### **INTERNAL RISK FACTORS**

- Our business is dependent on a few of our clients who contribute to majority of our revenues from operations. Any loss of business from them may adversely affect our revenues and profitability.***

Our business and revenues are substantially dependent on a few clients who form part of the majority of our revenue. We do not enter into long-term contracts with our clients, and most of the solutions and services provided are project-specific and last only up to the completion of the project. Where required, we also provide backup support services to the engineers and technicians of the client once the project goes on stream or to the next level of activity of the specific project. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. The table set forth below states contribution of Top 1/3/5/10 customers in our total revenue from operations:

Particulars	March 31, 2024	March 31, 2023	March 31, 2022
<b>Top 1 Customers (%)</b>	21.97%	20.34%	22.61%
<b>Top 3 Customers (%)</b>	52.38%	37.75%	34.97%
<b>Top 5 Customers (%)</b>	61.98%	48.68%	43.77%
<b>Top 10 Customers (%)</b>	75.05%	62.93%	54.88%

The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

- If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.***

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained other permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement that we are required to comply with. Further, some of these approvals are granted for fixed periods and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Further our Company is in process of application for Registration under Provident Fund, Employee state Insurance, GST Registration, TAN, Shop & Establishment and Professional Tax.

Additionally, we believe that we will be able to renew or obtain such registrations and approvals or permissions, as and when required, there can be no assurance that the relevant authorities will renew or issue any such registrations or approvals in the timeframe anticipated by us or at all. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues, profits and operations.

For further details, see section on “Government and Other Approvals” beginning on page 165 of the Draft Red Herring Prospectus.

- If we fail to innovate in response to changing client needs and adopt and develop new technologies, or adapt to evolving industry standards, our business, financial condition, and results of operations could be adversely affected.***

We are engaged in providing services to the industries characterized by rapid technological innovation, evolving industry standards, frequent new service introductions and changing clients demands. We believe that the pace of innovation will continue to accelerate as clients increasingly base their business on future industry developments and demands. Our future success depends on our ability to continue

to innovate and adopt newer platforms proposed to be deployed by our clients We need to continue to invest in technologies, services, and partnerships keeping in mind the future requirements of our clients in an ever-changing technology conditions.

If we are unable to enhance our solutions to keep pace with these rapidly evolving client requirements, or if new technologies emerge that are able to deliver in-built solutions requiring much lesser customization at lower prices, more efficiently, more conveniently, or more securely than our solutions, then our business, financial condition, and results of operations could be adversely affected.

**4. *If we cannot execute our strategy to expand our business into international markets, our business and prospects may be materially and adversely affected.***

Our Company has been successfully serving for the past several years clients, both domestically and overseas, like Middle East countries and USA. One of our strategy for business growth is to target new clients and expand existing clients accounts by way of deepening our international presence in countries based in the Middle East and USA. We have established our WOS in Dubai *Ospyn Star Technologies LLC* to increase our business presence globally. For further details please see “Our Business” and “Our Subsidiary” on page 88 and 139 respectively. In order to achieve our future goals, we also need to focus on our operations, technology and sales & marketing functions of our Company. However, we cannot assure that we will succeed in implementing our strategy as we may face increased business and legal risks when we enter new international markets, and also may find it difficult to hire, train and retain locally qualified employees in these jurisdictions. Our inability to manage and implement our strategy could have a material adverse effect on our business, financial condition and profitability.

**5. *If we are unable to hire, integrate, train and retain our engineers and technical personnel, our business could suffer.***

We have high retention ratio for our employees and our ability to provide quality services, to manage the complexity of our business and our success depends largely on our ability to continue to hire, integrate, train, and retain qualified and highly skilled personnel in the areas of engineering management, sales and marketing, compliance, finance, human resources and administration and technical team. We are substantially dependent on the continued service of our existing engineering and technical personnel because of the complexity and domain experience involved in our operations. As of March 31, 2024 our total number of employees were 476 personnel. Additionally, any failure to hire, integrate, train, and adequately incentivize our engineers and sales personnel or the inability of our hired qualified and highly skilled personnel to effectively deliver on projects and client expectations could negatively impact our growth and operating margins. Competition for such personnel is intense and the cost of retaining or replacing such personnel may affect our profitability. In addition, our strategies for growth have placed, and are expected to continue to place, increased demands on our management’s and employees’ skills and resources.

In addition, our ability to maintain and grow our existing business will largely depend on our ability to attract, train and retain qualified and highly skilled personnel which enables us to keep pace with evolving industry standards and changing client preferences. If we are unable to attract and retain the highly skilled professionals we need, we may have to forgo projects for lack of resources or be unable to staff projects optimally. Our failure to attract and retain professionals with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new professional successfully could materially adversely affect our business, financial conditions and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

**6. *There have been instances of lapses, discrepancies and/or typographical errors in Statutory filings and delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 or the Companies Act, 2013 to ROC.***

In the past, there have been certain instances of delays in filing of statutory forms as per the reporting requirements under the Companies Act 1956 or the Companies Act, 2013 with the ROC and company has made additional fees payment.

In this regard, as of date of this Draft Red Herring Prospectus, while we endeavour to comply with various applicable legislations in future in this regard, however we cannot assure that any actions will not be taken against us in the future.

