INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. Our Company has adopted an integrated business model and our commercial success is largely dependent upon our ability to develop innovative specialized plastic products suitable to the needs of our customers. Our inability to effectively utilize and manage our PPD and Design Divisions to develop innovative products would impact our integrated business model, thereby affecting the utility of our products resultantly impacting our revenue and profitability.***

We are engaged in manufacturing and export of specialized plastic products in the home improvement and home furnishing industry to renowned multinational modern trade retailers. We operate a fully-integrated, sustainable and technologically advanced manufacturing unit, which has been certified to be compliant with the requirements of ISO 9001:2015. Our integrated business model enables us to provide end to end capabilities from developing and devising the product with innovative applications, through processes which are developed in-house by our PPD Division and compliant with the pre-determined quality standards applicable to our products. Our business model has been developed to ensure that the products manufactured by us and the processes developed by us are completely customizable. Our integrated business model enables us to provide end to end capabilities from developing and devising the product with innovative applications, through processes which are developed in-house by our PPD Division and compliant with the pre-determined quality standards applicable to our products. Our business model has

been developed to ensure that the products manufactured by us and the processes developed by us are completely customizable. Since, we cater to renowned multinational modern trade retailers, and our products cater to various industries, including but not limited to home furnishing, home decor, departmental stores, discount retailers, hypermarkets, hardware and home improvement, office supplies stores, agricultural and medical industry and international importers and wholesale distributors, we need to continuously develop our products and processes which is suitable for the products of each industry and is compliant with the regulatory requirements of domestic and international authorities. Furthermore, we intend to expand our customer base and product portfolio by catering to diverse industries domestically and internationally. We might have to invest a large amount of our resources and funds in our PPD Division and Quality Division to ensure that we continue to provide diverse application of our products to our customers and are able to meet their customized demands of our products. We might have to allocate a major portion of the revenue or profits earned by our Company towards upgradation and efficient functioning of our laboratory in our PPD Division and hiring qualified personnel in our PPD Division and Quality Division, which may skew the resource allocation from other business activities, and possibly impacting our revenues and profitability.

In the event we are unable to effectively manage our PPD Division and Quality Division or fail to integrate the divisions in our business model, we might not be able to satisfy all the requirements of our customers which may impact our customer base and our ability to retain and efficiently serve our customers. The inability of our PPD Division to develop innovative and multifarious specialized plastic products for various industries could impede the growth of our product portfolio and our ability to function in diverse industries, thereby impacting our business operations and diverse customer base. If we fail to continue to provide integrated and complete solutions, we might have to outsource services from third parties to carry out functions of our business model and provide a complete solution to our customers, which could result in increased costs in manufacturing our products, consequently forcing us to shift the burden of these costs to our customers, thereby affecting our cost competitiveness and financial condition. Therefore, the commercial success of our business is highly dependent on our ability to develop and design innovative products with diverse applications in various industries and provide an end to end experience to our customers. Our failure to successfully develop and design innovative products for new industries or find new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

2. ***The commercial success of our products depends to a large extent on the success of our customers. If the industry or the business in which our customers are engaged in does not perform well, it could have a material adverse effect on our business, financial condition and results of operations.***

We are engaged in manufacturing and export of specialized plastic products in the home improvement and home furnishing industry to renowned multinational modern trade retailers. Since, we cater to renowned multinational modern trade retailers, and our products cater to various industries, including but not limited to home furnishing, home decor, departmental stores, discount retailers, hypermarkets, hardware and home improvement, office supplies stores, agricultural and medical industry and international importers and wholesale distributors. The demand of our products is directly proportional to the demand of the products of our customers who in turn retail and sell them in their stores. Therefore the commercial success of our business is highly dependent on the commercial viability, demand and success of our customers. Any downturn in the demand of such products could have a direct impact on the demand of our products and our business operations. Any disturbance in the industry in which our customers retail our products could adversely impact our business due to our high dependence on our customers. A reduction in the demand, development and production activities in the industries in which our products are retailed by our customers, may correspondingly cause a decline in the demand for our products due to a slump in the business activities of our customers. Alternatively, in the event our customers are able to source products similar to ours for better prices from our competitors or if our customers are able to find a cheaper alternative for our products, it could conversely result in a reduction in the demand of our products and have a material adverse effect on our business, financial condition and results of operations.

We cannot assure you that we will be able to develop and innovate diverse applications of our products in various industries to diversify and bifurcate our business risk in a systematic manner and counter effect the failure of one industry to avoid an impact on our business operations. We also cannot assure you that we will be able to provide cost effective and quality products to our customers, which would deter them from approaching our competitors to substitute our products at lower prices. Our failure to effectively react to these situations or to successfully introduce new products or new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

3. ***We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our Company is engaged in the business of manufacturing specialized plastic products for the home improvement and home furnishing industry for renowned modern multi-national retailers. In the Fiscals 2023, 2022 and 2021, 72.82%, 78.72% and 91.73%, respectively, of our revenue from operations were derived from our top five customers. Our business operations are highly dependent on our customers, and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

4. *Any inability to pass on increased price of the raw material, used for manufacturing our products may affect our profitability.*

Raw material consumed as a percentage of total revenue during the Fiscals ended March 31, 2023, March 31, 2022 and March 31, 2021 was 62.70%, 69.92% and 59.33%, respectively. We import as well as domestically source our raw materials from various suppliers. Further, any fluctuations in the demand and/or supply of our raw materials may impact its purchase price. In addition to above, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the home improvement and home furnishing industry in general. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us at reasonable prices and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material could also impact the cost of raw materials required by us for manufacturing our finished products.

We do not have an understanding or formal agreements executed with our customers, wherein we have mutually agreed to pass on any increase in the cost of raw materials to our customers. In the event, we are unable to account the increased cost of raw materials in the cost of our products, our financial condition and result of operations would be severely impacted. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Our inability to pass on the increased costs of raw materials to our customers in future, may affect our profitability.

5. *We are subject to extensive government regulation with respect to the raw materials used in our manufacturing process. A failure to comply with the relevant environmental regulations or any noncompliance with, or changes in, regulations applicable to us may adversely affect our business, results of operations, financial condition and cash flows.*

We are engaged in the business of manufacturing specialized plastic products for the home improvement and home furnishing industry for renowned modern multi-national retailers. Our products are crafted out of an extensive range of industry approved materials such as polyethylene polypropylene, polyethylene vinyl acetate, acrylonitrile butadiene styrene, etc. Since, our products predominantly consists of plastic as a major raw material, we are subject to extensive government regulations with respect to reusing, recycling and managing the plastic waste generated during our manufacturing process. We are required to obtain certain approvals and authorizations from the state pollution control board, local municipal authorities to carry out our business operations. We have availed the relevant licenses and approvals from these authorities; however we cannot assure you that we would be able to renew such licenses or effectively comply with the regulatory requirements applicable to us. While, our Company manufactures majority of our products from renewable or recycled materials, therefore most of the products that our Company manufactures consists of at least 25% post-consumer and/or post-industrial recycled plastic, however, if we are non-compliant with, or fail to comply with changes in, the applicable regulations, we may incur increased costs, be subject to penalties or other sanctions imposed by the regulatory authorities. While, our Company has made an application dated August 16, 2020 before the Member Secretary, Gujarat Pollution Control Board, seeking exemption from registration under Plastic Waste (Management & Handling) Rules, 2016, on the ground that is a hundred per cent export oriented unit, however we cannot confirm that we will receive an exemption or that we will not be required to comply with the aforementioned rules.

