in the production of garments is the planning and processing of the cutting of the fabric. This involves the following steps:

1. Marker plan:

A marker is defined as the placement of pattern pieces on fabric in such a manner that the consumption of fabric per garment is optimised. The first stage is to identify the number of pieces that make up the entire pattern of one unit of item. The planning of the marker defines the average consumption of the fabric per piece which ultimately affects the cost of the product.

The marker may be planned by manually placing pattern pieces on a defined width of the table and creating permutations till the most optimum length is achieved. This is very time consuming especially where the number of pattern pieces involved are high (such as in a formal jacket). There is also the problem of copying the marker so that it can be replicated for multiple lays. The more efficient technique of marker planning is by using specific computer software or CAD system. In this, the pattern pieces are fed into the system (digitised) and planning is done on a monitor. This technique is time efficient and eliminates most of the errors that are related to a manual plan. A printout of the final marker/s is taken for replication which ensures that the consumption of fabric per unit of product is maintained.

2. Spreading:

Fabric is smoothened and spread along lengths of table in layers. The length of the layer is defined by the marker. The fabric layers are matched along one length edge and are equal in length. The fabric may be spread by hand or with the assistance of machines called Spreaders. These machines may be mechanically, electrically, electronically or computer operated. The final product of the spreading process is called a lay. The height of the lay will also affect and be affected by the cutting apparatus to be used. Care is taken during lay preparation that each lay consists of only one type of fabric.

3. Marking:

The patterns are traced on the top layer as per the define marker. In some cases a computerised printout of the marker on a paper sheet of the same width as the fabric may be used as the cover to the lay. This then gets cut with the fabric layers.

4. Cutting:

The layers are cut simultaneously using machines that maybe controlled either manually or through computer systems. There are different types of machines like the straight knife, round knife, band knife and die cutters. The height of the lay, i.e. number of layers in each lay, is dependent on the type of cutting apparatus as well as the dimensional stability of the fabric.

Each type of cutting apparatus has its own merits and demerits — e.g., the straight knife machine is the most readily available and the cheapest of theme chained cutting apparatus. However, it is not the best choice to cut knitted or stretch fabrics as it does not have the grip that can control the dimensional stability of such a fabric while cutting. The cutting apparatus used to cut a lay is usually mechanised. This is because scissors cannot cut through multiple layers with precision. Also the time and effort required in this is higher than may be possible in production.

5. Bundling:

The cut pieces are bundled for further processes of stitching/embroidery/printing etc. The number of pieces in a bundles dependent on the type of production system and the process sequence to be followed. The bundles may have all the components of a garment or only selected ones. Along with bundling, ticketing of the components is done which identifies the layer number within the lay. This is done to ensure that components of one garment are cut from the same layer of fabric.

3. Assembly of the Product

The garment pieces are next sent to the assembly or stitching section comprising of different types of sewing machines. The sewing machines may be multipurpose, i.e. they can be used for different types of operations of sewing, or the machines may be specialised, i.e., they are used for specialised operations only. The more common of the first category of machines (multipurpose) is the Single Needle or Lockstitch Machine. It uses two threads to do the stitching, one which enters the fabric from the top through the needle and one which enters from the bottom through a bobbin. This machine can be used for any type of fabric and any kind of stitching operation. The lockstitch is reversible and a very stable, strong and inflexible stitch. It is also possible to work it in reverse direction to have a double stitching line.

For stitching of knitted fabric, the machine used is the Chain Stitch machine. This stitch may use between 1–5 threads for formation. The lower thread comes through a hooked device called the looper. The looper may or may not have its own source of thread. The chain stitch is flexible and non-reversible by nature. It is predominantly used to accommodate stretch in the fabric being sewn. The commonly used type of this machine is the Over lock machine. This machine is used for all garments made from knitted fabric. The process of assembly, i.e., the way in which the multiple pieces of the garment are put together to make a complete garment, may use one or a combination of multiple production systems.

- **Tailor system**

Each operator or tailor assembles an entire garment. This system is used mainly in customised clothing — clothing made to fit and to the measurements of one individual. The operators are extremely skilled and are capable of working on varied types of machines.

- **Team working or module system**

The garment is assembled by a group or team of operators. This is the most popular system in the garment manufacturing industry. Each team is a mix of skilled, semi-skilled and unskilled workers and jobs are allocated according to skill level requirements of the assembly process.

