INTERNAL RISK FACTORS

Risks relating to our business and other key risks

1. *If our electric vehicles contain defects, do not perform as per industry standards and/or fail to meet the performance levels advertised, our brand and reputation and our ability to develop, market and sell our electric vehicles could be adversely impacted, and we may be compelled to undertake product recalls or similar corrective actions and have legal actions taken against us.*

We cannot assure you that we will be able to detect and fix any defects in the Electric Vehicles on timely basis, or at all. Any defects or any failure of our Electric Vehicles to perform or operate as advertised could harm our reputation and result in negative publicity, loss of revenue, delivery delays, product liability claims, harm to the 'Deltic' brand, and significant expenses including warranty claims, cause us to be subject to potential lawsuits, diversion of our management's attention and other resources that could materially and adversely affect our business, financial condition, results of operations and prospects. For details on litigation initiated by customers before consumer forums, please refer to "Outstanding Litigation and Material Developments – Litigation involving our Company Litigation against our Company" on page 209. In addition, there could be negligence, or failure to follow protocols by our employees or our third-party service providers.

2. *Our success depends on our ability to successfully develop, introduce, manufacture, market and deliver new electric vehicle models of high quality on schedule and on a large scale, which may expose us to new and increased challenges and risks*

Our growth depends on our ability to successfully develop, introduce, manufacture, market and deliver new Electric 2W and 3W in the medium-to-long term. This development of new EVs requires significant capital expenditure, including investments in engineers and other human capital, R&D costs and other intangibles, which may result in cost overruns. Factors affecting competition include, among others, technological innovation, product quality and safety, product pricing, sales efficiency, quality of services, brand value, design and styling. Increasing competition may lead to lower EV unit sales and increasing inventory. Our ability to successfully compete against other vehicle brands will be fundamental to our future success in existing and new markets and our market share.

Further, we may experience material delays in the launch and rollout of new EVs in the future and our growth prospects could be adversely affected as we may fail to maintain or grow our market share.

Developing and launching enhancements to our technology platform containing our key technologies may also involve significant technical risks and upfront capital investments that may not generate commensurate return on investment. We plan to continue investing in R&D and technology. We may not be able to innovate or innovate at the speed of some of our competitors. Hence, our technology or platform may become obsolete and this may result in a loss of market share. We may use new technologies ineffectively, or we may fail to adapt to emerging industry standards or regulatory requirements. Due to any of the reasons above, our customers may be dissatisfied with our EVs which in turn may cause a decline in our brand reputation.

3. ***We are dependent on our dealers for sale of our product. Loss of any or all such dealer may have an adverse impact on our business, results of operations and financial conditions.***

We are doing business through our dealers. As on the date we have more than 300 dealers across the India. Percentage of total revenue received from the top five dealers from fiscal 2022, 2023 and for the period from April 01st, 2023 to July 20th, 2023, from July 21st, 2023 to March 31st, 2024 and for the period ended from 1st April, 2024 to 31st October, 2024 is 19.99%, 17.20%, and 21.80%, 9.05% and 36.30%. Our ability to continue to generate revenue from our operations is significantly dependent on our ability to maintain our relations with our dealers. If any of our top five dealers cease to work us or collaborate with us or choose to work with others, our business, our results of operations and financial conditions will be impacted. Our ability to continue to generate revenue from our operations is significantly dependent on our ability to maintain our relations with our dealers”

4. ***The Company is dependent on a few suppliers for purchases of products. The loss of any of these large suppliers may affect our business operations.***

Our top 5 suppliers contribute 72.35%, 33.70%, 63%, and 45%, and 63% of our total purchase from 1st April, 2024 to 31st October, 2024, July 21st, 2023 to March 31, 2024, from April 1st, 2023 to July 20th, 2023 and for the financial year ended on March 31, 2023 and 2022 respectively based on restated financial statement. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of raw materials and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

5. ***Our business is dependent on our distribution network. An inability to expand or effectively manage our distributor network, or any disruptions in our distribution network may have an adverse effect on our business, results of operations, financial condition and cash flows.***

Our business is significantly dependent on our distributors who distribute our products to end retailers. As of 31st October, 2024 we have more than 300 dealers across 25 states of India. Any disputes with our distributors, including disputes regarding pricing or performance, could adversely affect our ability to supply products to the end retailers and consequently our consumers and could adversely affect our business, results of operations, financial condition and cash flows. In addition, any damage or disruption to our supply chain, including transportation and distribution capabilities due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, government action, or other reasons beyond our control or the control of our distributors, could impair our ability to sell our products. For instance, lockdowns and restrictions on movement on account of Covid-19 pandemic led to delays and disruptions in transportation and distribution and impacted our ability to sell our products, as we were unable to reach our distributors in a timely and efficient manner. Failure to take adequate steps to mitigate the likelihood or potential impact of such events or to effectively manage such events if they occur could adversely affect our business, results of operations, financial condition and cash flows. We continuously seek to increase the penetration of our products by appointing new distributors to ensure a wide distribution network targeted at different consumer groups and regions. We cannot assure you that we will be able to successfully identify or appoint new distributors, maintain and strengthen our relationships with our existing distributors, or manage our distribution network.

As we rely on our distributors for our sales, any one of the following events could adversely impact or result in a decrease in our sale of products and consequently impact our business, results of operations, financial condition and cash flows:

- Failure to maintain relationships with our existing distributors;
- Failure to establish relationships with new distributors, on favorable terms or at all;
- Inability to timely identify and appoint additional or replacement distributors on loss of one or more of our distributors;
- Reduction, delay or cancellation of orders from our distributors; and
- Disruption in delivery of our products to our distributors and by our distributors to retailers.

We may not be able to compete successfully against larger and better-funded distribution networks of some of our existing or future competitors. If the terms offered to such distributors by our competitors are more favourable than those offered by us, our distributors may terminate their arrangements with us. We cannot assure you that we will not lose any of our distributors to our competitors, which may result in the termination of our relationships with such distributors.

The occurrence of any of these factors could result in a decrease in the sales volume of our products and therefore, adversely affect our business, results of operations, financial condition and cash flows.

6. *We are dependent on third parties for our logistics and transportation needs. Any disruptions in the same may adversely affect our operations, business, cash flows and financial conditions.*

We rely substantially on third party transportation providers for the delivery of our products to our customers (Dealers). Transportation strikes / non availability of Transportation could have an adverse effect on our ability to deliver our products to our customers (Dealers). Further we have not entered into any long-term agreements with our transporters and the cost of transportation are generally based on mutual terms and prevailing market price. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including delivery of our products to customers by third party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition. Our Company has not experienced any issues in the past, we cannot assure you that this will not occur in the future.

7. *Our Registered Office, Corporate Office and Manufacturing units from where we operate is not owned by us*

Our Registered office, Corporate office and Manufacturing Units as mentioned in the chapter titled "Our Business" on page no.122 are not owned by us, They are taken on lease rental basis. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office, manufacturing units and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

8. *We may not be able to compete successfully in the highly competitive and fast evolving automotive market.*

The India automotive market is highly competitive, and we cannot assure you that we will be able to compete successfully in our markets. Our existing and future competitors may have significantly greater financial resources that can be devoted to design, development, manufacturing, marketing, sales and support of their vehicles. They may also have technical and manufacturing capabilities and/or marketing, distribution and service network and brand recognition that is comparable to, or more developed than, our own. If products from our competitors surpass the quality or performance of our EVs or are offered at more competitive prices, or if this becomes the prevailing perception among consumers, our profitability and results of operations may be materially and adversely affected.

Any failure by us to develop new or enhanced technologies or processes, or to react to changes in existing technologies, could materially delay our development of new and enhanced EVs, which could result in the loss of competitiveness of our EVs, decreased revenue and a loss of market share to competitors.

9. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

We believe our employees and personnel, are critical to maintain our competitive position. Our employees are not unionized. Although we have not experienced any material labour unrest, we cannot assure you that we will not experience disruptions in work or our retail operations due to disputes or other problems with our workforce, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us in the future, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

10. *If there are changes in government regulations and we are unable to meet the new requirements, it could negatively affect our business and operations.*

The government has introduced new battery safety norms under AIS156 Phase-II, which mandates stricter safety requirements for electric vehicle (EV) batteries. Some of our new vehicles, which were undergoing approval at the time, required additional time and adjustments to comply with these updated regulations. Any delays in meeting these norms could impact our production timelines, vehicle launch schedules, and overall market competitiveness. Further regulatory changes or delays in certification could result in increased costs and potential disruptions to our business operations.”

11. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our company faces potential risks related to incidents of theft or damage to inventory located at respective manufacturing units. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on our results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company. Though, there had been no of such instances in past, we may not able to assure such incident will not happen in the future.

12. *We are susceptible to risks relating to unionization of our employees employed by us.*

None of our employees are currently represented by a recognized collective bargaining agreement. We cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. If not resolved in a timely manner, these risks could limit our ability to provide our services to our clients, or result in an increase in our cost of employee benefits and other expenses. If any of these risks materialize, our business, results of operations and financial condition could be affected.

Risks related to our financial position

13. *We have experienced negative cash flows from operations in the recent past, and we may have negative cash flows in the future.*

The detailed break up of cash flows based on Restated Financial Statements is summarized in below table and our Company has reported negative cash flow from operating activity in the financial years is as mentioned below, which could affect our business and growth:

- 23. Our Promoters and Directors have provided personal guarantees for financing facilities availed by our Company and may in the future provide additional guarantees and any failure or default by our Company to repay such facilities in accordance with the terms and conditions of the financing agreements could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.**

Our Promoters and Directors Mr. Ankit Agarwal and Mrs. Priyanka Agarwal have personally guaranteed the repayment of certain loan facilities taken by us. Our Promoters may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoters and Directors may be invoked, which could negatively impact the reputation and net worth of our Promoters and Directors. In addition, our guarantors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

- 24. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the offer, which will allow them to determine the outcome of the matters requiring the approval of shareholders.**

As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

- 25. The average cost of acquisition of Equity Shares by our Promoters could be lower than the offer price.**

Our Promoter's average cost of acquisition of Equity shares in our Company is lower than the offer Price of Equity shares as given below:

If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years-built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

In light of these factors, we may not be able to vary the objects of the offer to use any unutilized proceeds of the offer, if any, even if such variation is in the interest of our Company. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

EXTERNAL RISK FACTOR

Risk Relating to India

39. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

40. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

41. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighbouring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

42. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

43. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any

congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

44. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

45. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

46. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

47. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

Risks relating to the Equity Shares and this offer

48. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

49. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

50. *We will continue to be controlled by our Promoter and Promoter Group after the completion of the offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

As on the date of this Prospectus, our Promoter and Promoter Group hold 97.59% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled "*Capital Structure*" beginning on Page 67 of this Prospectus.

51. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

52. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Following the Offer, we will be subject to a daily "Circuit Breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

53. *There is no guarantee that the Equity Shares issued pursuant to the offer will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

55. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

56. *QIBs and Non Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/ offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors and Eligible Employees can revise their Bids during the Bid/ offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete Allotment within six Working Days from the Bid/ Offer Closing Date, or such other period as may be prescribed by the SEBI, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, financial condition or cash flows may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the offer or cause the trading price of the Equity Shares to decline on listing.

57. *Pursuant to listing of the Equity Shares, we may be subject to pre emptive surveillance measures like*

Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization etc. The main objective of these measures is to alert and advise investors to be extra cautious while dealing in these securities and advise market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, networth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

- 58. The determination of the Price Band is based on various factors and assumptions and the offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLM is below their respective offer prices.***

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the offer Price of the Equity Shares will be determined by our Company, in consultation with the Book Running Lead Manager through the Book Building Process.

The offer Price will be based on numerous factors, including the factors described in “Basis for offer Price” on page 101 and may not be indicative of the market price for the Equity Shares after the offer. Further, the BRLM has previously handled issues wherein the market price of the issued shares declined below the offer price of shares within 30 days of their listing and in certain cases continued to trade at a price lower than their offer price on the 180th day from listing. For details of the price information of the past issues handled by the BRLM, see “Other Regulatory and Statutory Disclosures” on page 219.

In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company’s performance. As a result of these factors, there can be no assurance that the investors will be able to resell Equity Shares at or above the offer Price resulting in a loss of all or part of the investment.

Details of Utilization of Issue Proceeds

1. FUNDING OF EXPENDITURE TOWARDS SETTING UP AN ELECTRIC THREE-WHEELER FABRICATION PLANT & PAINTING PLANT

We have established our UP unit in August 2023. Our company intends to deploy net proceeds aggregating upto Rs.441.66 lakhs for Setting up an Electric Three Wheeler Fabrication Plant & Painting Plant. Our company intends to setting up facility for manufacturing electric three wheelers fabrication and painting processes at our existing manufacturing unit situated at Plot No.61, 62 and 63 Gangeshwar paper mills, Dundahera Industrial Area, Bagpat, Uttarpradesh 250101 having area of 29,700 sq.ft. The purchase of plant & machinery for the above plant would cost up to Rs.441.66 lakhs.

Fabrication processes involve transforming raw materials into finished products through various techniques such as cutting, shaping, joining, and finishing. These processes are crucial in manufacturing industries across sectors like automotive, aerospace, electronics, and construction. Here's a brief overview of common fabrication processes:

1. **Cutting:** Cutting involves separating materials into desired shapes and sizes. Techniques include, shearing and laser cutting.
2. **Forming:** Forming alters the shape of materials without removing any material. Techniques include bending and stamping.
3. **Machining:** Machining involves removing material from a workpiece to achieve the desired shape. Common machining processes include drilling, and grinding.
4. **Joining:** Joining processes combine multiple pieces of material to create a single, cohesive structure. Techniques include welding, and adhesive bonding.
6. **Finishing:** Finishing processes improve the surface quality and properties of fabricated parts. This includes processes like painting, coating, polishing, and surface treatments such as anodizing or plating.
7. **Assembly:** Assembly involves putting together fabricated components to create the final product. This may include mechanical fastening, adhesive bonding, or welding.

Each fabrication process has its advantages and limitations, and the choice of method depends on factors such as material properties, desired tolerances, production volume, and cost considerations. Integrating these processes efficiently is essential for achieving high-quality, cost-effective manufacturing.

The **Painting** process is a crucial step in finishing fabricated products, providing both aesthetic appeal and protection against environmental factors. Here's a brief overview:

1. **Surface Preparation:** Before painting, the surface must be properly prepared. This typically involves cleaning the surface to remove dirt, grease, and other contaminants. Additionally, any imperfections such as dents or scratches may need to be repaired through sanding or filling.
2. **Priming:** Priming is often the first step in the painting process. Primers provide a smooth, uniform surface for the paint to adhere to and can also improve corrosion resistance. Primers may be applied using spray guns, brushes, or rollers, depending on the size and complexity of the workpiece.
3. **Paint Application:** Once the surface is primed, the paint can be applied. Common methods of paint application include spray painting, which offers uniform coverage and efficient application, and brush/roller painting, which is suitable for smaller areas or touch-ups. The choice of paint type (e.g., enamel, acrylic, epoxy) depends on factors such as desired finish, durability, and environmental conditions.
4. **Drying/Curing:** After painting, the workpiece must be allowed to dry or cure fully. Drying times vary depending on the type of paint used and environmental conditions such as temperature and humidity. In some cases, curing may involve baking the painted workpiece in an oven to accelerate the curing process and improve paint adhesion and durability.
5. **Finishing:** Once the paint is fully cured, additional finishing steps may be performed to enhance the appearance or properties of the painted surface. This could include applying clear coats for added gloss or protection, buffing or polishing to achieve a smooth finish, or applying decals or stencils for decorative purposes.
6. **Quality Control:** Throughout the painting process, quality control measures are essential to ensure the finished product meets specifications. This may involve inspecting the surface for defects such as runs, sags, or orange peel texture, as well as checking the paint thickness and adhesion.

Properly executed painting processes are crucial for achieving durable, high-quality finishes that meet aesthetic and functional requirements. Adherence to best practices, including surface preparation, paint selection, and application techniques, is essential for successful outcomes.

For our current 3W painted body and chassis procurement, we have collaborated with reputable vendors who also supply body and chassis to other companies. They manufacture the e-rickshaw body and chassis according to our specific requirements and quality standards. Our team conducts onsite quality checks before accepting any materials from the vendors. Additionally, we provide monthly advance projections to ensure timely delivery of materials as per our agreed timelines.