No Show Cause notice in respect to the above has been received by our office till date and except as stated in this Draft Red Herring Prospectus, no penalty or fine has been imposed by any regulatory in respect to the same. It cannot be assured, that there will not be such instances in the future or our company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

**7. *Our success relies on our ability to innovate and invest in technology effectively.***

The technology industry is characterized by rapid advancements, evolving platforms, and increasingly sophisticated client needs. To stay competitive, we must consistently anticipate and develop new tools, solutions, and services, while enhancing existing offerings to meet changing industry standards. The integration of emerging technologies, such as digital transformation and intelligent enterprise models, with our clients' existing systems is crucial for addressing their business needs.

We invest heavily in human capital and technology to enhance our capabilities, particularly in areas like digital transformation and cybersecurity. However, there is no guarantee that these investments will deliver the expected results. If we fail to develop solutions that align with new industry requirements or meet our clients' expectations, it could negatively impact client retention, repeat business, and our overall financial performance. Moreover, unsuccessful investments in technology may adversely affect our operational outcomes and cash flow.

**8. *The standalone and consolidated financial statements were audited by different chartered accountants.***

For the financial year 2023-24, our Standalone Financial Statements were audited and signed by M/s. Roy Varghese and Associates, Chartered Accountants. However, M/s. Roy Varghese and Associates tendered their resignation, with effect from September 10<sup>th</sup>, 2024, creating a causal vacancy in the role of the statutory auditor. Hence, the Board of Directors appointed M/s. Goyal Goyal & Co., Chartered Accountants, as the statutory auditor to fill this casual vacancy.

Subsequently, M/s. Goyal Goyal & Co. undertook the responsibility of auditing and signing of the Consolidated Financial Statements for the financial year 2023-24. As a result, while two separate chartered accountants signed the standalone and consolidated financial statements, the transition was managed in compliance with regulatory requirements, ensuring continuity and integrity in our financial reporting process.

**9. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, and our Key Managerial Personnel. Loss of any of our directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company's future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Our Promoters, Directors and KMPs are associated with the company for substantial number of years. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability

to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — **“Our Management”** on page 124 of this Draft Red Herring Prospectus.

**11. Any delays and/or defaults in clients payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.**

We are exposed to payment delays and/or defaults by our clients. Our financial position and financial performance are dependent on the credit worthiness of our clients. As per our business network model, we supply our products/services directly to our clients majority of whom, without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our clients will be received in a timely manner or to that extent will be received at all. If any of the clients defaults in making its payments on an order on which our company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our clients' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

**12. *The property used by the Company for the purpose of its operations is not owned by us. Any termination of the relevant lease or leave and license agreement in connection with such property or our failure to renew the same could adversely affect our operations.***

We currently operate from our registered office, located at 1<sup>st</sup> Floor, Kabani West Side, Technocity, Thonnakkal, Thiruvananthapuram, Kerala, India, 695317 and the same is not owned by us. We have obtained this property on a leave and license basis from the owner through a Rent Agreement starting from the date of agreement for 01/09/2025. The agreement is valid as of the date of filing of this DRHP. Electronics Technology Parks-Kerala (Technopark) owns this office, which we acquired on a short-term rental basis. Also, the leave and license are registered with the regulatory authority. Any termination of the lease and/or rental deed in connection with this property or our failure to renew the same, and upon favourable conditions, promptly or at all could adversely affect our operations. Also, the properties that we operate from are on either leave and license or rental basis. For details regarding properties taken on lease, refer the Section titled —Immovable Properties under “Business Overview” beginning on page no. 116 of this Draft Red Herring Prospectus.

Also, the owners of the above property have also leased part of the office to our Group Company. A shared office presents certain issues like lack of privacy and space constraints. If the owners decide to allot bigger space to our Group Company, we may not be able to operate freely and conveniently, causing operational hindrances. Also, if the owners decide to rent the entire office to other entities, we may not be able to find a replacement office in a reasonable timeframe, on terms favourable to us or at all.

**13. *Any failure of our products implemented at our clients project or business operations may adversely affect our business and results of operations.***

We are dependent on developing Enterprise Applications, products and Solutions for carrying out our business activities, and the development of such solutions forms an integral part of our business. We offer custom-built technology solutions to corporates in various sectors.

Any failure of our Solutions and implementations could result in business interruptions for clients, including losses, loss of reputation and weakening of their own competitive position. This may also result in liabilities and claims against our clients due to the implementation of our tools, designs, solutions and services. We may in turn be liable for any claims made against our clients which may lead to a dispute or litigation in relation to these claims. Any such eventuality, we could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

**14. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lakhs)			
Particulars	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/ (used in) Operating Activities	72.98	642.20	189.77
Net cash generated from/(used in) investing activities	(691.21)	(402.83)	(28.23)
Net Cash Flow from/ (used in) Financing Activities	542.58	(63.51)	(198.6)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

**15. *Our Company has availed certain unsecured loans which may be recalled at any time.***

Our Company has availed certain unsecured loans of which an amount of ₹ 347.84 lakhs is outstanding as on March 31, 2024 which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects.

Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 145 of this Draft Red Herring Prospectus.

**16. We require certain approvals and licenses in the ordinary course of business; some of these approvals need to be transferred in the name of ‘OSPYN Technologies Limited.’ We are yet to update some of the registrations, and failure to do so could adversely affect our operations, results, and financial condition.**

We are governed by various laws and regulations related to our business operations. We are required to obtain and maintain relevant licenses, approvals, and permits at both state and central government levels to operate our business. Some of the approvals, licenses, registrations, and permits we have obtained may contain onerous conditions. Additionally, we will need to apply for the renewal of certain licenses and update registrations due to the conversion of the company from private to public—i.e., from ‘OSPYN Technologies Private Limited’ to ‘OSPYN Technologies Limited.’