Any adverse decisions or amendments made by the Government with respect to the industrial use of plastics in the applicable environmental policies, laws and regulations could result in controlled and regulated supply of the key raw materials required by us, and consequently increase our raw material costs. In the event, we experience an increase in our raw material costs, we would be forced to increase the cost of our products which could affect our cost

competitiveness. As of date, we have not been able to find an alternative raw material for manufacturing our products and our continued business operations are highly dependent on the availability of our key raw materials. In the event, due to an increased awareness of plastic pollution and its staggering impact on our environment, the Central or State Governments might impose a complete or partial ban on the industrial usage of plastics or regulate the supply of plastics, resultantly we might be unable to source the adequate quantity of raw material and could be forced to halt or permanently stop our business operations. On happening of such events, the continuity of our business operations, revenue, result of operations and financial condition might be adversely affected.

The adoption of stricter waste management and environmental laws, stricter interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require us to make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. The additional burden of being compliant with the applications laws could put a strain on our resources and could compel us to shift the burden to our customers by increasing the prices of our products. Monitoring legal developments and maintaining internal standards and controls in order to abide by rules and regulations applicable to us can be costly and may detract management's attention which could adversely affect our operations. Any failure to comply with these rules and regulations could materially and adversely affect our reputation and the imposition of any fines or penalties may materially and adversely affect our business, financial condition, results of operations and cash flows. For further details, please refer to the chapter titled — “Government and other Statutory Approvals” on page 208 of this Prospectus.

6. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.*

Our Company is engaged in the business of manufacturing specialized plastic products for the home improvement and home furnishing industry for renowned modern multi-national retailers. We manufacture our products on the basis of orders which are received from our customers which generally contain the specifications as per which the products have to be manufactured. We have not entered into any formal agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of our products. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

8. *If our product development efforts do not succeed, we may not be able to improve our existing products and/or introduce new industry applications for our products, which could adversely affect our results of operations, growth and prospects. Further, if we are unable to anticipate and respond to changes in the market trends and changing customer preferences in a timely and effective manner, or if we fail to maintain our reputation or increase the market for our products, the demand for our products may decline.*

In order to remain competitive, we are required to review the performance of our existing products and the manufacturing process and take necessary actions to improve functionality and/or efficiency and also identify new applications for our existing products and new potential products, in compliance with applicable regulatory standards. To accomplish this, we commit substantial effort, funds and other resources towards our PPD Division. Our ongoing investments towards product and process development could result in higher costs without a corresponding increase in revenues. However, we cannot assure you that the product and process development initiatives taken by our Company would succeed or result in an improvement in either our existing products or manufacturing process which may affect our ability to compete with our competitors and have an adverse effect on our operations. Further, our

product and process development initiatives with respect to developing new uses for existing products or new products may not result in the development of cost-effective or economically viable solutions, thereby affecting our operations, growth and prospects.

Our business is highly dependent on our ability to compete in the industry with the help of our PPD Division by devising innovative applications of our products. If we are unable to gauge the changing technology and demand in the industry and are unable to upgrade our product portfolio in line with the same it may have an adverse effect on our business operations. Our products have varied applications and are majorly used in home furnishing, home decor, departmental stores, discount retailers, hypermarkets, hardware and home improvement, office supplies stores, agricultural and medical industry and international importers and wholesale distributors. Since our products form a key raw material for manufacturing the end us products of our customers, we are expected to be apprised of the changing technologies and regulatory requirements. Therefore, results of our operations are dependent on our ability to anticipate, gauge and respond to such changes and devise new products or modify our existing products in lines with the changes in market trends as well as customer demands and preferences. If we are unable to respond to the technological advancements or in the event our PPD Division is unable to upgrade our products periodically as per the prevalent market trends, or if we are unable to adapt to such changes by launching new products as per the demand, we may significantly lose our market position and existing customer base which may adversely affect our results of operations and financial condition.

Maintaining and enhancing our reputation is critical to our business and the competitiveness of our products. Many factors, some of which are beyond our control, are important for maintaining and enhancing our brand reputation and competitiveness of our products, including maintaining or improving customer satisfaction and increasing the popularity of our products. In particular, we launch new products, and if any of those products do not meet standards for quality the international and domestic quality standards or efficiently contribute to the end use products of our customers, our market standing, reputation and the sales of our products may have an adverse impact. If we fail to maintain our reputation, or increase the market for our products, or the quality of our products declines, our business and prospects may be adversely affected.

9. *Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.*

Our manufacturing unit is located in Gujarat. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our manufacturing unit is subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiraling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

In addition to the above if our manufacturing unit suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

10. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.*

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal and international quality standards. We are engaged in export operations as well and have to fulfill the quality conditions and processes prescribed by the international regulatory authorities. We have a separate Quality Division which carries out necessary tests and procedures on raw materials and finished products manufactured in our manufacturing unit. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various international and domestic agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage

our products and result in deficient products. It is imperative for us to meet the international quality standards set by our international customers and agencies as deviation from the same could cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our domestic and international customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we may not experience any material product liability losses in the future or that we may not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

- 11. We highly depend on our key raw materials and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

Our Company is engaged in the business of manufacturing specialized plastic products for the home improvement and home furnishing industry for renowned modern multi-national retailers. We mainly use following raw materials 1. Low Density Poly Ethylene (LDPE), 2. Poly Propylene (PP), 3. Ethylene Vinyl Acetate (EVA), 4. High Density Poly Ethylene (HDPE), 5. Thermo Plastic Elastomer (TPE), 6. Thermoplastic Poly Olefin (TPO), which we procure domestically and also import from countries such as, China, Taiwan or Middle East. Therefore, we are highly dependent on these raw materials and they form an important and primary components of our manufacturing process. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of raw materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the packaging industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Further, we also cannot assure you with a reasonable certainty that the raw materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective raw materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers consequently increasing the manufacturing costs and/or reducing the realization of our finished products. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

- 12. In the event our marketing initiatives do not yield intended results our business and results of operations may be adversely affected.***

We believe that the recognition and reputation of the quality of our products has contributed to the growth of our business. We intend to continue to enhance the outreach of our integrated business model and the quality of our products through the use of targeted marketing and public relations initiatives. In order to maintain and enhance such

recognition and reputation, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new products or applications we launch or for geographic markets where we intend to expand our operations. We incur advertising and marketing expenses to increase brand recall and capture additional demand, and in the event they do not yield their intended results, or we are required to incur additional expenditures than anticipated, our business and results of operations might be adversely affected.

13. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. For the Fiscals 2023, 2022 and 2021, our trade receivables were ₹ 1,690.15 lacs, ₹ 1,440.44 lacs and ₹ 1,424.03 lacs, respectively, out of which, debts amounting to ₹ 11.87 lacs, ₹28.96 lacs and ₹ 51.61 lacs were outstanding for a period exceeding six months.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

14. *Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.*

Our Company intends to utilize a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled "*Objects of the Offer*" on page 73 of this Prospectus. However, the repayment of the loans identified by us are subject to various factors including, pre-payment penalty etc. While we believe that utilization of Net Proceeds for repayment of secured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre- payment of loans will not result in the creation of any tangible assets for our Company.

15. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.*

Our Company is involved in various business transactions with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. Similarly, due to our sacrosanct reliance on our primary raw material being polymer we are exposed to a risk of increase in costs of raw materials due to the currency fluctuations. Further, our international operations (export sales) make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

16. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could adversely affect our business, results of operations and financial condition.*

We have experienced considerable growth over the past three years and we have expanded our operations and product portfolio. Our total revenue grew at a CAGR of 11.56% between Fiscals 2021 and 2023, We cannot assure you that our growth strategies will continue to be successful or that we will be able to continue to expand further, or at the same rate.

Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders, could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates and price of equipment and raw materials. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our

customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

17. *There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC. Further, there have also been instances where our Company has inadvertently failed to file certain statutory filing with the RoC.*

In the past, there have been certain instances of delays in filing statutory forms as per the reporting requirements under the Companies Act, 1956 or the Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC. Further, we cannot trace Form 20B for the FY 2005 which was filed by our Company and therefore, we cannot assure you that the said form was filed by us or that the form was filed in the correct manner with the RoC. While, no actions have been taken against us by any regulatory authorities, in this regard, as of date of this Prospectus, however we cannot assure that any actions will not be taken against us in the future. For further details, please see “*Outstanding Litigation and Material Developments*” on page 202.

No show cause notice in respect to the above has been received by our Company till date and except as stated in this Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

18. *Our operations can be adversely affected in case of industrial accidents at our manufacturing unit. Further, any fire or mishap or accidents of such nature at the Company's facilities could lead to accident claims and damage and loss of property, inventory, raw materials, etc.*

Our manufacturing process requires the use of heavy machines, which makes the labour employed at our manufacturing unit prone to accidents that occur during the course of our operations resulting in personal injuries causing permanent disability or even death. Although, we have availed workmen's compensation and occupation disease policy, we cannot assure you that we will be able to receive a claim from these policies, failing which we will have to provide the compensation to the employees from our own resources. Our Company has adopted adequate safety measures; however we cannot assure you that, in the future no such cases will be instituted against our Company, alleging that we were negligent or we did not provide adequate supervision therefore, holding us liable for injuries that were suffered during the manufacture of our products. In the event any such accidents take place in the manufacturing unit of our Company, we may get involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations.

19. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks are required to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Furthermore, the objects of the Issue include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the offer*” on page 73. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our

clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 20. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected. In the event, any actions of our Company qualifies as a breach of any of the clauses of this deed, it could have a material impact on our goodwill, business operations, financial condition and results of operations.**

Our Company has created a brand presence with our major brands such as ‘Draperi’, ‘Runner’ and ‘Paperi’, etc. Our Company’s success largely depends on our brand name and brand image, therefore we have trademarked our brand names and their logos differentiating our Company’s products from that of our competitors. We deal under other brand names as well, which have also been trademarked by us to maintain a distinction and differentiation for our products and brands. Our current name and logo have been registered under the Trademarks Act, 1999. The details of the trademarks can be seen in the chapters titled, “Our Business- ‘Intellectual Property Rights’ ” and “Government and other Statutory Approvals- ‘Intellectual Property Related Approvals’ ” on pages 94 and 208 of this Prospectus.

We believe that there may be other companies or vendors which operate in the unorganized segment using our trade name or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition. We may need to litigate third parties in order to prevent them from misusing our trademarks or brand names and any such litigation could be time consuming and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapter titled “Government and other Statutory Approvals” on pages 208 of this Prospectus.

- 21. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.**

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. For further details, please see the section titled “Objects of the Issue” beginning on page 73 of this Prospectus.

- 22. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.**

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lacs)

| Particulars | For the period ended | | |
|---------------------------------------|-----------------------------|------------------------------|------------------------------|
| | 31 st March 2023 | 31 st March, 2022 | 31 st March, 2021 |
| Net Cash from Operating Activities | 2,527.20 | (690.18) | 852.25 |
| Net Cash from Investing Activities | (309.03) | (268.05) | (1,589.56) |
| Net Cash used in Financing Activities | (2,187.13) | 757.37 | 797.49 |

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 23. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully**

implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorized access to our networks.

Our future success depends on our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

24. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically as well as internationally to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the home improvement and home furnishing industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

25. *We do not own certain premises used by our Company. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business.*

As on the date of this Prospectus, our warehouse has been taken on lease by our Company from related parties and third parties. For details, please refer to the chapter titled "Our Business- Land and Property" on page 94 of this Prospectus.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws. We cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can also be no assurance that our Company will be able to renew the lease agreements or deeds entered into with third parties in a timely manner or at all. Further, there can be no assurance that we will not face any disruption of our rights as a lessee/ licensee and that such leave and license and lease agreements will not be terminated prematurely by the licensor/lessor. Any such non-renewal or early termination or any disruption of our rights as lessee / licensee will adversely affect our business operations.

26. *Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company's operations.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our manufacturing unit, some of which have been granted for a fixed period of time and need to be renewed from time to time. As of date of this Prospectus, there are no pending proceedings, which have been initiated against us by the statutory authorities. We cannot assure you that in the near future there will not be any legal actions taken against us for the same. Further, these licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may adversely affect our business. For further details on the licenses obtained by our Company, please refer to the chapter titled — "Government and Other Statutory Approvals" on page 208 of this Prospectus.

27. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our finished products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.*

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit or warehouse and transportation of our finished products from our unit or warehouse to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our finished products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for any of our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

28. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

29. *We have significant power and water requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power and water supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing unit has significant electricity and water requirements and any interruption in the supply of water or power may temporarily disrupt our operations. We also maintain diesel generator set at our manufacturing unit, as a precaution against any disruption in power supply. Since, we have a high power consumption, any unexpected or

unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. Water is one of the main components of our manufacturing unit, therefore continuous water supply is essential for smooth business operations of our Company. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “*Our Business- Utilities*” on page 94 of this Prospectus.

30. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The home improvement and home furnishing industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors (local as well as international). We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, design, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competition may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are and may have greater resources, market presence, geographic reach and the ability to products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “*Industry Overview*” on page 88 of this Prospectus.

31. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors, Senior Management and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Pallav Kishorbhai Doshi and Karishma Rajesh Doshi are the Whole-time Director and Executive Director of our Company, respectively, and therefore may be deemed to be interested in any remuneration which may be payable to them in such capacity. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraph titled — “*Land and Property*” in the chapter titled — “*Our Business*”, the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information- Annexure : Significant Accounting Policies and Explanatory Notes to the Restated Financial Statements- Note - Related Party Disclosures*” on pages 94, 129, 142, 188 and 150, respectively of this Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

32. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 70.05% of

the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

33. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

34. *We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.*

As of March 31, 2023, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Restated Financial Information aggregated to ₹ 216.84 lacs. The details of our contingent liabilities are as follows:

| Particulars | Amount |
|---|---------------|
| Appeal against Income tax demand for AY 2014-15 | 104.43 |
| Appeal against Income tax demand for AY 2015-16 | 112.40 |
| Total | 216.84 |

For further details of contingent liability, see the section titled — “Financial Information” on page 150 of this Prospectus. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

35. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “Restated Financial Information- Annexure – 150: Significant Accounting Policies and Explanatory Notes to the Restated Financial Statements-Related Party Disclosures” at page 150.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws. We cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationship with them in the future.

36. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “Financial Indebtedness” on page 150 of this Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net

worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company's financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

37. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/or additional indebtedness.*

As on March 31, 2023 our Company's total fund based indebtedness is ₹ 657.40 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, and levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “Financial Indebtedness” on page 188 of this Prospectus.

38. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company's future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “Our Management” on page 129 of this Prospectus.

39. *Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.*

Our Company is engaged in the business of manufacturing specialized plastic products. We use materials such as polyethylene polypropylene, polyethylene vinyl acetate, acrylonitrile butadiene styrene, etc. as the key and primary raw material in our manufacturing process. Due to the use of plastic based raw materials, our manufacturing activities are subject to *inter alia* laws, regulations, policies issued under the Environment Protection Act, 1986. These include laws and regulations relating to reusing and recycling of plastic wastes, obligation to collect back the plastic wastes within a stipulated period of time, formulating a mechanism for plastic waste disposal, etc. For further details please refer to the chapter titled “Key Industry Regulations and Policies” on page 117 of this Prospectus.

There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. There can be instances in the future, where our Company may be forced to halt our business operations in our manufacturing unit on receiving adverse orders from state pollution control boards. We cannot assure you that there will not be any instances in the future wherein our Company will not be forced to halt the operations in its manufacturing unit due to not complying with the applicable laws and such events will not cause loss of revenue and have an adverse impact on our business operations.

India has stringent labour legislations which protect the interest of workers, including legislation that sets forth

detailed procedures for the establishment of unions, dispute resolution, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory and statutory records and making periodic payments, minimum wages and maximum working hours, overtime, working conditions, etc.

Our Company is also subject to safety, health and environment laws and regulations such as the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981. These laws and regulations impose controls on our Company's safety standards, and other aspects of its operations. Our Company has incurred and expects to continue to incur, operating costs to comply with such laws and regulations. In addition, our Company has made and expects to continue to make capital expenditures on an on-going basis to comply with the safety and health laws and regulations. Our Company may be liable to the Central and State governmental bodies with respect to its failures to comply with applicable laws and regulations. Further, the adoption of new safety and health laws and regulations, new interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that our Company make additional capital expenditures or incur additional operating expenses in order to maintain its current operations or take other actions that could adversely affect its financial condition, results of operations and cash flow. Safety, health and environmental laws and regulations in India and all around the world, in particular, have been increasing in stringency and it is possible that they will become significantly more stringent in the future. The costs of complying with these requirements could be significant and may have an impact on our financial condition. Therefore, if there is any failure by us to comply with the terms of the laws and regulations governing our operations we may be involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations.

40. *Our Promoter and Executive Director have extended personal guarantees with respect to loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoter, Pallav Kishorbhai Doshi and our Executive Director, Kruti Rajeshbhai Doshi have extended personal guarantees in favour of certain banks with respect to the loan facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled — “*Financial Indebtedness*” on page 188 of this Prospectus.

41. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain insurance cover against loss or damage by vehicles package policy, two wheeler vehicle policy, standard fire & special perils policy, burglary standard policy, Bharat Sookshma Udyam Suraksha Policy, Bharat Laghu Udyam Suraksha Policy, commercial general liability policy, workmen's compensation and occupation disease policy. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. For instance, we have not been able to claim the benefit of a standard fire and special perils policy which was availed from New India Insurance Company Limited. For details, please see “*Outstanding Litigation and Material Developments*” on page 202 of the Prospectus. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

42. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Although our Company has declared dividends in the past, however there can be no assurance that our Company will declare dividends in the

future also. For further details, please refer to the chapter titled “*Dividend Policy*” and the chapter titled “*Financial Indebtedness*” on pages 149 and 188 respectively, of this Prospectus.

43. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

44. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lacs, under Regulation 262 of the SEBI ICDR Regulations it is not required to appoint a credit rating agency registered with the SEBI by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of the issuer and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the offer*” on page 73 of this Prospectus.

45. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

46. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding our working capital requirements and repayment of loans, primarily, as detailed in the chapter titled “*Objects of the offer*” beginning on page 73 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

47. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the

continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

48. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on EMERGE Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of National Stock Exchange of India Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

49. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

50. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

51. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Issue within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

52. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

53. *We will not receive any proceeds from the Offer. The Selling Shareholder will receive the entire proceeds from the Offer.*

The Selling Shareholders will receive the proceeds from the Offer for Sale. The Offer consists of a Fresh Issue and an Offer for Sale. The Selling Shareholders shall be entitled to the proceeds from the Offer for Sale (net of its portion

of the Offer-related expenses) and our Company will not receive any proceeds from the Offer for Sale. None of our Directors or Key Managerial Personnel or Senior Management will receive, in whole or in part, any proceeds from the Offer.

EXTERNAL RISK FACTORS

54. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavourable changes in, or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business. Please see “*Key Regulations and Policies*” on page 117.

The regulatory and policy environment in which we operate is evolving and subject to change. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements, conditions, costs and expenditures on our operations. Any changes in international treaties or export technological restrictions in other countries and the related uncertainties with respect to the implementation of the any such regulations may have a material adverse effect on our business, financial condition, results of operations and cashflows. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations and cash flows. Any changes to such laws may adversely affect our business, financial condition, results of operations, cash flows and prospects.

For instance, due to the COVID- 19 pandemic, the Government of India also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Further, the Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). We have not fully determined the impact of these recent and proposed laws and regulations on our business. We cannot predict whether the promulgation or any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings, or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

55. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our business customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;
- prevailing national, regional or global economic conditions, including in India’s principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

56. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

57. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

58. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

59. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

60. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

61. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

| Bid Quantity | Bid Amount (₹) | Cumulative Quantity | Subscription |
|--------------|----------------|---------------------|--------------|
| 500 | 24 | 500 | 16.67% |
| 1,000 | 23 | 1,500 | 50.00% |
| 1,500 | 22 | 3,000 | 100.00% |
| 2,000 | 21 | 5,000 | 166.67% |
| 2,500 | 20 | 7,500 | 250.00% |

The fund requirements, deployment of funds and the intended use of the Net Proceeds as described in this Prospectus are based on our current business plan, management estimates, prevailing market conditions and other commercial considerations. However, such fund requirements and deployment of funds have not been appraised by any external agency or any bank or financial institution or any other independent agency. We may have to revise our funding requirements and deployment on account of a variety of factors such as our financial and market condition, our business and growth strategies, competitive landscape, general factors affecting our results of operations, financial condition and access to capital and other external factors such as changes in the business environment or regulatory climate and interest or exchange rate fluctuations, which may not be within the control of our management. The following table provides the details of ECLGS availed by our Company, as at March 31, 2023 we propose

For further details in relation to our borrowings, please see “*Financial Indebtedness*” on page 188.