Further, a typical 2W (two-wheeler) consists largely of plastic parts, which are produced using specialized injection molding machines. The high cost associated with these machines is a primary factor in our decision against establishing a dedicated fabrication plant for 2Ws. Additional considerations contributing to this decision include:

1. **New Business Venture:** Setting up these molding operations would almost be equivalent to start a new business endeavor, requiring substantial capital investment.
2. **Production Volumes:** Our current 2W production volumes are insufficient to fully utilize the capacity of an injection molding machine, leading to potential inefficiencies.
3. **Higher Per-Piece Cost:** Establishing a 2W molding plant would increase overhead costs and reduce production efficiency, resulting in higher per-part costs. This would make us less competitive in the market.
4. **Established Suppliers:** There are many established vendors in the market with a proven track record of delivering quality materials at scale. We already have a robust network of suppliers who provide us with high-quality 2W parts at competitive rates. This allows us to serve our customers more effectively and focus on our core competencies, rather than allocating resources to new manufacturing processes.

The total estimated cost comprises the following:

(Amount Rs. In Lakhs)

Sr no.	Particulars	Total Estimated cost	Amount proposed to be deployed in 2025	Amount proposed to be deployed in 2026

However, we phased out three of the two-wheeler models from our portfolio due to reduced demand. Our Commitment towards innovation is evident as we consistently invest in developing new products.

Our Company intends to utilize Up to Rs.2132 lakhs for new product development reflects a significant shift in our strategy and approach to product development.

From 2016 to 2024, we developed a total of 11 vehicles, comprising seven two-wheelers and four three-wheelers. However, we phased out three of the two-wheeler models from our portfolio due to reduced demand. Developing a new electric scooter involves several key steps, each encompassing various tasks and sub-processes. Here is a comprehensive outline of the major steps involved:

1. Designing and Planning:

- **Initial Design Concept:** Create initial sketches and CAD models to visualize the scooter's overall design, including aesthetic and functional aspects.
- **Market Research:** Conduct thorough market research to understand customer needs, preferences, and market trends.
- **Feasibility Study:** Assess the technical, economic, and operational feasibility of the design.
- **Detailed Design:** Develop detailed engineering drawings and specifications for each component of the scooter.
- **Project Planning:** Develop a comprehensive project plan outlining timelines, milestones, and resource allocation for the entire development process.

2. Prototyping, Engineering, and Testing:

- **Component Sourcing:** Identify and procure essential components such as motors, batteries, controllers, and materials.
- **Prototype Development:** Build initial prototypes to evaluate the design and functionality.
- **Engineering Analysis:** Conduct detailed engineering analysis, including structural, thermal, and electrical analysis.
- **Testing:** Perform rigorous testing on prototypes, including performance, safety, and durability tests. Use environmental chambers, dynamometers, and other testing equipment.
- **Iterative Improvement:** Make necessary modifications based on test results and feedback, followed by additional rounds of prototyping and testing.

3. Moulds Development:

- **Design Moulds:** Design moulds for various scooter components such as body panels, plastic parts, and other moulded items.
- **Material Selection:** Choose high-quality materials for mould fabrication to ensure durability And precision.
- **Manufacturing Moulds:** Moulds will be fabricated using CNC machining, casting, or other appropriate manufacturing processes.

4. Chassis Jigs & Fixture:

- **Design Jigs and Fixtures:** Design jigs and fixtures for accurate and repeatable assembly of the scooter chassis.
- **Fabrication:** Manufacture the jigs and fixtures using high-quality materials and precision machining.
- **Calibration:** Calibrate the jigs and fixtures to ensure they meet design specifications and provide consistent results during the assembly process.

5. Development of Lights

- **Lighting Design:** Design headlights, taillights, indicators, and other lighting components, focusing on both aesthetics and functionality.
- **Prototyping:** Create prototypes of the lighting components and test them for performance and compliance with safety standards.
- **Tooling and Production:** Develop the necessary moulds and tools for mass production of the lighting components.
- **Certification:** Obtain necessary certifications for the lighting components to ensure they meet regulatory standards and performance criteria.

6. Development of Seats, Speedometer, Braking System, etc.:

- **Seats:** Design ergonomic and comfortable seats, prototype them, and conduct user testing for comfort and durability. Develop production tooling for mass production.
- **Speedometer:** Design and develop digital speedometers, including the necessary sensors and display units. Conduct testing to ensure accuracy and reliability.
- **Braking System:** Design and test braking systems, including hydraulic or mechanical brakes, brake pads, discs, and associated components. Ensure they meet safety standards and performance requirements.
- **Integration:** Ensure seamless integration of these components into the scooter, considering factors like wiring, mounting, and compatibility with other systems.

7. Integration of Telematics:

- **Hardware Selection:** Choose telematics hardware such as GPS modules, communication modules, and

sensors.

- **Software Development:** Develop the software platform for telematics, including user interfaces, data analytics, and backend infrastructure.
- **System Integration:** Integrate telematics hardware and software with the scooter's electrical and communication systems.
- **Testing and Validation:** Conduct extensive testing to ensure the telematics system operates reliably, collects accurate data, and integrates seamlessly with other scooter systems.

8. Final Testing & Rework:

- **Comprehensive Testing:** Perform final rounds of testing, including performance, safety, compliance, and reliability tests.
- **Field Trials:** Conduct field trials to gather real-world performance data and user feedback.
- **Rework:** Address any issues identified during final testing, including modifications to design, components, or manufacturing processes. Implement necessary changes and re-test as needed.

9. Approval of Lights and Vehicles from Testing Agencies like ICAT Manesar and Allied Paperwork:

- **Regulatory Compliance:** Ensure the scooter meets all local and international regulatory standards for safety, emissions, and performance.
- **Testing and Certification:** Submit the scooter and its components (such as lights) for testing at authorized agencies like ICAT (International Centre for Automotive Technology) in Manesar. This involves rigorous testing to verify compliance with standards.
- **Documentation:** Prepare and submit detailed technical documentation required for regulatory approval, including test reports, design specifications, and compliance statements.
- **Approval Process:** Work with regulatory bodies to obtain necessary approvals and certifications for the vehicle and its components

Current New Product Development Approach:

Earlier we were importing key parts such as plastic components, lights, chassis, and seats from China, which are then assembled in India to create our products. Since the moulds for these parts are owned by some other company, the same plastic parts, lights, and other components are available to other companies, resulting in similar designs across different scooter brands. This makes it challenging to stand out in the market.

Future Strategy for New Product Development:

Moving forward, our strategy is to manufacture these parts domestically as part of the "Make in India" initiative. We will develop our own moulds for plastic parts and lights, as well as jigs and fixtures for chassis production. A big part of our investment will go into manufacturing of these moulds and jigs & fixtures. This should help us reduce the cost of plastic parts by about 15-20%. By making these parts in India, we will also qualify for government subsidies like PM E-Drive or FAME, which require components like plastic parts, lights, chassis, and seats to be made locally. These subsidies will help us stay competitive in the market.

By creating new original designs, we will own the design rights and trademarks, ensuring that no other company can produce these models. This will help us differentiate our products from competitors and provide us with greater control over quality, enabling us to tailor parts to the specific needs of the Indian market.

As outlined in the cost breakdown table below, more than 80% of the total new product development expense of Up to ₹2132 lakhs will be allocated to capital expenditure i.e. developing physical moulds for plastic parts, lights, and jigs & fixtures for the chassis. Additionally, 7.00% of the New Development Product expense will be used for product approval expenses which is mandatory for regulatory compliance and product certification.

This investment of Up to ₹2132 lakhs is crucial for the company's long-term growth and market differentiation. Developing our own moulds, fixtures, and unique designs will put us in a strong position to lead as the EV

industry evolves.

The following is the breakup of the development cost.