These laws and regulations are becoming increasingly stringent, which may lead to substantial compliance obligations, liabilities, and costs. While we strive to comply with regulatory requirements, such measures may restrict our operations and increase costs. Failure to comply could result in penalties. For further details regarding material approvals, licenses, registrations, and permits that have not been obtained or are pending renewal, see "Government Approvals" on page 165 of this Draft Red Herring Prospectus.

Moreover, we cannot guarantee that the approvals, licenses, registrations, and permits issued to us will not be suspended or revoked due to non-compliance or regulatory action. Any suspension or revocation of these documents could impact our business and results of operations. For more information, please see the chapters titled "Key Industry Regulations and Policies" and "Government Approvals" on pages 116 and 165, respectively, of this Draft Red Herring Prospectus.

Orders passed in such proceedings adverse to our interests may affect our reputation and standing and may have a material adverse effect on our business, results of operations and financial condition. For further details, please see “*Outstanding Litigation and Material Developments*” beginning on page 161.

**19. *Our pricing structures may not always account for the full cost and complexity of our work, and if we are unable to manage our expenses effectively, certain contracts could become less profitable or even unprofitable.***

We engage with our clients using various pricing structures. Depending on the contract, we might use a time-based or resource-based model, invoicing monthly, quarterly, or annually for the services provided. In other cases, we adopt fixed-price agreements, where we deliver a specific scope of work within a set timeline for an agreed fee. Some contracts may combine time-based pricing with fixed-price components for specific services.

Maintaining or improving our profitability relies heavily on our ability to control costs. Our cost management strategies focus on aligning our resource capacity with service demand, optimizing service delivery costs through tools, and effectively managing sales, marketing, and administrative expenses. We also face potential additional costs if we need to modify or improve services to meet client expectations, especially when we may not have fully understood their needs.

Our pricing structure is guided by internal forecasts, which might rely on limited data and could be prone to inaccuracies. While we utilize structured software engineering processes and leverage our past project experience to mitigate risks in estimating, planning, and executing fixed-price projects, we remain exposed to risks such as cost overruns, delays in completion, and wage inflation. There is no assurance that these or other cost-management measures will lead to improved efficiency or desired profitability levels.

Should we misjudge the resources, costs, or timeline for completing contracts, fail to anticipate wage inflation and currency fluctuations, or miss contractual deadlines, the profitability of our contracts may be compromised. Underpricing, inaccurate cost estimates, or failing to assess potential risks can lead to contracts being less profitable than expected. Additionally, unforeseen costs, significant deviations from initial estimates, delays, or unanticipated risks—especially those beyond our control—could negatively impact the profitability of these contracts and ultimately reduce our profit margins.

**20. *Intense competition in the technology services market may impact our pricing, client share, and profitability.***

We operate in a highly competitive industry characterized by rapid technological advancements, shifting industry standards, and evolving customer needs. Our competitors range from large IT consulting firms and multinational tech companies to smaller local competitors across various markets.

The industry is undergoing changes, including mergers and acquisitions, which create larger competitors with more resources, offering broader services. This could reduce our access to key services and disadvantage our service portfolio. Competitors may also implement more efficient methodologies, allowing them to offer similar services at lower costs, putting pressure on our pricing and margins.

Additionally, clients may opt to use in-house resources instead of outsourcing, and competition for skilled professionals remains intense. Larger competitors often have greater financial resources, stronger client relationships, and better global recognition, which may make it difficult for us to compete successfully or maintain current profitability levels. We also face competitive challenges in markets where we have limited experience, with pricing pressures being outside our control.

**21. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled “*Our Management*” beginning on page 130, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled “*Our Promoters and Promoter Group*” beginning on page 135, “*Financial Indebtedness*” beginning on page 145 and “*Restated Financial Statements*” beginning on page 142 of this Draft Red Herring Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and

our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

**22. *We may be liable to clients for damages caused by system failures, data breaches, or disclosure of confidential information, which could harm our reputation and result in loss of clients.***

Many of our contracts are critical to our clients' operations, and any system failure, regardless of fault, could result in claims for substantial damages. We also handle confidential client data, making us vulnerable to threats like unauthorized access, security breaches, or system disruptions. Maintaining secure infrastructure is crucial for client trust.

While we use encryption and authentication technologies, advances in cryptography or unforeseen events could compromise security. Breaches or unauthorized disclosures could expose us to liability, harm our reputation, and cause client loss. Although we aim to limit contractual liability for damages, these limitations may not always be enforceable. Unauthorized access to our systems by employees or subcontractors could also result in significant liabilities for breaching confidentiality agreements or privacy laws.

Large claims or disruptions in service without proper business continuity plans could negatively impact our revenues and operations.

**23. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

**24. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.***

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a book-built basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" beginning on page 54 of this Draft Red Herring Prospectus.