- **Unit production system**

The garment assembly process is broken into smaller units called operations. Each operator is given one or more operations to do which need to be done on the same sewing machine. The piece is passed from one operator to the next operator in a predetermined pattern enabling the total assembly of the product. This system is used effectively in units with large manufacturing facilities or/and in garments which have many operations as also in manufacturing units which are catering to production of a single product.

This system is dependant more on the training of the operator. Operators are trained on specific machines and in specific type of operations so that their individual productivity is high. The system does not work very well in small orders and for garments which have very few operations.

4. Finishing and Packaging

The garments are finally sent for finishing and packaging. The finishing process includes final inspections, stain removal, repairs, ironing/pressing and folding. The pressing/ironing techniques would also define the final look of the garment (creases, folds, size of fold, etc.). Packaging of garments can be done in many ways. Some garments are hanger packed (coats, jackets, suits, children's dresses etc), some are fold packed (shirts, t-shirts, track suits, etc.) and some are folded and then hanger packed (trousers).

The type of packaging is dependent on the specifications of the buyer, the display techniques at point of sale, the bulk of the garment (volume of individual piece), the price of the garment etc. For exports, all the above detailed types of packaging may be used as specified by the buyer. The packing of the garments differs from packaging. Packing is the process of preparing any product for dispatch from one place to another. The most common packing technique is the use of Cartons. A carton is made of layers of corrugated paper stuck together in a box shape (cube/cuboid). The size of the carton can be customised as per requirement, defining its length, width and height.

Quality assurance in the garment industry

Quality of the product is defined as its 'fitness for use'. That means the requirement of the customer actually dictates whether any product is a quality product or not. The frequently used term 'Bad Quality', hence, does not exist as the term 'Quality' by itself defines the fitness of the product. The quality of the product is ensured by –

- a. Adopting proper procedure of work – defining the complete process of the product manufacture from raw material to finished goods and elaborating on operating procedures for each department.
- b. Following the adopted procedure as defined above.
- c. Selection and use of appropriate machinery.
- d. Training of manpower – This is done at all levels, i.e., operators, supervisors and management – on machinery, maintenance, quality systems, production and the product.
- e. Inspection of product at various stages of production – For this, crucial stages are selected. There are no defined rules on the frequency and quantity of inspection. Companies tend to develop their own rules for the same. The important issue is that the final product should conform to the standards and specifications laid out for the product in question.

Impact of covid-19 on the Indian apparel & textile industry

Indian Textiles and Apparels (T&A) industry, accounts for approximately 4% of the global T&A market. The T&A industry is one of the largest and the most important sectors for the Indian economy in terms of output, foreign exchange earnings and employment. The industry contributes approximately 7% to industrial output in value terms, 2% to the GDP and 15% to the country's export earnings.

Due to countrywide lockdown, however, the industry is grappling with major hurdles in the following areas:

Labour force and employment

T&A provides direct employment to over 45 million people but the nationwide lockdown has led to a temporary closure of factories and lay-offs have already begun among low wage workers.

Import & Exports of raw material and ready-made garment

The Covid-19 pandemic is primarily expected to adversely impact exports and with second order impact on the domestic markets with both exports as well as domestic sales falling.

The pandemic has affected the majority of India's export market (the US and EU together constitute for approximately, 60% of the total apparel exports from India in value terms), causing order cancellations/deferral of order leading to inventory build-up and expectation of slower realization of export receivables leading to higher working capital requirements.

Apparel exports are expected to fall due to drying up of order in the last quarter of FY20, working capital issues and lack of clarity on the duties and incentives especially when exporters from Bangladesh, Sri Lanka and Vietnam receive preferential access.

Additionally, domestic consumption is also getting impacted due to all India closure. New store openings have stopped and even domestic stores are facing an inventory build-up due to apparel sources for the upcoming summer season. Further, domestic prices could be negatively impacted if exporters dump their inventories in the domestic market leading to even reduced margins. This could lead to short term blips such as reduced employment of casual labour (factory closures and people moving back to their home towns) and reduced consumption.

Cash flow constraints

The sector has been grappling with profitability issues due to a sharp decline in yarn exports, cheaper imports etc. these issues only look to get aggravated further with the current crisis.

Supply chain disruption

The Garment manufacturers need to look at local sourcing opportunities, due impact on imports and export.