Rational for Increase in working capital requirement for the last three years, stub period and estimated period

1. The Revenue from Operations of our company for fiscal year 2022 was ₹ 5,713.39 Lakhs against ₹ 1,666.71 Lakhs for Fiscal year 2021. An increase of 242.79% in revenue from operations. This significant increase was due to introduction of two-wheeler segment by introducing a new model “Deltic Costa” in March 2021 fostering the sales in 2022. Moreover, this two-fold increase in revenue was majorly because of the recovery in automobile industry post-pandemic which help us to increase our customer base from 92 dealers to 211 dealers during the year. The Revenue from Operations of our company for fiscal year 2023 was ₹ 8,001.98 Lakhs against ₹ 5,713.39 Lakhs for Fiscal year 2022. An increase 40.06% in revenue from operations. The significant increase was contributed by the launch of two new high speed scooter models, the Deltic ZGS” and the “Deltic Trento”, on April 22 and October 22 respectively, Further, boost to revenue was given by our flagship scooter Deltic Legion launch way back in December 2021. The company’s 3-wheeler segment also saw growth in FY 2022-23, reaching ₹3773.65 lacs from ₹1826.22 lacs, primarily driven by increase in dealers by 51% to 124 from 82 ultimately leading to new market expansion, enhanced brand visibility, and strong organic growth.”
2. The closing inventory of the company has gradually increased from Rs. 379.08 lakhs in FY 2020-21 to Rs. 1368.49 lakhs in FY 2021-22 and Rs. 1355.27 lakhs in FY 2022-23. Closing inventory for FY 2023-24 is Rs. 1741.84 lakhs and for As at October 31, 2024 is Rs.1,833.41 Lakhs and Estimated FY 2024-25 and FY 2025-26 is Rs 2108.42 lakhs and 2635.53. The increase in inventory is in line with the increase in turnover and for this significant increase in inventory require a significant working capital.
3. Short term loan and advances has gradually increased from Rs 359.46 lakhs in FY 2020-21 to Rs 563.39 lakhs in FY 2021-22 and Rs. 432.62 lakhs in FY 2022-23. Closing Short term loan and advances for FY 23-24 is Rs. 960.94 lakhs and As at October 31, 2024 is Rs. 1750.14 lakhs Estimated for FY 24-25 is Rs 1,575.13 lakhs and for FY 2025-26 is Rs 1,968.91 lakhs. Short term loans and advances of the company which mainly comprises of Advances paid to Vendors and Employees and for contracts being executed or under process. The gradual increase in short term loans and advances indicates a growing need for working capital to sustain current operations, support anticipated growth, and manage financial obligations effectively. It underscores the importance of proactive financial management and strategic planning to ensure the company's financial health and operational continuity.
4. The company is in the process of launching 5 new models in the market, which includes passenger scooters, delivery scooters and motorcycles. The organization will be able to cater a diverse base of customer across different target groups basis these new models. Since, it is clearly evident from the figures of turnover, inventory, and other current assets that to smoothly run the operations of the company, and grow the business for this the company needs to have an enhanced amount of working capital in the form of inventories, Advances and BG’s for contracts to be executed or under process.
5. In Fiscal 2023, Cost of Raw Materials Consumed was ₹ 6,263.32 lakhs against 4,358.76 in fiscal 2022. This increase of 43.69% was in line with the production and sales of our EV’s. The cost of materials consumed reflects the cost of raw materials used in the production of our EV’s, and represented 77.75% and 75.76% of our total income for Fiscals 2023 and 2022, respectively. The higher cost of raw materials indicates a need for increased working capital to finance the purchase and storage of these materials.
6. In Fiscal 2023, our Company incurred for employee benefit expenses ₹ 461.52 Lakhs against ₹ 260.52 Lakhs expenses in fiscal 2022. The increase of 77.15%. The increase in employee expenses suggests a need for additional working capital to cover higher payroll costs, including salaries, benefits, and other

related expenses. This is essential to retain and attract skilled talent necessary for the company's operations and growth.

7. The company's trade payable days have fluctuated, indicating changes in how long it takes to pay suppliers. Starting at 9 days in , and then rising to 11 days in 2023 suggests gradual adjustments in payment strategies. The increase to 15 days from April to July 2023 and further to 21 days upto March 24. It may reflect extended payment terms to manage cash flow better amid supply chain pressures or increased procurement costs. The subsequent reduction to 21 days in 25-26 points to efforts to maintain good supplier relationships or improve financial stability by receiving cash discount from suppliers. To improve our trade payable holding days and better relationship with our supplier company required additional working capital.
8. The company's trade receivable days, ranging from 1 day in 2021 to 33 days by FY 25-26, show increasing fluctuations despite its policy of primarily taking advance payments from customers. The very low days in 2021 and 2022 align with this policy, reflecting rapid payment cycles. However, the increase to 2 days in mid-2023 and to 7, and 24 days there after suggests rare instances where the company extends credit terms beyond its usual practice. This is due to strategic decisions to accommodate select customers or larger contracts that require flexibility, despite a generally short credit period of 2-3 days. The trend indicates the company's adaptability in managing customer relationships and cash flow in the competitive electric vehicle industry. Increased credit period will increase the demand of working capital.
In the case of Conversion of LLP to Company, Partners' Contribution account (both current and fixed capital) are presented as a part of Shareholders funds, which generally includes regular transaction of Receipt and withdrawals made by the partners. Hence, it can be expected that movement in capital balances does not arouse purely from the profits earned during the year, but also from net contribution made by the partners. Also, Internal accruals represent the available cash generated from business operations, free from the influence of non-cash items such as depreciation, amortization, and written-off balances. These non-cash expenses reduce the net worth on the balance sheet but do not impact the cash flow, thereby allowing internal accruals to be higher Eventually Internal accrual seems higher for the from April 2023 - July 2024.

GLOBAL ECONOMIC OUTLOOK

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side offers and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

INDIA MACROECONOMIC TRENDS & OUTLOOK

GDP and GDP Growth

The real GDP in Q1 of 2023-24 registered a YoY growth of 7.8% over the previous year. Sequentially, the real GDP in Q1 of 2023-24 registered a growth of 7.8% as compared to 13.1% in Q1 of 2022-23, indicating the sustenance of growth momentum in the financial year. These estimates reaffirm the ability of the Indian economy to grow on the strength of its domestic demand even as a rise in global uncertainties slow global output. India's real GDP expanded by 7.2% in FY23, the highest among major economies.

The country has transitioned to a modern economy, wherein it has become more globally integrated and exports a fifth of its output, compared to one-sixteenth at the time of independence. India also benefits from the demographic transition with the help of a lower infant mortality rate and a steady increase in the literacy rate. Therefore, with more equitable income distribution, better employment levels, and globally comparable social amenity provision, India's per capita GDP may expand in the next 25 years as it did in the previous 75 years.

The outlay for capital expenditure in 2023-24 (BE) increased sharply by 37.4% from Rs. 7.28 lakh crore (US\$ 89 billion) in the previous year (2022-23) to Rs. 10 lakh crore (US\$ 120 billion). The resilient growth of the Indian economy in the first half of FY23 has been the fastest among major economies, thereby strengthening macroeconomic stability.

Recently in 2023-24, the following key frequency indicators highlighted improved performances:

- Private consumption stood at 57.3% of the nominal GDP in Q1 of FY24 and 60.6% in FY23, supported by a rebound in contact-intensive services such as trade, hotel, and transport.
- The growth in the agriculture sector continues to remain buoyant, with healthy progress in Rabi sowing, with the area sown increased by 3.25% from 697.98 lakh hectares in 2021-22 to 720.68 lakh hectares in 2022-23. To further boost production and support farmers' income, higher Minimum Support Prices (MSPs) have been announced for the upcoming Rabi Marketing Season (RMS 2023-24) in the range of 2.0 to 9.1%.
- CPI inflation decreased in October 2023 to 4.87% from 5.02% in September 2023, with a decrease in food inflation.
- PMI Services witnessed an uptick and expanded to 55.5 in October 2023.
- The consumption of petroleum products during April-October 2023 was with a volume of 1,335.54 MMT.
- India's Index of Industrial Production (IIP) for September 2023 stood at 141.6 against 145.1 for August 2023.
- In FY24, the combined index of eight core industries stood at 154.1 during April-September 2023.

India's economy grew faster during the first half of FY23 than other economies, driven by strong demand and investment. Inflationary pressures have been moderating since October, with CPI inflation tempering to an eleven-month low in November. On top of that, it has fallen below the RBI's upper target band for the first time in 2022, mainly driven by the decline in food inflation. Furthermore, inflation expectations have also moderated in the November round of the RBI's Households' Inflation Expectations Survey. This bodes well for augmenting consumption in rural and urban regions in the upcoming months. Improvement in business and consumer sentiment is also likely to bolster discretionary spending. The real investment rate during Q2 of FY23 prevailing at a high level of 34.6% demonstrates the Government's continued commitment towards asset creation.