**25. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained mentioned under chapter titled Industry Overview in the Draft Red Herring Prospectus.***

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page 83 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**26. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

**27. *We have in past entered into related party transactions and we may continue to do so in the future.***

As of March 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For, further details, please refer to the chapter titled — "*Restated Financial Statements*" on page 142.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

**28. *We face risks associated with expanding into new markets.***

Expanding into new regions, both in India and internationally, presents challenges such as unfamiliar legal systems, economic conditions, cultural differences, language barriers, and building brand recognition. These challenges can lead to unexpected risks, including increased competition and operational difficulties.

Additional risks include compliance with diverse laws and regulations, currency fluctuations, tax implications, labor regulations, and political or social instability. Expansion also brings the risk of government intervention and differing accounting standards.

While we plan to grow into new markets, these factors could lead to significant liabilities and potential losses, negatively affecting our business and financial performance. For more details, refer to the "Objects of the Issue" section on page 63 of the Draft Red Herring Prospectus.

**29. *Our Promoters has extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.***

Our Promoters has in the past extended certain personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered, and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled "**Financial Indebtedness**" on page 142 of this Draft Red Herring Prospectus.

**30. *An inability to comply with repayment and other covenants in the financing agreements or otherwise meet our debt servicing obligations could adversely affect our business, financial condition, cash flows and credit rating.***

As of March 31, 2024, we had total outstanding borrowings of Rs 320.99 lakhs. The agreements with respect to our borrowings contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to undertaking certain matters including, among others, effecting a merger, amalgamation or scheme of arrangement, change in capital structure of our Company subject to the threshold prescribed for the shareholding of certain shareholders of our Company and effecting change in the constitutional documents or management of our Company. For further details, see "Financial Indebtedness" beginning on page 145. As on March 31, 2024, our total secured borrowings amounted to Rs 303.14 lakhs, comprising of 94.44% of our total indebtedness. Under the terms of our secured borrowings, we are required to create a charge by way of hypothecation on the assets of our Company, together with cash in hand and bank accounts. As these assets are hypothecated in favour of lenders, our rights in respect of transferring or disposing of these assets are restricted. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consent prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, change in ownership or management control, changes in shareholding pattern and management set-up including its constitution and composition, amalgamation, demerger, merger, acquisition, corporate or debt restructuring or similar action. Our Company is yet to receive consent from lenders in relation to a borrowing availed by us.

**31. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "**Objects of the Issue**" beginning on page 63 of this Draft Red Herring Prospectus.

**32. *Any defect in title/ ownership of owner (s) (including the Promoters/ Promoter Group), from whom the Company has bought space/ taken space on lease, may adversely affect the operations of the Company resulting in loss of business.***

With a view to expand the Company's business, the Company has acquired/ taken on lease and license basis various properties and entered into various contractual agreements with third parties. Any defect in the title/ ownership of such third parties with whom the Company has entered into such agreements may adversely affect the operations of the Company resulting in loss of business.

**33. *The requirement of funds in relation to the objects of the Issue has not been appraised.***

We intend to use the proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” on page 63. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

**34. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.***

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions and have not been appraised by any bank or financial institution or other independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. For further details, please see the section titled “*Objects of the Issue*” beginning on page 63 of this Draft Red Herring Prospectus.

**35. *Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.***

The Government of India may implement new laws or other regulations that could affect the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

**36. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Except, as specified on the “*Dividend Policy*” of this DRHP on page 141, our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 141 of this Draft Red Herring Prospectus.

**37. *Our insurance coverage may not be adequate to protect us against all potential losses, which may have a material adverse effect on our business, financial condition and results of operations.***

We maintain insurance policies for our registered office from risks including burglary, fire, earthquake, and other unforeseen events. We also maintain insurance policies for some of our vehicles. We also maintain insurance policy for stocks hardware and software. For further information, see “*Our Business –Insurance*” on page 116.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our insurance cover for our total assets as of March 31, 2024, 2023 and 2022 was ₹1.46, ₹11.61 and ₹ 11.82 respectively. Our insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

**38. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.***

As the issue size shall be less than ₹10,000 lakhs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 63 of this Draft Red Herring Prospectus.

**39. *We have not independently verified certain data in this Draft Red Herring Prospectus.***

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**40. *The requirements of being a listed company may strain our resources.***

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

**41. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the SME Platform of BSE Limited, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

**42. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

**43. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.***

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the book running lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

**44. *The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or

recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

**45. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.***

The Equity Shares will be listed on the SME Platform of BSE Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the SME Platform of BSE Limited, trading in the Equity Shares is to commence within three (3) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the SME Platform of BSE Limited in a timely manner or at all.

**46. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

**47. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.***

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the IT/ITES sector in general;
- significant developments in India's economic liberalization and deregulation policies;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

**48. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoters Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

**49. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

**EXTERNAL RISKS:**

**50. The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.**

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern in January 2020, and a global pandemic in March 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments.