Consumer sentiment

If nationwide lockdown continues and the situation persists, it will impact consumer sentiment on the higher side, due to closure of the market and mall also to maintaining social distancing, safety and health. The extent of the outbreak and lockdown would directly impact the length of the recovery cycle.

To minimize the impact the Confederation of Indian Textile Industry (CITI) has requested the government to immediately announce a relief package for the textile and apparel sector to mitigate the crisis being faced by the capital and labour-intensive textile Industry, post the corona virus spread.

Future outlook

India is working on major initiatives, to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on rise. Government is supporting the sector through funding and machinery sponsoring.

Top players in the sector are attaining sustainability in their products by manufacturing textiles that use natural recyclable materials.

The future for the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

Weaving is process of converting yarn into fabric interlacement of yarns. Below is the flow chart our manufacturing of grey fabric through weaving process.

1. *Procurement of yarn*

The process starts by acquiring right quality of yarn as per the requirements of the client. We source the yarn locally depending upon the need.

2. *Winding*

This process removes objectionable forts in the fiber and makes it balanced for further processing. This is done through a machine called winding machines. This machine also winds the refined yarn on to a bobbin known as cones.

3. *Warping*

Warping is the process of combining yarns from different cones together to form a sheet. This process is performed to achieve better performance during the weaving process.

4. *Sizing*

Sizing is an intermediate protective process which is done to prepare the yarn for the weaving. In this process a protective adhesive (synthetic/ natural) coating is applied upon the yarns surface to give it additional strength.

5. *Weaving*

Depending upon the requirements, the yarn is then woven through different techniques such as plain weave, twin weave, sateen weave etc. This process is carried out on weaving machine which produces the final products known as grey cloth.

6. *Inspection*

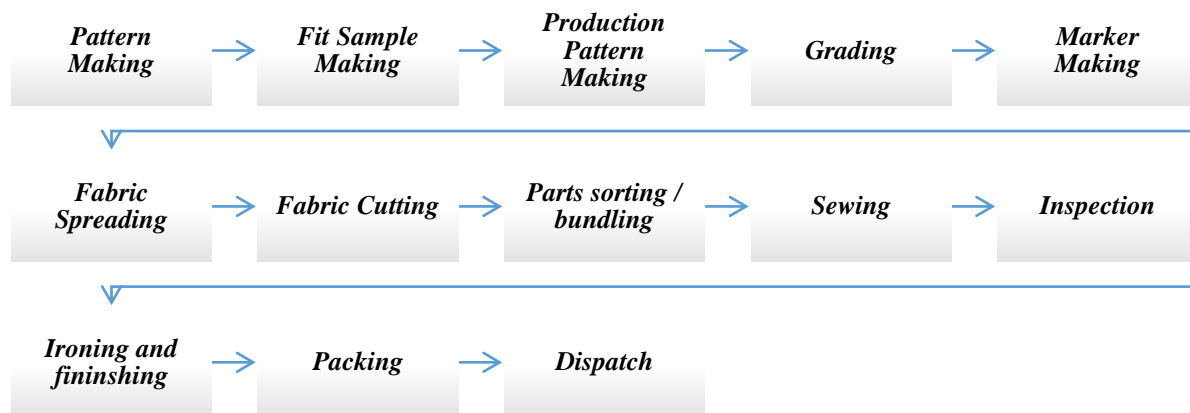

The grey cloth is then inspected for the required quality. Once it passes the minimum quality requirements, it is forwarded for further process.

7. *Dispatch*

Once the finished product is approved by the inspection team, the fabric is dispatched to the customer in their desired mode of transportation. We rely on third party transportation for dispatch.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B) USE OF ESTIMATES

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

C) ACCOUNTING CONVENTION

The group follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have been passed to the buyer. Sales are disclosed net of GST, trade discounts and returns, as applicable.

Revenue from services is recognised when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable."

Dividend Income

2. Fixed Assets

- a) Fixed are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Fixed Assets are ready for use, as intended by the management;
- c) Subsequent expenditures relating to fixed assets are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on SLM basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials, Stores & Spare parts and Packing Material-Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on Weighted Average Cost basis.

b) Work-in-Progress is valued at raw material cost plus proportionate conversion cost.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale, however due to the nature of the company the own manufactured goods are valued at a Retail Method basis on a consistent basis, however the Trading Goods are valued at the lower of Cost or Net Realisable Value.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

The Group has made provision for payment of Gratuity to its employees. This Provision is made as per the method prescribed under the Payment of Gratuity Act. The cost of providing gratuity under this plan is determined on the basis of actuarial valuation at year end. Under the Gratuity Fund Plan, the holding company contributes to a LIC administered Group Gratuity Fund on behalf of employees.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognised for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Draft Prospectus and the Risk Factors given in this Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Competition

The textile industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors (local as well as international). We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, design, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations.