FISCAL DEVELOPMENTS IN INDIA

The Union Government finances have shown a resilient performance during the year FY23, facilitated by the recovery in economic activity, buoyancy in revenues from direct taxes and GST, and realistic assumptions in the Budget. The Gross Tax Revenue registered a YoY growth of 15.5% from April to November 2022, driven by robust growth in the direct taxes and Goods and Services Tax (GST).

Growth in direct taxes during the first eight months of the year was much higher than their corresponding longer-term averages. GST has stabilized as a vital revenue source for central and state governments, with the gross GST collections increasing at 24.8% on YoY basis from April to December 2022. Union Government's emphasis on capital expenditure (Capex) has continued despite higher revenue expenditure requirements during the year. The Centre's Capex has steadily increased from a long-term average of 1.7% of GDP (FY09 to FY20) to 2.5% of GDP in FY22 PA.

The Centre has also incentivized the State Governments through interest-free loans and enhanced borrowing ceilings to prioritize their spending on Capex. With an emphasis on infrastructure-intensive sectors like roads and highways, railways, and housing and urban affairs, the increase in Capex has large-scale positive implications for medium-term growth. The Government's Capex-led growth strategy will enable India to keep the growth-interest rate differential positive, leading to a sustainable debt to GDP in the medium run.

MONETARY MANAGEMENT & FINANCIAL INTERMEDIATION: A GOOD YEAR

- The RBI initiated its monetary tightening cycle in April 2022 and has since raised the repo rate by 225 bps, leading to moderation of surplus liquidity conditions.
- Cleaner balance sheets led to enhanced lending by financial institutions.
- The growth in credit offtake is expected to sustain, and combined with a pick-up in private capex, will usher in a virtuous investment cycle.
- Non-food credit offtake by scheduled Commercial Banks (SCBs) has been growing in double digits since April 2022.
- Credit disbursed by Non-Banking Financial Companies (NBFCs) has also been on the rise.
- The Gross Non-Performing Assets (GNPA) ratio of SCBs has fallen to a seven-year low of 5.0.
- The Capital-to-Risk Weighted Assets Ratio (CRAR) remains healthy at 16.0.
- The recovery rate for the SCBs through Insolvency and Bankruptcy (IBC) was highest in FY22 compared to other channels.

CLIMATE CHANGE & ENVIRONMENTAL PROTECTION STEPS TAKEN BY INDIA

- India declared the Net Zero Pledge to achieve net zero emissions goal by 2070.
- India achieved its target of 40% installed electric capacity from non-fossil fuels ahead of 2030.
- The likely installed capacity from non-fossil fuels to be more than 500 GW by 2030 resulting in decline of average emission rate by around 29% by 2029-30, compared to 2014-15.
- India to reduce emissions intensity of its GDP by 45% by 2030 from 2005 levels.
- About 50% cumulative electric power installed capacity to come from non-fossil fuel-based energy resources by 2030.
- A mass movement LIFE– Life style for Environment launched.
- Sovereign Green Bond Framework (SGrBs) issued in November 2022.
- RBI auctions two tranches of Rs. 4,000 crore (US\$ 488.7 million) Sovereign Green Bonds (SGrB).
- National Green Hydrogen Mission to enable India to be energy independent by 2047.
- Green hydrogen production capacity of at least 5 MMT (Million Metric Tonne) per annum to be developed by 2030. Cumulative reduction in fossil fuel imports over Rs. 1 lakh crore (US\$ 12.2 billion) and creation of over 6 lakh jobs by 2030 under the National green Hydrogen Mission. Renewable energy capacity addition of about 125 GW and abatement of nearly 50 MMT of annual GHG emissions by 2030.
- The Survey highlights the progress on eight missions under the NAP on CC to address climate concerns and promote sustainable development.
- Solar power capacity installed, a key metric under the National Solar Mission stood at 61.6 GW as of October 2022.
- India becoming a favored destination for renewables; investments in 7 years stand at US\$ 78.1 billion.
- 62.8 lakh individual household toilets and 6.2 lakh community and public toilets constructed (August 2022) under the National Mission on Sustainable Habitat.

Key Macroeconomic Growth Drivers

India is on track to become the world's third largest economy by 2027, surpassing Japan and Germany, and have the third largest stock market by 2030, thanks to global trends and key investments the country has made in technology and energy. These are the following factors: -

- **Transformation of India's job market through Tier-2 & Tier-3 cities**

India's job landscape is shifting from Tier-1 cities to Tier-2 and Tier-3 cities, which are now becoming significant talent hubs. The rise of remote work, better skill development prospects in Tier-II cities, and the expansion of various industries to these areas are driving recruiter's interest. Sectors like telecom, consumer electronics, retail, and banking are broadening job prospects for tech professionals outside major cities. This expansion is fueled by the rapid 5G roll-out and enterprises prioritizing digitalizing of operations.

(Src: <https://www.tpci.in/indiabusinesstrade/blogs/transformation-of-indias-job-market-through-tier-2-3-cities/>)

- **Manufacturing Boost**

Government of India has undertaken various steps to promote manufacturing sector and to boost domestic and foreign investments in India. These include introduction of Goods and Service Tax, reduction in corporate tax, interventions to improve ease of doing business, FDI policy reforms, measures for reduction in compliance burden, policy measures to boost domestic manufacturing through public procurement orders, Phased Manufacturing Programme (PMP).

(Src: <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1882145>)

- **Generating Productive Jobs**

Capitalizing on a skilled workforce will require India to increase women's workforce participation and generate more productive jobs. SMEs employ around 40 per cent of India's workers.⁸ They make up a disproportionate share of India's economy and remain relatively inefficient, low skilled and rural-based. SMEs account for more than 80 per cent of industrial firms compared to 65 per cent in Indonesia and 25 per cent in China. However, across all sectors, India's smallest firms are only 25 to 65 per cent as productive as their peers across Asia. Firms that employ more than 200 people in India tend to be as

productive as comparable firms across Asia. The preponderance of SMEs is a factor holding back India's productivity.

(Src: <https://www.dfat.gov.au/publications/trade-and-investment/india-economic-strategy/ies/chapter-1.html>)

- **Urbanization**

Urbanization is driving a shift in India's workforce from lower productivity (agriculture) to higher productivity sectors (services and industry). Since 1950, the proportion of Indians living in urban areas has almost doubled, reaching 33 per cent in 2015. However, India's urbanisation rate remains low compared to other emerging economies (Figure 8). The United Nations projects that India's urbanization rate will rise to 42 per cent by 2035, lifting the urban population from 64 million in 1950 to 640 million.

OUTLOOK ON INDIAN AUTOMOTIVE INDUSTRY

India is the world's third-largest automobile market, the largest manufacturer of three-wheelers, passenger vehicles, and tractors, and the second-largest manufacturer of two-wheelers.

The Indian automobile industry has historically been a good indicator of how well the economy is doing, as the automobile sector plays a key role in both macroeconomic expansion and technological advancement. The two-wheelers segment dominates the market in terms of volume, owing to a growing middle class and a huge percentage of India's population being young. Moreover, the growing interest of companies in exploring the rural markets further aided the growth of the sector. The rising logistics and passenger transportation industries are driving up demand for commercial vehicles. Future market growth is anticipated to be fuelled by new trends including the electrification of vehicles, particularly three-wheelers and small passenger automobiles.

India automotive market size 26Mn vehicles and is central to the economy

India enjoys a strong position in the global heavy vehicles market as it is the largest tractor producer, second-largest bus manufacturer, and third-largest heavy truck manufacturer in the world. India's annual production of automobiles in FY22 was 22.93 million vehicles. India has a strong market in terms of domestic demand and exports. In November 2023, total passenger vehicle sales reached 3,34,130*. Sales of Passenger Vehicles in November 2023 have been the highest, with a marginal growth of 3.7%, compared to November 2022. In FY23, total automobile exports from India stood at 47,61,487. This sector's share of the national GDP increased from 2.77% in 1992-1993 to around 7.1% presently. It employs about 19 million people directly and indirectly.