The global impact of the outbreak has been rapidly evolving. Most of the jurisdictions, including where we have business operation, have reacted by instituting restrictive measures including invoking lock-downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; disruptions or restrictions on our employees' ability to work and travel; any extended period of remote work arrangements; and strain on our or business continuity plans, and resultant operational risk. The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

**51. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.**

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

**52. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.**

The goods and service tax ("GST") that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules ("GAAR"), The general anti avoidance rules ("GAAR") provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an "impermissible avoidance arrangement", if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

**53. You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.**

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless

the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

**54. *Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.***

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the Textile & Apparel industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

**55. *Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.***

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

**56. *A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.***

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

**57. *Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in

the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

***58. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.***

Prior to this Offer, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Offer due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

***59. There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of BSE Limited in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. Further, pursuant to SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Retail Individual Investors applying in public Issue may use either Application Supported by Blocked Amount (ASBA) facility for making application or also can use UPI as a payment mechanism with Application Supported by Blocked Amount for making application. For details in this regards, specific attention is invited to the chapter titled “Issue Procedure” beginning on page 188 of the Draft Red Herring Prospectus.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

For further details on the method and procedure for Bidding, please see section entitled “Issue Procedure” on page 188 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

#### Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled “Issue Procedure” on page 188 of this Draft Red Herring Prospectus);

#### Key assumptions for working capital requirements

Particulars	Justification
Trade Receivables	The holding days peaked at 277 days in Fiscal 2022, indicating significant delays in collections, primarily due to the nature of government contracts, which often involve prolonged payment cycles. A notable improvement occurred in Fiscal 2023, reducing the holding days to 144, likely as a result of enhanced credit management and stronger relationships with clients, coinciding with a rise in revenue to ₹3,002.16lakhs.  However, the holding days increased again to 186 in Fiscal 2024, reflecting continued challenges in timely payments from government clients. The estimated holding days for Fiscal 2025 and projected Fiscal 2026 are projected at 166 days and 148 days respectively, suggesting a trend toward stabilization.
Trade Payables	A decline from 131 days in Fiscal 2022 to an estimated 27 days and 24 days projected in Fiscal 2025 and Fiscal 2026 Projected respectively . indicates improved payment cycles and better cash flow management, crucial for a service-oriented business with rising expense significantly, particularly in professional services and software charges.

The increase in working capital requirement was on account of an increase in revenue from operations of our company. Furthermore, working capital of the Company calculated above is for a particular day i.e. on March 31 which could vary when compared to calculation during the year. Gross working capital requirement of the Company has increased from ₹ 927.07 Lakhs in FY 2023 to ₹ 1,611.21 Lakhs in FY 2024. This increase was mainly on account of increase in trade receivables, which increased from ₹ 1,190.35 Lakhs to 2,106.37 Lakhs. Trade receivable cycle of the Company is on the higher side, ranging between 60 to 200 days, since the major chunk of the Company's customers are government from whom payments are received, but with delay.

Additionally, as on March 31, 2024, the Company's Other Liabilities & Short-Term Provisions was on the higher side as compared to FY 2023. The heavy investment in product development in FY 2024, which at ₹ 568.43 Lakhs (excluding Director remuneration) is 2.34 times the spend in FY 2023, necessitated higher short-term borrowing as detailed below:

- Cash Credit/ Bank Overdraft ₹ 271.85 Lakhs in FY 2024 as against ₹ 2.16 Lakhs in FY 2023
- Loan from Directors ₹ 347.84 Lakhs in FY 2024 compared to ₹ 14.03 Lakhs in FY 2023

**For FY 2024-25 and FY 2025-26**

In FY 2024-25 and FY 2025-26, our Trade Receivables is expected to increase up to ₹ 2,317.01 Lakhs and 2433.86 Lakhs Approx, which is a reflection of our projected growth in revenue for the year. This is because of the thrust to our sales in other geographical areas – mainly Bhutan, Asia-Pacific, Middle East and Africa, and shifting the focus more on the private sector, thus reducing the dependency on the domestic and government related sector for revenue. Further, our new subsidiary in Dubai would be fully operational, driving the revenue from the Middle East and Africa.

**GLOBAL ECONOMY**

**Macroeconomic Environment:**

Global activity and world trade firmed up at the turn of the year, with trade spurred by the strong exports from Asia, particularly in the technology sector. Relative to the April 2024 world economic outlook, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter.

In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year's rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors, wane and activity becomes better aligned with its potential. The forecast for growth in emerging market and developing economies is revised upward; the projected increase is powered by stronger activity in Asia, particularly China and India. For China, the growth forecast is revised upward to 5% in 2024, primarily on account of a rebound in private consumption and strong exports in the first quarter.

In 2025, GDP is projected to slow to 4.5%, and to continue to decelerate over the medium term of 3.3 % by 2029, because of headwinds of from aging and slowing productivity growth. The forecast for growth in India has also been revised upward, to 7.0%, this year, with the charge reflecting carryover from upward revisions to growth in 2023 and improved prospects for private consumption, particularly in rural areas. World trade growth is expected to recover to about 3.25% annually in 2024-25 (from quasi stagnation in 2023) and align with global GDP growth again. The uptick in the first quarter of this year is expected to moderate as manufacturing remains subdued. Although cross-border trade restrictions have surged, harming trade between geopolitically distant blocs, the global trade-to-GDP ratio is expected to remain stable in the projection.

## INDIAN ECONOMY

### India's real GDP projected to grow between 6.5-7.0% in 2024-25.

India's real GDP is projected to grow between 6.5-7.0% in 2024-25. The Indian economy recovered swiftly from the pandemic, with its real GDP in FY24 being 20% higher than the pre-COVID, FY20 levels. This was stated by the Economic Survey 2023-24 presented in Parliament by the Union Minister of Finance and Corporate Affairs Smt. Nirmala Sitharaman.