The selection of borrowings proposed to be prepaid or repaid out of the borrowings provided in the table above, shall be based on various factors including (i) any condition (including prepayment related conditions) attached to the borrowings restricting our ability to prepay the borrowings; (ii) other commercial considerations including, among others, the interest rate on the loans and/or facilities, the amount of the loan outstanding and the remaining tenor of the loan; (iii) receipt of consents for prepayment from the respective lenders and terms and conditions of such consents and waivers and (iv) levy of any prepayment penalties/premium and the quantum thereof and other related costs; and (vii) nature and/or repayment schedule of borrowings. Payment of additional interest, prepayment penalty or premium, if any, and other related costs shall be made by us out of the internal accruals or out of the Net Proceeds as may be decided by our Company.

Given the nature of the above-mentioned borrowings and the terms of repayment, the aggregate outstanding borrowing amounts which we propose to repay may vary from time to time.

In addition to the above, we may, from time to time, enter into further financing arrangements and draw down funds thereunder. In such cases or in case any of the above loans are prepaid, repaid, redeemed (earlier or scheduled), refinanced or further drawn down prior to the completion of the Offer, we may utilize Net Proceeds towards prepayment and/or repayment of such additional indebtedness availed by us, details of which shall be provided in this Prospectus.

Key assumptions for working capital requirements

Our Company's estimated working capital requirements on a standalone basis are based on the following key assumptions:

| S. No. | Particulars | Assumptions |
|----------------------------|--------------------|---|
| Current Assets | | |
| 1 | Trade Receivables | The historical holding days of Trade Receivables has been in the range of 42 to 48 days in the last three financial years, with average Trade Receivables days of 45 days in the last three financial years. As per the current credit terms of the Company and prevalent trend in the business of the Company, the holding level for receivables anticipated at 45 days of total gross sales during FY2023-24. |
| 2 | Inventories | The historical holding days of inventories has been in the range of 48 to 96 days in the last three financial years, and in the range of 75 to 96 days in the last two financial years. Our Company estimates inventory holding days at around 93 days in FY 2023-24. This seems to be reasonable in view of the lead time of procurement of raw materials, process cycle time and lifting time taken by the customers. Also, it seems to be reasonable considering the nature and volume of business activity of the Company.. |
| Current Liabilities | | |
| 1 | Trade Payables | We intend to decrease the credit period expected from our Creditors due to fulfillment of our working capital requirements through our proposed initial public issue. This will help us in better negotiations and maintaining sound business relations with our creditors. |

Note: Pursuant to the certificate dated June 10, 2023, issued by the Statutory Auditor.

INDUSTRY OVERVIEW

THE GLOBAL ECONOMY

Insights into advanced economies and emerging markets & developing economies

According to estimates published by the Organization for Economic Co-operation and Development (OECD), in the first two decades of the 21st century, emerging markets have witnessed rapid economic development, although at different speeds across different regions. While the economic growth in the OECD member countries has consistently been below the world average, emerging Asian countries have systematically outperformed the economies of other regions.

IMF forecasts GDP growth of 7.2% for 2023 for India; with all other major economies being forecast to have a growth rate below 6% for the same period. IMF's forecast for India's GDP growth rate for 2022 and 2023 is higher than for countries such as the USA, China, the UK, Germany, and Japan which have large economies.

Global Trade has also been suffering huge losses since the outbreak of COVID-19. WTO estimates suggest that global trade could witness a decrease between 13% to 32% depending on the depth and extent of the global economic downturn. The estimates further suggest that nearly all regions, globally, will suffer a double-digit decrease in trade volumes is projected to exceed the drop in global trade during the height of the 2008-2009 financial crisis. Trade is likely to fall steeper in sectors with complex value chains, such as electronics and automotive products.

INDIAN ECONOMY

The Indian economy was impacted by the global pandemic caused by COVID-19 and still recovering from the impact of this virus. Economic growth hindered in the last year and businesses is still trying to recover from the downfall caused due to the pandemic in 2020. The real Gross Domestic Product (GDP) growth is projected to be constrained by slower in 2023-24 as compared to strong growth in December 2022.

The World Bank has revised its FY23/24 GDP forecast to 6.3 percent from 6.6 percent (December 2022). Growth is expected to be constrained by slower consumption growth and challenging external conditions. Rising

borrowing costs and slower income growth will weigh on private consumption growth, and government consumption is projected to grow at a slower pace due to the withdrawal of pandemic-related fiscal support measures.

“The Indian economy continues to show strong resilience to external shocks,” said Auguste Tano Kouame, World Bank’s Country Director in India. “Notwithstanding external pressures, India’s service exports have continued to increase, and the current-account deficit is narrowing.”

Src: World Bank.org

The report forecasts that the Indian economy will grow at a slightly lower rate of 6.3 percent in the 2023-24 fiscal year. A challenging external environment will affect India’s economic outlook through different channels. The report states that rapid monetary policy tightening in advanced economies has already resulted in large portfolio outflows and depreciation of the Indian Rupee while high global commodity prices have led to a widening of the current account deficit.

India’s external position has also improved considerably over the past decade. The current-account deficit is adequately financed by improving foreign direct investment inflows and a solid cushion of foreign exchange reserves (India has one of the largest holdings of international reserves in the world).

Policy reforms and prudent regulatory measures have also played a key role in developing resilience in the economy. Increased reliance on market borrowings has improved the transparency and credibility of fiscal policy and the government has diversified the investor base for government securities. The introduction of a formal inflation-targeting framework during the past decade was an important step in lending credibility to monetary policy decisions. While there are still some challenges in the financial sector, the adoption of several regulatory and policy measures- including the introduction of a new Insolvency and Bankruptcy Code and the creation of the new National Reconstruction Company Limited-facilitated an improvement in the financial sector metrics over the past five years; these policy interventions are also expected to help alleviate pressures related to non-performing loans.

INDIAN MANUFACTURING SECTOR

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

Manufacturing has emerged as one of the high-growth sectors in India. Prime Minister of India, Mr. Narendra Modi, launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. The government aims to create 100 million new jobs in the sector by 2022.

India's gross domestic product (GDP) at current prices stood at Rs. 36.85 lakh crore in the first quarter of FY23, as per the provisional estimates of gross domestic product for the first quarter of 2023-24. The manufacturing GVA at current prices was estimated at US\$ 77.47 billion in the third quarter of FY22 and has contributed around 16.3% to the nominal GVA of during the past ten years. India has the potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy.

As per the economic survey reports, the estimated employment in the manufacturing sector in India was 5.7 crore in 2017-18 and, 6.12 crore in 2018-19 which further increased to 6.24 crore in 2019-20. India's display panel market is estimated to grow from ~US\$ 7 billion in 2021 to US\$ 15 billion in 2025. As per the survey conducted by the Federation of Indian Chambers of Commerce and Industry (FICCI), capacity utilization in India's manufacturing sector stood at 72.0% in the second quarter of FY22, indicating a significant recovery in the sector.

One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH Advanced Manufacturing and Rapid Transformation Hubs. This is expected to increase the competitiveness of the manufacturing sector in the capital goods market. With an impetus on developing industrial corridors and smart cities, the Government aims to ensure the holistic development of the nation. The corridors would further assist in integrating, monitoring, and developing a conducive environment for industrial development and will promote advanced practices in manufacturing.

INDIAN PLASTIC INDUSTRY

The Indian plastics industry offers excellent potential in terms of capacity, infrastructure, and skilled manpower. It is supported by many polymer producers, plastic process machinery, and mould manufacturers in the country. Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene, and PVC, are manufactured domestically.