(Src: <https://www.ibef.org/industry/india-automobiles>)

India is also a prominent auto exporter and has strong export growth expectations for the near future. In addition, several initiatives by the Government of India such as the Automotive Mission Plan 2026, scrappage policy, and production-linked incentive scheme in the Indian market are expected to make India one of the global leaders in the two-wheeler and four-wheeler market by 2022.

TRENDS IN ELECTRIC VEHICLE INDUSTRY

Global Electric Vehicle Industry

Over 2.3 million electric cars were sold in the first quarter, about 25% more than in the same period last year. Electric Vehicles Initiative currently expect to see 14 million in sales by the end of 2023, representing a 35% year-on-year increase with new purchases accelerating in the second half of this year. As a result, electric cars could account for 18% of total car sales across the full calendar year. National policies and incentives will help bolster sales, while a return to the exceptionally high oil prices seen last year could further motivate prospective buyers.

Electric car sales are generally low outside the major markets, but 2022 was a growth year in India, Thailand and Indonesia. Collectively, sales of electric cars in these countries more than tripled compared to 2021, reaching 80 000. For Thailand, the share of electric cars in total sales came in at slightly over 3% in 2022, while both India and Indonesia averaged around 1.5% last year. In India, EV and component manufacturing is ramping up,

supported by the government's USD 3.2 billion incentive programme that has attracted investments totalling USD 8.3 billion. Thailand and Indonesia are also strengthening their policy support schemes, potentially providing valuable experience for other emerging market economies seeking to foster EV adoption.

To keep up with the growing demand, several auto makers have started investing heavily in various segments of the industry during the last few months. The automobile sector received a cumulative equity FDI inflow of about US\$ 35.40 billion between April 2000 - September 2023. India is on track to become the largest EV market by 2030, with a total investment opportunity of more than US\$ 200 billion over the next 8-10 years.

Under the IEA Stated Policies Scenario (STEPS), the global outlook for the share of electric car sales based on existing policies and firm objectives has increased to 35% in 2030, up from less than 25% in the previous outlook. In the projections, China retains its position as the largest market for electric cars with 40% of total sales by 2030 in the STEPS. The United States doubles its market share to 20% by the end of the decade as recent policy announcements drive demand, while Europe maintains its current 25% share.

Global Two-Wheeler Market

The two-wheeler market is projected to have a compound annual growth rate of 8.7 percent through 2029 when it will reach a value of about \$218 billion. Although relatively few two-wheelers are now electric, this could soon change. In India, for instance, only about 4 percent of two-wheeler sales in 2021 were electric. Worldwide, however, we project that 30 percent of two-wheelers will be electric by 2030.

While China and the developing world concentrate on smaller, typically work- or transportation-focused machines, North America (excluding Mexico) and Europe are more bifurcated, with premium brands selling more than 500 cubic capacity products. These luxury and high-performance machines stretch into the heavyweight and superheavyweight segments, which consumers typically buy for recreational and sporting purposes. Many of the established brands in these segments have been slow to introduce electric versions of their machines, although some are finally developing their first electric models. Newcomers sensing a market entry opportunity in these potentially lucrative segments have led the way so far. However, cost premiums and range offers linked to battery chemistry and a lack of purchasing scale pose real barriers to converting die-hard high-performance and long-distance riders.

Automotive Electrification in India is being led by 2Ws

India is experiencing a remarkable surge in the sales of electric two-wheelers (E2Ws), signalling a transformative shift towards sustainable mobility. One of the key driving forces behind this growth is the range of incentives and government support provided to promote the adoption of electric vehicles (EVs).

All automotive vehicle segments are witnessing the electrification wave. Shared mobility segments (3Ws, commercial vehicles and taxis) are undergoing electrification to achieve better operating economics (than ICE). eCommerce and logistics players have adopted EV fleets as part of their decarbonization commitments. Central and state governments are boosting the electrification of public buses. 3Ws are getting electrified on the back of exemptions from registration and road taxes.

Within personal mobility segments (2Ws and private 4W-Passenger Vehicles), 2Ws are well positioned to lead the electrification wave in India, unlike many developed markets. This is because of high sensitivity of Indian consumers to the initial vehicle prices of EVs versus ICE vehicles (given the lower GNI per capita vs the developed markets).

India's E2W sales post 36% jump in 2023, crossed 8-lakh mark as adoption rates go up

As per VAHAN data, total electric vehicle retail sales in 2023 accounted for around 7% of total automobile sales in India despite a reduction in FAME subsidy

(Src: <https://www.moneycontrol.com/news/business/indias-e2w-sales-cross-8-lakh-mark-in-2023-as-adoption-rates-go-up-11989961.html>)

E2Ws have seen an accelerated adoption journey in India, with the penetration increasing over 6x between FY 2021 and FY2022 and over 2x between FY 2022 and FY 2023, to reach penetration levels of ~4.5% of the 2W registrations reported on the Vahan Dashboard (MoRTH) in FY 2023. It has increased further to ~5.1% in H1 FY 2024. E2W registrations (and subsequently penetration as % of overall 2W registrations) were marginally lower in Q2 FY2024 than the previous quarter due to reduction in FAME subsidy, effective from June 2023.

India is one of the world's fastest-growing markets for Electric Two-Wheelers (E2Ws). The two-wheeler segment dominates the Indian automobile market, accounting for more than 70% of all registered vehicles. E2Ws are a convenient and efficient mode of transportation for short-distance travel, especially in cities. In India, the two-wheeler segment accounts for more than 50% of all petrol transactions. Two-wheelers are utilized in commercial applications such as logistics fleets for food and groceries, parcel and courier services, and passenger transport-related services. Two-wheelers that can effectively negotiate traffic are also being tested for first and last-mile connection via shared trips and bike taxi services. According to a study, electric two-wheeler sales penetration in India might surpass 80% by 2030.

The below line graph depicts the registered E2W sales between December 2021 to March 2023. It clearly illustrates the rising trajectory of E2W penetration in the Indian economy. In the month of March 2023, 86,067 registered E2W sales were recorded by the Society of Manufacturers of Electric Vehicles (SMEV).

Key Players and Vehicle Category of the Electric Two-Wheeler Industry in India

As depicted in the left graph, the pie chart represents the market share of the top 7 largest private players offering E2W in the month of December 2022-23 in the Indian EV industry. Ola has the largest market share of 26% followed by TVS (14.5%) and Hero Electric with 12.5%.

As illustrated in the below donut chart, represents the vehicle category of electric two-wheeler models. Level 1 (L1) i.e., the low-speed E2W acquire 65.2% of the as compared to Level 2 (L2) i.e., the high-speed E2W.

OPPORTUNITIES

Low cost of ownership

Any product or service must be affordable to be successful in India. The affordability of 2W among Indian households has been constrained by rising Total Cost of Ownership (TCO) and rising petrol prices, which have increased by 60% over the last five years. This is crucial for Indian users while deciding between EV and ICE 2W. The E2W makes economic sense for the Indian 2W users, as the total cost of ownership (TCO) is 20- 70% lower than an ICE equivalent 2W. Thus, the spurring demand for electric two vehicles is due to their greater efficiency and lower cost of electricity for charging it as compared to petrol or diesel.

Accelerated Last mile deliveries

Over the years, there has been a significant increase in last-mile deliveries, and the pandemic has pushed this dependence even further on doorstep delivery. To meet this demand, last-mile delivery companies are increasingly turning to E2Ws, which offer a compelling economic proposition. Furthermore, E2Ws have a lot of potential for making the future more sustainable. As a result, these players are increasing the adoption of E2Ws

Battery suited for busy cities

For many decades, two-wheelers (2Ws) have been the preferred means of transportation for cost-conscious Indians. This is due to their ease of manoeuvring on packed roads, reduced carbon emissions, and higher fuel efficiency. As a result, they are a cost-effective alternative to public transportation and 3 or 4-wheelers.

India's Green Goals

At the COP26 Summit in 2021, Prime Minister Mr. Narendra Modi declared that India would cut its anticipated carbon emissions by one billion tonnes until 2030. In order to achieve this goal, India is moving towards the electric revolution by making electric cars the preferred form of transportation for most commuters.