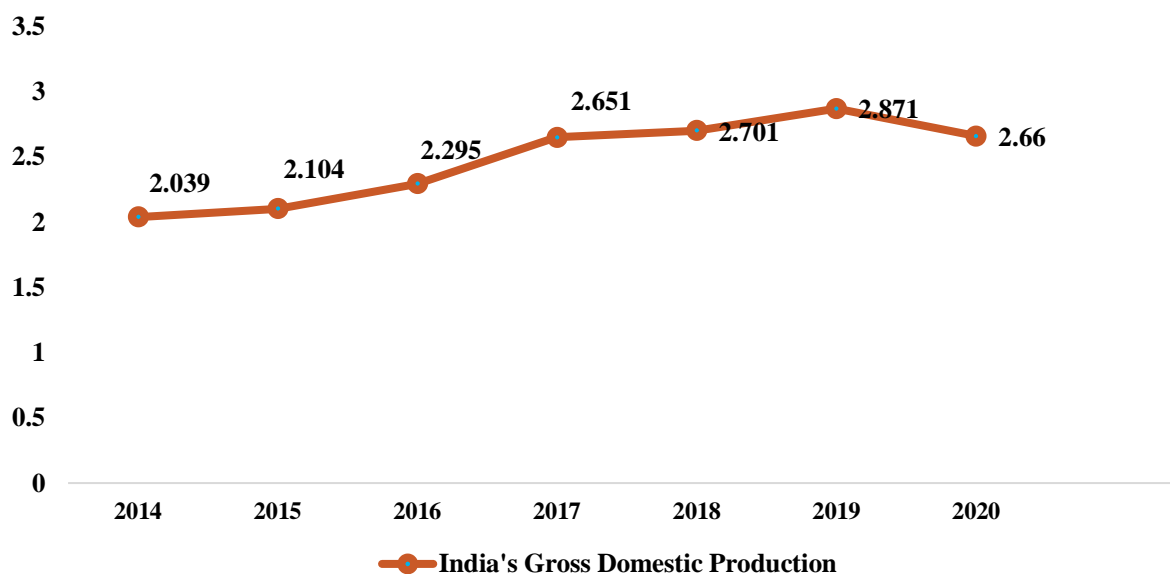

The Survey points out that the domestic growth drivers have supported economic growth in FY24 despite uncertain global economic performance. It also adds that during the decade ending FY20, India grew at an average annual rate of 6.6 per cent, more or less reflecting the long-run growth prospects of the economy. The Survey, however cautions that any escalation of geopolitical conflicts in 2024 may lead to supply dislocations, higher commodity prices, reviving inflationary pressures and stalling monetary policy easing with potential repercussions for capital flows. This can also influence RBI's monetary policy stance. The global trade outlook for 2024 remains positive, with merchandise trade expected to pick up after registering a contraction in volumes in 2023.

The Survey highlights that leveraging the initiatives taken by the government and capturing the untapped potential in emerging markets; exports of business, consultancy and IT-enabled services can expand. Despite the core inflation rate being around 3 per cent, the RBI, with one eye on the withdrawal of accommodation and another on the US Fed, has kept interest rates unchanged for quite some time, and the anticipated easing has been delayed. The Economic Survey says that India's economy showed resilience to a gamut of global and external challenges as real GDP grew by 8.2 percent in FY 24, exceeding 8 percent mark in three out of four quarters of FY 24, driven by stable consumption demand and steadily improving investment demand.

Market Size:

### India's Gross Domestic Production (US\$ Trillion)

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. *The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.*

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

**Robust pathway to India's economic growth for FY2025:**

- ▶ India's real GDP grew by 8.2% in FY24, exceeding 8% mark in three out of four quarters of FY24.
- ▶ Gross Fixed Capital Formation increased by 9% in real terms in 2023-24.
- ▶ Retail inflation declined to 5.4% in FY24.
- ▶ Real GDP in FY24 recorded to be 20% higher than its level in FY20.

The Survey states that despite global supply chain disruptions and adverse weather conditions, domestic inflationary pressures moderated in FY24. After averaging 6.7 per cent in FY23, retail inflation declined to 5.4 per cent in FY24. This has been due to the combination of measures undertaken by the Government and the RBI. The Union Government undertook prompt measures such as open market sales, retailing in specified outlets, timely imports, reduced the prices of Liquefied Petroleum Gas (LPG) cylinders and implemented a cut in petrol and diesel prices. The RBI raised policy rates by a cumulative 250 bps between May 2022 and February 2023.

### Fiscal Deficit as % of GDP

The Survey says, against the global trend of widening fiscal deficit and increasing debt burden, India has remained on the course of fiscal consolidation. The fiscal deficit of the Union Government has been brought down from 6.4 per cent of GDP in FY23 to 5.6 per cent of GDP in FY24, according to provisional actuals (PA) data released by the Office of Controller General of Accounts (CGA). The growth in gross tax revenue (GTR) was estimated to be 13.4 per cent in FY24, translating into tax revenue buoyancy of 1.4. The growth was led by a 15.8 per cent growth in direct taxes and a 10.6 per cent increase in indirect taxes over FY23. The Survey adds that broadly, 55 per cent of GTR accrued from direct taxes and the remaining 45 per cent from indirect taxes. The increase in indirect taxes in FY24 was mainly driven by a 12.7 per cent growth in GST collection. The increase in GST collection and E-way bill generation reflects increased compliance over time.