COVID-19 Pandemic

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the textile industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the recent wave of the virus, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

During the first wave in India in first quarter of FY 2020-21, our manufacturing facilities were severely affected by government restrictions. During the second wave, the lockdown did not halt operations within our factories after Central Government lifted partial restrictions. However, in case due to recent third or consequent wave of COVID-19, if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

The extent to which the COVID-19 pandemic impacts our business, results of operations and financial condition will depend on future developments, which are highly uncertain and are difficult to predict, including, but not limited to, the duration and severity of the pandemic, the nature and scope of government actions to contain the pandemic or address its impact, and how quickly and to what extent normal economic and operating conditions can resume, other geographies affected and the impact of the pandemic on economic activity in India and globally. In addition, we cannot predict the impact that the COVID-19 pandemic will have on our customers, and each of their financial conditions; however, any material effect on these parties could adversely impact us. Given the rapidly changing implications of the spread of COVID-19, it is difficult to assess its impact on our business and results of operations at this time and we may not be able to quantify or accurately predict the same.

Significant Developments after September 30, 2021 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in this Draft Prospectus which materially or adversely affect or is likely to affect the profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months except as mentioned below:

1. Our Company has increased its borrowing powers to Rs. 500.00 crores in the Extra-Ordinary General Meeting dated February 11, 2022.
2. The Cosmos Co-Op Bank Limited has revised its Sanction Limit for Credit Facility to ₹ 57.50 Crores vide its letter dated October 11, 2021.

The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

b) Use of Estimates:

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

c) Fixed Assets:

- a) Fixed are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Fixed Assets are ready for use, as intended by the management;
- c) Subsequent expenditures relating to fixed assets are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on SLM basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end.

d) Impairment of Assets:

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

e) Provisions and Contingent Liabilities:

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the

obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made

f) Cash and Cash Equivalents:

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

g) Inventories:

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials, Stores & Spare parts and Packing Material-Lower of cost and net realizable value. The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

The Group has made provision for payment of Gratuity to its employees. This Provision is made as per the method prescribed under the Payment of Gratuity Act. The cost of providing gratuity under this plan is determined on the basis of actuarial valuation at year end. Under the Gratuity Fund Plan, the holding company contributes to a LIC administered Group Gratuity Fund on behalf of employees.

j) Earnings Per Share:

Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented

k) Income Tax:

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognised for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out

l) Foreign Exchange Transaction:

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

m) Cash Flow Statement:

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

n) Borrowing Costs:

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

SEBI through UPI Circulars, has introduced an alternate payment mechanism using Unified Payments Interface (**UPI**) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIIs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days (“**UPI Phase I**”). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“**UPI Phase II**”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors (“**UPI Phase III**”), as may be prescribed by SEBI. Accordingly, the Offer has been undertaken under UPI Phase II, till any further notice issued by SEBI.

ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- c.) In case the total amount (i.e., original Application Amount plus additional payment) exceeds ₹ 200,000, the Application may be considered for allocation under the Non-Institutional Category in terms of the Prospectus. If, however, the Applicant does not either revise the application or make additional payment and the Price is higher than Issue price disclosed in the Prospectus prior to the revision, the number of Equity Shares applied for may be adjusted downwards for the purpose of Allotment, such that additional amount is required blocked and the applicant is deemed to have approved such revised application at the Cut-off Price.
- d.) In case of a downward revision in the Price, RIIs and Retail Individual Shareholders, who have applied at the Cut-off Price, could either revise their application or the excess amount paid at the time of application may be unblocked.

OTHER INSTRUCTIONS

JOINT APPLICATIONS IN THE CASE OF INDIVIDUALS

Applications may be made in single or joint names (not more than three). In the case of joint Applications, all payments will be made out in favour of the Applicant whose name appears first in the Application Form or Revision Form. All communications will be addressed to the First Applicant and will be dispatched to his or her address as per the Demographic Details received from the Depository.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant’s status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband’s name to determine if they are multiple applications

- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.