The Indian plastics industry produces and exports a wide range of products like plastic-moulded extruded goods, packaging, consumer goods, electrical accessories, moulded or soft luggage items, etc.

The PP demand in India grew at a CAGR of around 8.51% during 2015-2019 and is expected to achieve a healthy growth rate in 2022-2030. The Government is taking steps to make the plastic business an Rs.10 Lakhs crore industry in the next five years. India is a growing market of the plastic industry and by the end of 2030, its use in the country will be 30 million tonnes. 95% plastic producing units in the country are in the MSME sector and the Government is providing assistance to them through different initiatives. There are 3,500 modernized plastic recycling units in the country along with 4,000 unorganized recycling plants. The plastic industry is playing a significant role in the 'Make in India' initiative.

DECORATIVE PLASTIC INDUSTRY

Decorative Plastic has been gaining prominence across both developed and developing markets with increasing urbanization and globalization trends. The global decorative plastic market reached a value of US\$ 641.4 Billion in 2020 and is estimated to reach \$838.6 Billion by 2027. Decorative Plastic is an effective way of portraying the lifestyle that a consumer believes in. Decorative Plastic products are used in the decoration of an apartment or a house with various accessories and furnishings to provide a more aesthetic and pleasant appeal to the building. Items in Decorative plastic include household furniture, lamps, textiles, floor coverings, pots, candles, artifacts, furnishing items, etc. The Global Online Decorative Plastic is expected to grow by US\$ 52.95 Billion during 2021-2025 progressing at a CAGR of 9% during the forecast period.

This has prompted manufacturers to ensure that all products sold offline are available online also. Thus, the

growing e-commerce sector will boost the demand for online home furniture in the region during the forecast period.

People have started taking their home as a reflection of themselves and so, a lot of people are now spending more on both furniture and fixtures and also on home décor. Working women are spending a lot on home fashion.

Disposable income, better education, and also the growing trend of individuals opting for professional services to do their interiors have together led to a rise in this category.

It is true that the frequency of buying products in the category has increased over the last decade but the category still remains one among low consumption categories. It is not just because of low consumption appetite but also due to scarcity of players in the segment on one hand and low penetration of existing modern players in smaller cities on the other hand.

Over the recent past, major key manufacturers of decorative plastic have been focusing on enhancing their product offerings with an aim to capture a wider customer base in developed countries such as the USA, Germany, the U.K, France and Italy among others. For the same, companies are establishing new manufacturing techniques and innovating new textures. This increase in product portfolio is expected to create opportunities for the growth of the decorative plastic market during the forecast period.

Case Studies

The following case studies are examples of how our customers have benefited from our innovative products and processes:

Complete integration in the bath area product category.

Due to the onset of COVID-19 pandemic we, like the rest of the world faced supply constraints with respect to accessories that we used to import for manufacturing shower curtains. Our PPD Division developed an entire process to manufacture the raw materials, namely 4-inch, 6-inch, 8-inch hangers made from 100% recycled content, plastic and metal roller hooks along with PET trays to package them, S-shaped Hooks, and O-rings, in our manufacturing unit. Therefore, our Company in its bath area product category independently manufactured the entire ecosystem, which includes the raw material we previously used to import, to manufacture shower curtains. The aforementioned initiatives of our PPD Division made us independent and also integrated our manufacturing systems to provide end-to-end solutions to our customers, without compromising on the turnaround time. We are constantly working on developing our manufacturing systems in order to minimize our dependence on foreign components and independently and in a cost effective manner cater our customer's needs.

Developed an automated assembly process to manufacture products with recycled plastic and minimum labour

Client request for customisation: Product needs to be made from recycled plastics minimum 25% and up to 50% by 2025 and assembly should be done with minimum workers so that cost of product can be sustained for a longer period of time

Product / Process Development: Our PPD Division developed a fully automatic robotic assembly system within 6 months by deploying the following components: a) four six-axis robotic arms; b) two Vision motion camera; c) one integrated line with three vibrio feeders and d) two de-stacking units. We also manufactured the product using the post-consumer recycled plastic, as per the specification of our customer.

Post deploying the aforementioned process, we started the first delivery of the product within 20 weeks from business confirmation with 25% recycled material.

Developed a product development process to make a product Toxic Volatile Organic Compound ("TVOC") compliant

Our PPD Division and our Quality Division enabled us to develop a process of Manufacturing specialised plastic products in the footwear industry using the compression moulding process, which ensured that the final product was complaint with TVOC testing and analysis. TVOC is manufactured in various industries and it is an ilk of slow poison not just for humans and animals but for the environment and ecology too. In order to detect TVOC systematic tests such as, gas chromatography–mass spectrometry for quantitative analysis of TVOCs are conducted on the products by our clients and regulatory bodies.

We developed an innovative and unique process for one of our clients to manufacture TVOC complaint products in the manner provided below:

Processing technique: Foaming plus Compression moulding

Requirement: To make product TVOC (Toxic Volatile Organic Compound) compliant

Reason: Existing supplier's product failed in random product testing from store

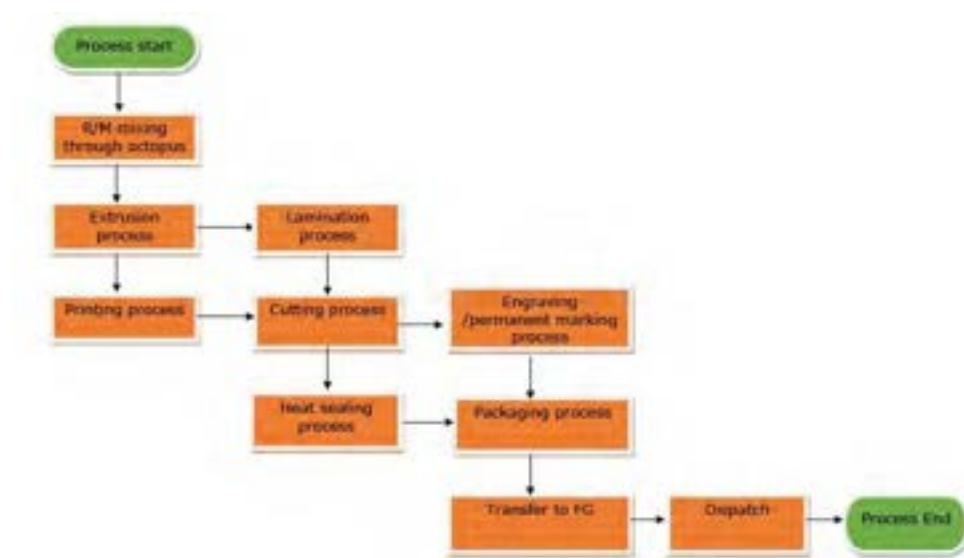

Process improvement required: Compression moulding process is widely used in footwear industry and done in a rudimentary manner by heating sheets in oven for sixty seconds and then compressing in a separate machine for thirty six seconds for 1 pc.

Product / Process Development: Despite new to this production technology, we assembled the most qualified team of chemists and made the product TVOC compliant through multiple trials and many different materials. We broke down the process and requirements into fragments and with help of our Group Company, Rajoo Engineers Limited ("REL") conceptualized a hybrid process, namely, thermoforming cum compression- moulding. Within period of 92 days REL delivered the customized machine which produced two pieces every nine seconds.