### Capital Expenditure as % of GDP

The capital expenditure for FY24 stood at ₹9.5 lakh crore, an increase of 28.2 per cent on a YoY basis, and was 2.8 times the level of FY20. The Government’s thrust on capex has been a critical driver of economic growth amidst an uncertain and challenging global environment. Spending in sectors such as road transport and highways, railways, defence services, and telecommunications delivers higher and longer impetuses to growth by addressing logistical bottlenecks and expanding productive capacities.

Overall, India’s external sector is being deftly managed with comfortable foreign exchange reserves and a stable exchange rate.

## Forex Reserves in US\$ billion, year-end

Forex reserves as of the end of March 2024 were sufficient to cover 11 months of projected imports. The Survey underscores that the Indian Rupee has also been one of the least volatile currencies among its emerging market peers in FY24. India's external debt vulnerability indicators also continued to be benign. External debt as a ratio to GDP stood at a low level of 18.7 per cent as of end-March 2024. The ratio of foreign exchange reserves to total debt stood at 97.4 per cent as of March 2024 as per the Economic Survey 2023- 24. The Direct Benefit Transfer (DBT) scheme and Jan Dhan Yojana-Aadhaar-Mobile trinity have been boosters of fiscal efficiency and minimization of leakages, with ₹36.9 lakh crore having been transferred via DBT since its inception in 2013.

On the global economic scenario, the Survey says that after a year marked by global uncertainties and volatilities, the economy achieved greater stability in 2023. While uncertainty stemming from adverse geopolitical developments remained elevated, global economic growth was surprisingly robust. The Survey states as per the World Economic Outlook (WEO), April 2024 of the International Monetary Fund (IMF), the global economy registered a growth of 3.2 per cent in 2023.

### Road ahead for the Indian Economy:

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signaling a clear change in favor of higher-quality spending.

Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

## OUR BUSINESS MODEL

We execute our client order in two different models based on customer's requirements, business process and the outcome which they want from us:

### 1. Sale of Product:

We specialize in domain specific products like banking solutions, educational process automation suite, trade finance automation solution, e-governance file processing automation, etc. to 20+ sectors.

**Stage 1 - Initial Meeting:** In the first stage, we meet with our prospects in a discovery process aimed at building a comprehensive understanding of their business environment, challenges, and objectives. We take the time to engage with key stakeholders to identify operational inefficiencies, gaps, and unmet needs that could be addressed through our software solutions. By understanding their unique situation, we can ensure that our approach is aligned with their strategic goals.

**Stage 2- Product Mapping:** Once the initial discovery is complete, we enter the product mapping phase. Here, we work closely with the client to thoroughly understand their business objectives, challenges, and desired outcomes. This involves a detailed analysis of the customer's requirements, pain points, and existing workflows and creation of a Business requirement study document (BRD). Our team then aligns these needs with the capabilities of our product offerings, ensuring that the solution we propose addresses both immediate challenges and long-term business goals.

**Stage 3- Product Customization:** At this stage, we begin customizing the product to fit the specific requirements identified in the product mapping phase. This involves working with the client to make tailored adjustments to the software's functionality, interface, and features, ensuring the product integrates seamlessly with their existing systems and workflows. The goal is to optimize the software's performance within the client's unique environment, enhancing efficiency, usability, and overall effectiveness. Our team collaborates closely with the client, providing regular updates and incorporating feedback to fine-tune the solution.

**Stage 4- Delivery:** After customization and rigorous testing, we move into the product delivery phase. This stage involves deploying the fully customized solution, ensuring a smooth handover and integration into the client's infrastructure. Before the final deployment, the product undergoes a customer acceptance process, where it is tested to ensure it meets the client's business goals and expectations. Post-deployment, we provide comprehensive support. Continuous collaboration ensures any adjustments or training needs are promptly addressed, ensuring long-term success.

### 2. Project-Based Development: Tailored Solutions for Defined Goals

We specialize in delivering tailored solutions to meet our clients' defined goals through our project-based development approach. Here's how we do it:

**Stage 1 - Initial Meeting:** We meet our clients at any stage of their journey, from initial ideation to final launch. Our collaborative and adaptive approach ensures that we create impactful solutions that resonate with their business goals.

**Stage 2-Discovery Phase:** We begin by thoroughly understanding our clients' objectives and challenges. This involves a comprehensive estimation of time, cost, and resources, providing a clear roadmap for the project.

**Stage 3-Impact:** This model is perfect for businesses seeking a partner to develop a specific solution, with a clear beginning and end. We deliver a high-quality product aligned with their vision and requirements.

### 3. Time & Material (T&M)

**Step 1- Discovery Call:** We commence with a comprehensive discovery call to understand the business, its requirements, goals, timeline, and budget. This ensures that we align our efforts with the client's strategic needs.