GOVERNMENT INITIATIVES

FAME Scheme

The Government of India introduced the National Electric Mobility Mission Plan (NEMMP) 2020 in 2013 to offer a vision and roadmap for EV adoption and manufacture in the nation. The Faster Adoption and Manufacturing of (Hybrid &) Electric Vehicles (FAME) initiative was introduced as part of this strategy in 2015. The programme has since been extended to 2024 with a budget of US\$ 1.3 billion. The budget includes funds for the construction of charging stations as well as up-front incentives to lower the cost of purchasing vehicles. The government has also granted US\$ 122.05 million (Rs. 1,000 crore) incentives for the development of EV charging stations under the FAME II scheme. In 68 cities across India, 2,877 public charging stations have been installed. There will be 1,576 stations installed over 9 expressways and 16 highways. Other than these public charging stations, private players (such as Ather Energy, Charzer, Statiq, and others) have added 3000 charging stations.

Production Linked Incentives (PLIs) for Advance Chemistry Cells (ACC)

The government has invested around US\$ 2.5 billion to this incentive scheme, which seeks to establish local manufacturing capacity of 50 GWh of ACC and 5 GWh of niche ACC capacity (planned). The programme intends to improve exports and generate economies of scale, helping big domestic and international manufacturers develop a competitive ACC battery production in India. To receive incentives under the programme, the government has agreements in place with three bidders, namely Reliance New Energy Solar, Ola Electric, and Rajesh Exports.

Production Linked Incentives (PLIs) for Automobiles and Auto Components

The Programme provides financial incentives to boost local manufacturing and attract investors into the car manufacturing industry's value chain. This plan intends to lower costs and provide a reliable supply chain for goods made with cutting-edge automotive technology. The approved candidates, in addition to commercial entities from India, also came from Japan, Germany, the United States, the United Kingdom, and the Republic of Korea, Ireland, France, Belgium, the Netherlands, and Italy

Union Budget 2023

- Basic customs duty exemption on the importation of machinery used in the manufacture of lithium-ion batteries used in EVs, as well as vehicle parts and subsystems.
- Customs duty on lithium-ion batteries is being reduced from 21% to 13%.
- Concessional basic customs taxes are being extended for electric vehicles and hybrid batteries.
- Additional funding has been allocated to support the recycling of old vehicles.
- The emphasis is on promoting the production of green hydrogen and biogas.

Battery Waste Management Rules

The Ministry of Environment, Forest, and Climate Change published the Battery waste Management Rules in 2022 to ensure that battery waste is handled in an environmentally responsible manner.

The regulations stimulate the establishment of new firms and entrepreneurship in the collection, recycling, and repair of spent batteries. By demanding a minimum degree of material recovery from used batteries in the recommendations, new technologies, investments, and business opportunities will be brought to the recycling and refurbishment sector.

Battery Swapping Policy (Draft)

In order to improve the efficient and effective use of resources (public funds, land, and raw materials for advanced cell batteries) for the provision of customer-centric services, NITI Aayog designed the draft of battery swapping policy. EVs with swappable batteries are eligible for the same incentives as electric vehicles with fixed batteries installed from the factory. According to the proposed legislation, the size of the incentive would be determined by the kWh rating of the battery and compatible EV.

Road Ahead

Over the last ten years, India has emerged as one of the world's most favoured places for producing high-quality automotive components and automobiles of all types, closing the gap with numerous established countries in the process. Due to the relative cost and ease of two-wheelers, they have historically led in terms of growth and penetration among the major vehicle categories in India. A high degree of market penetration for electric-powered

two-wheelers should be achieved as EVs represent the future of the mobility sector. Collectively, such government interventions have the potential to trigger a paradigm shift in the ecosystem that would increase the use of renewable energy in the domestic industry and increase consumer adoption of new and novel technology.

We manufacture and sell 2W & 3W EVs using cutting edge components procured from reputed Original Equipment Manufacturers (OEMs) who use design & engineering specifications given by us. We supply specific components designed and compatible for our vehicles. Our Company operating under the brand name "Deltic". Specializing in the production of Electric 2W and 3W vehicles, our journey began with the establishment of Delta Autocorp LLP in 2016 by our visionary promoter Mr. Ankit Agarwal. Initially concentrating on the development of electric 3W prototypes, we marked a significant milestone in 2017 with the launch of our first E-Rickshaw, boasting an impressive mileage of over 150 Kms. This not only contributed in our successful launch but also enabled E-Rickshaw drivers to enhance their daily earnings significantly. Furthermore, our Research and Development (R&D) Department has implemented several enhancements, including refining the aerodynamic structure of E-rickshaws for optimal performance even on hilly terrains. Additionally, we have boosted the torque, improved strength & durability by using stronger metallurgy, and improved the gradability to a range of 7 to 10 degrees in our E-Rickshaws. These notable advancements contribute significantly to meeting the evolving demands of the market.

After observing market dynamics and adapting to changing customer preferences, we strategically broadened our product range to include electric 2W vehicles. The year 2018 saw the commencement of prototype development for electric 2W, and in 2019, we proudly unveiled our inaugural electric 2W model. We identified a whitespace in Bharat i.e. tier-2, tier 3 towns of India and beyond where customers wanted an affordable yet sturdy scooter without compromising on the looks. Hence, we launched well designed full scooters suitable to run on Indian roads with high ground clearance, good footboard space, and a large seat at very reasonable price coming at a very pocket friendly price. Moreover, in the interest of longevity, cost efficiency, and customer safety we are transitioning to Lithium Ferro Phosphate (LFP) batteries from Nickel-Manganese-Cobalt (NMC) batteries.

Our commitment to innovation and meeting consumer demands has driven our continued success in the market. OUR STRATEGIES

Our Business objective is to grow our revenues and Profit. Our Business strategy focuses on the following elements:

New Product Development Philosophy:

We will continue to add new design to our existing product portfolio to cater to various customer and price segments in the markets. We endeavor to maintain the quality of our products, and follow strict procedures to ensure quality control, and competitive prices. The company intends to strengthen its product development effort by leveraging skills of its employees and focusing on changing trends in the designs and customers demand, which will help to increase the sales of the Company.

Network Expansion:

In a strategic move towards network expansion, our organization has outlined a comprehensive plan to establish a robust network of more than 800 dealers across the length and breadth of the country in the next 5 years. This ambitious initiative involves a systematic approach, aiming to add 30 new dealers every quarter. By adopting a quarterly growth strategy, we aim to steadily and consistently increase our dealer base, enhancing our reach and market presence. This expansion plan reflects our commitment to creating a widespread and accessible network, providing our products or services to a broader audience while fostering mutually beneficial partnerships with new dealers.

Branding and Marketing:

Implementing a comprehensive marketing strategy is vital for brand success in the digital age. Targeted digital campaigns serve as a cornerstone, allowing brands to engage with their audience on various online platforms. By harnessing the power of social media, search engines, and other digital channels, companies can tailor their messages to specific demographics, ensuring a more personalized and impactful reach. Moreover, forging influencer tie-ups adds an authentic touch to the brand narrative, creating a closer connection with the masses. Influencers act as relatable faces, endorsing products in a way that resonates with their followers. Additionally, collaborating with regional stars or celebrities enables brands to tap into the unique and diverse cultural nuances of different locales. Leveraging local celebrities helps establish a more profound connection with the community, fostering trust and loyalty. Our marketing strategy is to reach the end consumer through the most effective media below the line mediums like road-shows, mic activities, canopy activities, etc. This helps us establish marketing & branding channels across the last mile reach. In essence, a combination of targeted digital campaigns, influencer partnerships, and regional celebrity endorsements forms a robust marketing approach that not only boosts brand visibility but also creates a more meaningful and localized impact.

Strategic Tie Ups with Government:

Our company is exploring opportunities for selling innovative products such as the Electric Garbage Cart (Garbo), E-scooter, and E-rickshaw to the Government. We have registered with the Gujarat Energy Development Agency (GEDA) subsidy scheme. The Gujarat Energy Development Agency (GEDA) scheme, initiated by the Gujarat

government, aims to promote the adoption of electric vehicles (Evs) within the state. Under this scheme, the Gujarat government provides a subsidy of ₹10,000 to Students in 9th to 12th standard purchasing electric vehicles.

To facilitate this process, the government requires Original Equipment Manufacturers (OEMs) to submit a bank guarantee (BG) every year. While this scheme does not directly benefit manufacturers, it effectively reduces the purchase price for end customers. This reduction is expected to boost sales, thereby increasing revenue for dealers and ultimately benefiting manufacturers through higher sales volumes.