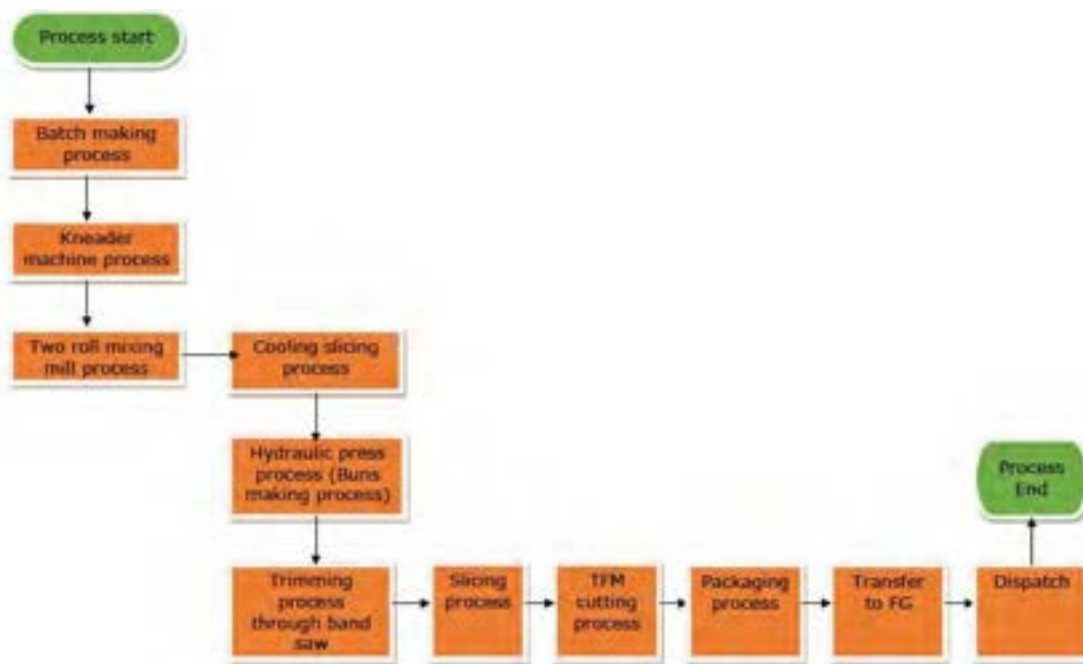

Benefit: Increased capacity and saved cost of 36 workers and built a better process while ensuring quality control.

Legal Metrology Act, 2009

The Legal Metrology Act, 2009 (“**Act**”), received the assent of the President of India on January 13, 2010. The Act governs the standards/units/denominations used for weights and measures as well as for goods which are sold or distributed by weights, measures or numbers. It also states that any transaction/contract relating to goods/class of goods shall be as per the weights/measurements/numbers prescribed under the Act. Every unit of weight or measure shall be in accordance with the metric system based on the international system of units. Using or keeping any weight or measure otherwise than in accordance with the provisions of the said Act is an offence, as is considered as tampering or altering any reference standard, secondary standard or working standard. Moreover, the Act prohibits any person from quoting any price, issuing any price list, cash memo or other document, in relation to goods or things, otherwise than in accordance with the provisions of this Act. The administration of the Act and regulation of pre-packaging of commodities is done with the help of Legal Metrology (Packaged Commodities) Rules, 2011, (the “**Rules**”) which require every manufacturer, packer and importer who pre-packs or imports any commodity for sale, distribution or delivery to get himself registered under these Rules. Additionally, the Rules also bar anyone from pre-packing or causing or permitting pre-packaging any commodity for sale, distribution or delivery unless a declaration in respect to such pre-packaging has been made on the package in accordance with these Rules.

Legal Metrology (Packaged Commodities) Rules, 2011

The Central Government in accordance with the powers conferred upon it under the Legal Metrology Act, 2009, has promulgated the Legal Metrology (Packaged Commodities) Rules, 2011 to prescribe the declaration and disclosure of standard quantities or number and the manner of making declarations on pre-packaged goods. Chapter II of the Rules prescribes the packaging and labelling standards for packages intended for retail sale, Chapter III deals with packaging of wholesale products and Chapter IV provides exemption from strict compliance of the rules. Retail sale has been specifically defined under the Rules and given a very wide ambit whereby it has been held to mean sale distribution or delivery through retail sale shops, agencies or any other mode of business to any individual or a group of individuals. Rule 4 of the said Rules mandates the manufacturer to affix a label or print a disclosure confirming that the declarations required under these Rules have been made on the package. Without the said disclosure, the Rules prohibit packing of a product which falls under the ambit of the Rules. The Rules provide the declarations which have to be given by the manufacturer on a product along with the manner and style of making such declarations. Rule 6 of the Rules, lists out the declarations which are to be made by a manufacturer which are inter alia, name of the manufacturer, country of origin, generic name of the product, net quantity, in terms of the standard unit of weight or measure of the commodity contained in the package or where

the commodity is packed or sold by number, the number of the commodity contained in the package; month or year of manufacture or import, date of expiry along with a disclaimer that the commodity shall be unfit for human consumption post such date of expiry, etc. The other rules prescribed under Chapter II detail the manner and style of making the above declarations with respect to manufacturer, quantity, weight, dimensions, etc. In accordance with Section 15 of the Legal Metrology Act, 2009, the Director, Controller or any Legal Metrology Officer has been empowered to inspect the packages at the premises of the manufacturer or at the premises of the packer to ensure compliance with the requirements of the Rules. The Rules also empower such officer to seize the packages drawn by him as samples and take adequate steps for the safe custody of the seized packages until they are produced in the appropriate court as evidence and based on the evidence initiate action for violations as per the provisions of the Act and these Rules.

The Bureau of Indian Standards Act, 2016

The Bureau of Indian Standards Act, 2016 (the “**BIS Act**”) provides for the establishment of the Bureau of Indian Standards (“**BIS**”) for the development of the activities, *inter alia*, standardization, marking and quality certification of goods. The Bureau of India Standards Rules, 2018 (the “**Bureau of Indian Standards Rules**”) have been notified, in supersession of the Bureau of Indian Standards Rules, 1987, in so far as they relate to Chapter IV A of the said rules relating to registration of the articles notified by the Central Government, and in supersession of the Bureau of Indian Standards Rules, 2017 except in relation to things done or omitted to be done before such supersession.

Under the Bureau of Indian Standards Rules, the bureau is required to establish Indian standards in relation to any goods, article, process, system or service and shall reaffirm, amend, revise or withdraw Indian standards so established as may be necessary.

Consumer Protection Act, 2019

The Consumer Protection Act, 2019 (“**COPRA**”) will repeal the existing Consumer Protection Act, 1986, and shall come into force on such date as the Central Government may, by notification, appoint. The Consumer Protection Act, 1986 provides a mechanism for the consumer to file a complaint against a service provider in cases of unfair trade practices, restrictive trade practices, deficiency in services, price charged being unlawful and food served being hazardous to life. It also places product liability on a manufacturer or product service provider or product seller, to compensate for injury or damage caused by defective product or deficiency in services. It provides for a three tier consumer grievance redressal mechanism at the national, state and district levels. Non-compliance of the orders of the redressal commissions attracts criminal penalties. The COPRA will, inter alia, introduce a Central Consumer Protection Council to promote, protect and enforce the rights of consumers executive agency to provide relief to a class of consumers. The COPRA will bring e-commerce entities and their customers under its purview including providers of technologies or processes for advertising or selling, online market place or online auction sites. The COPRA will also provide for mediation cells for early settlement of the disputes between the parties.