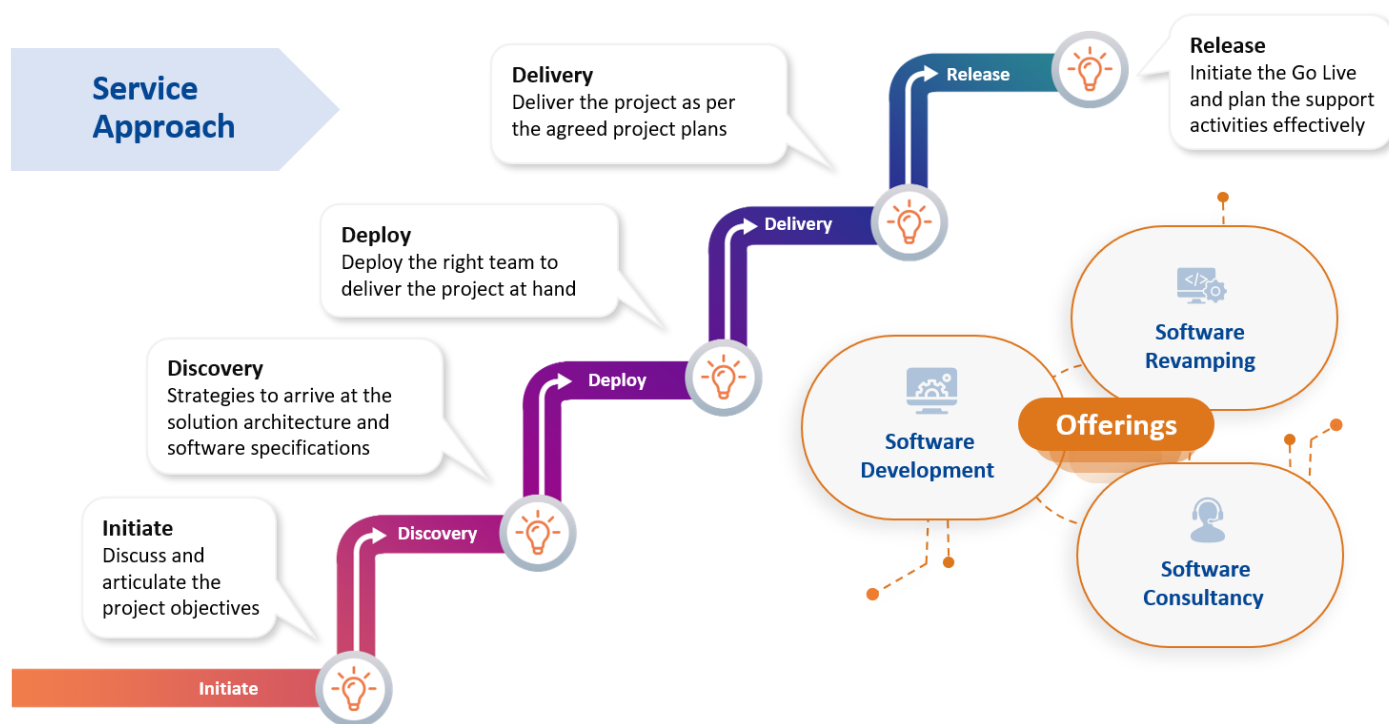

**Step 2- Staffing:** Within days, we hand-select a team of experts tailored to the project's demands. This includes engineers, designers, and a project manager, ensuring a perfect fit for the client's technical and strategic needs.

**Step 3- Engineering & Release:** Our team integrates seamlessly with the client's, focusing on delivering a product that is on time, on budget, and within scope. Prior to launch, extensive QA and testing ensure a bug-free solution, guaranteeing a smooth release.

## Revenue Model and Distribution across Business Lines

Our revenue generation is diversified across four key revenue lines: licensing, implementation and development services, annual technical support and maintenance contracts (ATS/AMC), and support. These revenue streams ensure a balanced and sustainable business model, enabling us to meet the diverse needs of our clients while maintaining steady growth.

### 1. Licensing Revenue:

- Our licensing revenue is derived from the sale of licenses for our software products. We enter into licensing agreements with customers for each product, requiring them to pay a one-time upfront licensing fee based on the number of users. This fee is typically charged on a per-user basis, providing flexibility to scale as needed. If a customer increases the number of users or purchases additional products, additional license fees are incurred. This model allows us to generate significant revenue upfront while offering customers scalable solutions that grow with their needs.

### 2. Annuity-Based Revenue:

- **Annual Maintenance Contracts and Technical Support (ATS/AMC):** We typically enter into ATS/AMC contracts with our customers, requiring them to pay annual fees for ongoing support and maintenance of our software products. This ensures consistent revenue over time while providing customers with the necessary support to keep their systems running smoothly.
- **Support and Development Services:** In addition to ATS/AMC contracts, we offer support and development services, charging fees on a periodic basis. These services include ongoing assistance, customization, and enhancements tailored to the customer's specific requirements.
- **SaaS Revenue:** Our Software-as-a-Service (SaaS) offering enables customers to access our software functionality through a cloud-based infrastructure. Customers pay subscription fees on a Per User Per Month (PUPM) basis, with options for monthly, quarterly, or annual billing. This model provides a recurring revenue stream and aligns with the growing demand for flexible, cloud-based solutions.

### 3. Implementation, Development, and Digitization Services:

- **Implementation Services:** We provide implementation services to install and integrate our software products with the customer's existing platform or system. Implementation fees are typically based on a fixed cost or man-month basis, depending on the complexity and scope of the project. This revenue stream is vital for ensuring a seamless transition for our customers as they adopt our software solutions.
- **Development Services:** We offer development services tailored to the specific needs of our customers. These services involve custom development work, with fees charged on a fixed cost or man-month basis. This allows us to deliver highly specialized solutions that meet the unique requirements of each client.
- **Digitization Services:** Our digitization services include scanning and archiving documents into a digital document management system. These services are crucial for customers looking to modernize their record-keeping and improve efficiency.

#### **Phased implementation of Unified Payments Interface**

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

**Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various**

prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