A. Environment Laws

We are subject to various environment regulations as the operation of our establishments might have an impact on the environment in which they are situated. The basic purpose of the statutes given below is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (“**PCBs**”), which are vested with diverse powers to deal with water and air pollution, have been set up in each state and in the Centre. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries, and undertaking inspection to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure, and investigation. All industries are required to obtain consent orders from the PCBs, which are required to be periodically renewed.

Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the Act, including the power to direct the closure, prohibition or regulation of any industry, operation or process. Some sector policies such as the National Agriculture Policy, 2018; National Population Policy, 2000; and National Water Policy, 2012 have also contributed towards environmental management. All these policies have recognized the need for sustainable development in their specific contexts and formulated necessary strategies to give effect to such recognition. The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. It does not displace, but builds on the earlier policies.

The Objectives of the Policy are as follows:

- Conservation of critical environmental resources
- Intra-generational equity: Livelihood security for the poor
- Inter-generational equity
- Integration of environmental concerns in economic and social development
- Efficiency in environmental resource use
- Environmental governance
- Enhancement of resources for environmental conservation

The Policy evolved from the recognition that only such development is sustainable, which respects ecological constraints and the imperatives of justice. The objectives stated above are to be realized through various strategic interventions by different public authorities at Central, State and Local government levels. They would also be the basis of diverse partnerships. The principles followed in the Policy are:

- Human beings are the center of sustainable development concerns
- Right to development must be fulfilled so as to equitably meet developmental and environmental needs of present and future generations.

- In order to achieve sustainable development environmental protection shall constitute an integral part of the development process and cannot be considered in isolation from it.
- Where there are credible threats of serious or irreversible damage to key environmental resources, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation.
- In various public actions for environmental conservation, economic efficiency would be sought to be realized.

b Use of estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, provision for income taxes, the useful lives of depreciable Property, Plant and Equipments and provision for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

c Property, Plant and Equipment

Property, Plant and Equipments are stated at cost, less accumulated depreciation / amortisation. Costs include all expenses incurred to bring the asset to its present location and condition.

d Depreciation / amortisation

In respect of Property, Plant and Equipments (other than freehold land and capital work-in-progress) acquired during the year, depreciation/amortisation is charged on a straight line basis so as to write-off the cost of the assets over the useful lives.

| Type of Assets | Period |
|--------------------------------------|----------|
| Buildings | 30 Years |
| Plant and Equipment | 15 Years |
| Solar Power Plant | 15 Years |
| Electric Installation and Equipments | 10 Years |
| Furniture and Fixtures | 10 Years |
| Laboratory Equipments | 10 Years |
| Vehicles | 8 Years |
| Office equipment | 5 Years |
| Computers | 3 Years |

e Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

f Impairment

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

g Investments

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

h Revenue recognition

Interest income is recognised on time proportion basis taking into account amount outstanding and the applicable interest rate.

Service income is recognised on the basis of completion of service method.

Dividend is recorded when the right to receive payment is established. Interest income is recognised on time proportion basis taking into account the amount outstanding and the rate applicable.

i Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income taxpayable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the reporting date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

j Foreign currency transactions

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

k Inventories

Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

l Provisions, Contingent liabilities and Contingent assets

Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

m Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Fixed Deposits with maturity upto 12 months are also considered as part of cash and cash equivalents as they are held as highly liquid assets

n Retirement and other employee benefits

Short Term Employee Benefits

Short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised undiscounted during the period employee renders services.

Post-Employment Benefits

Company's contribution for the period paid/payable to defined contribution retirement benefit schemes are charged to Restated Summary Statement of Profit and Loss. Company's liability towards defined benefit plan viz. gratuity is determined using the Projected Unit Credit Method as per actuarial valuation carried out at the reporting date. General Description of the Plan

The Entity operates gratuity plan through a trust wherein every employee is entitled to the benefit equivalent to fifteen days salary last drawn for each completed year of service. The same is payable on termination of service or retirement, whichever is earlier. The benefit vests after five years of continuous service. In case of some employees, the Entity's scheme is more favourable as compared to the obligation under Payment of Gratuity Act, 1972.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of financial condition and results of operations together with our financial statements included in this Red hearing Prospectus. The following discussion relates to our Company and is based on our restated financial statements. Note: Statement in the Management Discussion and Analysis Report describing our objectives, outlook, estimates, expectations or prediction may be "Forward looking statement" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to our operations include, among others, economic conditions affecting demand/supply and price conditions in domestic and overseas market in which we operate, changes in Government Regulations, Tax Laws and other Statutes and incidental factors.

Our Company is part of the Rajoo Group, which is headed by our promoter group company and Group Company, Rajoo Engineers Limited ("REL"). Our Company is promoted by one of the Promoters of REL, namely Khushboo Chandrakant Doshi. REL is global player in plastic extrusion machinery, catering to 70 countries across the globe. REL designs, manufactures and services mono to seven layer upward and downward blown film line for barrier and non-barrier applications along with extrusion coating and lamination line, mono to five layer sheet extrusion system for barrier and non-barrier sheet along with multi-station thermoforms. REL has played a major role in advancement of technology to fulfil the challenging market need and thus become a leading manufacturer and exporter of specialized plastic products in the home improvement and home furnishing industry.

Our Company was incorporated on August 14, 2002 as 'Essen Speciality Films Private Limited', a private limited company under the Companies Act, 1956, pursuant to a certificate of incorporation issued by the Assistant Registrar of Companies, Gujarat, Dadra and Nagar Haveli. Subsequently, our Company was converted into a public limited company pursuant to a resolution passed by our Shareholders at an extraordinary general meeting held on December 31, 2022 and consequently the name of our Company was changed to 'Essen Speciality Films Limited' and a fresh certificate of incorporation dated January 3, 2023 was issued by the Registrar of Companies, Gujarat at Ahmedabad. Our Company commenced its business operations in the Financial Year ended March 31, 2003 by manufacturing desk-mats. Thereafter, in 2007, our Company expanded its product portfolio by manufacturing expanded polystyrene foam disposables and commenced its commercial production on September 20, 2008. Subsequently, we further expanded our operations by manufacturing dining table mats, coasters, yoga mats and inner shoe soles through compression molding process in the year 2014; and artificial plants through injection molding process in the year 2018.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to

retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train

them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter “*Risk Factors*” beginning on Page No. 25 We are continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Significant Developments after March 31,2023 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application

Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company was required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

| Bid Quantity | Bid Amount (₹) | Cumulative Quantity | Subscription |
|--------------|----------------|---------------------|--------------|
| 500 | 24 | 500 | 16.67% |
| 1,000 | 23 | 1,500 | 50.00% |
| 1,500 | 22 | 3,000 | 100.00% |
| 2,000 | 21 | 5,000 | 166.67% |
| 2,500 | 20 | 7,500 | 250.00% |

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer and the Selling Shareholders, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