These represent a significant step towards establishing mutually beneficial partnerships that align with our commitment to providing sustainable and efficient urban mobility solutions. The Garbo, an exemplary product in our portfolio, offers a unique blend of convenience and eco-friendliness, making it an ideal choice for modern urban waste transportation needs. Additionally, our engagement in E-scooter and E-rickshaw distribution underscores our dedication to fostering clean and accessible transportation alternatives. We are optimistic that these discussions will lead to collaborations that not only drive economic growth but also contribute to the overall advancement of environmentally conscious mobility solutions in collaboration with the government.

Deltic Service Center:

Our company already has service centers at all our more than 300 dealers. We have plans to establish service centers EV Hub, where our dealers will offer maintenance and repair services not only for Deltic vehicles but also for other brands' vehicles and components, including child parts. This strategic initiative aims to not only attract more customers to our dealerships but also generate service revenue promptly, ensuring their sustainability. We envision the opening of over 800+ Deltic service outlets in the next 5 years as part of our commitment to providing comprehensive and efficient service solutions.

3W Controller

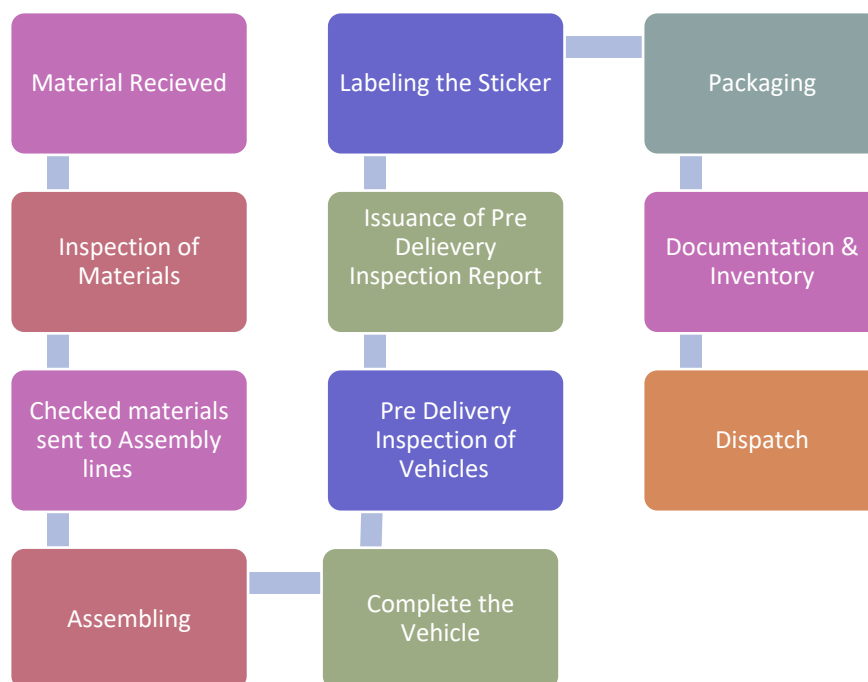

A controller is a device that manages the communication between different parts of a 3W. It is an electronic circuit that controls the speed of the motor in an electric scooter. It receives input from the throttle and precisely controls the flow of current from the battery to the motor.

Wire Harness		A wire harness is a bundle of electrical cables or wires organized and protected within a common outer layer. It serves several functions like connecting various parts in a vehicle
3W Motor		An electric motor is a device that converts electrical energy into mechanical energy. It typically works by using the interaction between magnetic fields and electric currents to create a force that rotates a shaft. Electric motors are essential components in many different machines and devices, from household appliances to cars and industrial machinery
Speedometers		Speedometer shows the current speed of the E-two and three-wheeler

BUSINESS PROCESS

Our Business process are described as below:

1. **Material Received:** Upon the arrival of vital components, such as Tyres, Batteries, MCB Switches, Front Glasses Frames, Bumpers, etc., at our manufacturing units, the Supplier Quality Assurance Department meticulously examines the quantity against the invoice. This critical initial phase ensures that all materials are accounted for and in line with the expected quantities, a process that facilitates transparency in our supply chain management. Subsequently, a comprehensive Goods Receipt Note is

meticulously prepared, ensuring not only a formal record of the received materials but also a detailed documentation that contributes to our ongoing quality control efforts.

2. **Inspection of Materials:** Following the exhaustive initial verification against the invoice, the materials seamlessly transition to the Quality Check department. Here, a rigorous sampling process and standard procedure are meticulously implemented to evaluate the quality of each component. This meticulous approach not only ensures adherence to industry standards but also enhances our commitment to delivering products of unparalleled quality. The Quality Check department, armed with their expertise, issues a detailed quality inspection report for materials meeting the criteria. Equally important, it promptly rejects those materials that fall short, accompanied by a comprehensive rejection note to the supplier. This two-fold process not only safeguards the integrity of our products but also nurtures a robust relationship with our suppliers by fostering transparent communication.
3. **Check Materials sent to Assembly Lines:** Materials that successfully navigate the stringent quality checks are systematically segregated and stored in designated sections. This strategic organization enhances efficiency in the subsequent stages of production. These approved materials, now meticulously categorized, are then seamlessly directed to the assembly lines, where the actual production process unfurls. While the production happens we ensure lean and first in first out (FIFO) process for respective stores. This meticulous organization not only expedites the production process but also mitigates the risk of errors, ensuring a streamlined workflow.
4. **Assembling:** The assembly phase, undoubtedly the cornerstone of our manufacturing process, involves the seamless integration of various components. This includes, but is not limited to, chassis and body assembly, drivetrain installation, battery pack installation, power electronics installation, wiring and connectivity, as well as interior and exterior components. This pivotal step not only ensures the creation of a cohesive and functional electric two-wheeler or three-wheeler but also stands testament to our unwavering commitment to precision engineering. Every component is meticulously fitted, emphasizing not only functionality but also aesthetic appeal.
5. **Complete the Vehicles:** Once the vehicle is fully assembled, it is carefully placed in a dedicated section for comprehensive inspection and testing. This meticulous process is not merely a formality; rather, it serves as the final checkpoint to guarantee optimal performance and adherence to our exacting quality standards. Our commitment to delivering vehicles of unparalleled quality is epitomized in this phase, where every detail is scrutinized to ensure that our customers receive products that surpass their expectations.
6. **Pre- Delivery Inspection of Vehicles:** The culmination of our manufacturing process is marked by an exhaustive Pre- Delivery Inspection of all completed vehicles. This extensive inspection covers a myriad of aspects, including but not limited to electrical connections, MCB lock and tripping, handle lock functionality, seat locking mechanism, central locking system, paint quality, assessment of dents and scratches, checking gravity of batteries, and various other parameters. Notably, this phase also includes a meticulous road test, further emphasizing our commitment to delivering not just products, but a seamless and reliable experience on the road. This phase serves as the ultimate validation of the quality and reliability of our electric vehicles.
7. **Issuance of Pre- Delivery Inspection Report:** Upon the completion of the rigorous quality tests, the inspection officer, armed with a wealth of data and insights, diligently compiles a detailed Pre- Delivery Inspection Report. This comprehensive document not only serves as a testament to the adherence of each vehicle to the defined quality standards but also provides valuable insights for continuous improvement in our manufacturing processes. This not only helps us ensure high quality delivery but also helps in tracing any warranty or quality claims back to the Pre-Delivery Inspection.
8. **Labelling the Sticker:** After receiving the meticulously crafted Pre –Delivery Inspection Report, the vehicles undergo the final touch of personalization. Each unit is adorned with our distinctive brand name sticker, proudly displaying the identity of our products as “Deltic” This branding not only serves as a mark of quality but also signifies our unwavering commitment to innovation and excellence in the electric vehicle industry.

9. **Packaging:** To ensure the utmost protection of our vehicles during transportation, each unit undergoes meticulous packaging. This process goes beyond mere protection; it is a strategic effort to guarantee that all components, no matter how intricate, remain intact and undamaged during the journey to their intended destinations. Our commitment to delivering products in pristine condition extends to this phase, where attention to detail is paramount.
10. **Documentation & Inventory:** As the manufacturing process reaches its end, a comprehensive list is meticulously prepared, detailing not only the quantity but also the types of vehicles ready for dispatch. This detailed documentation serves multiple purposes, acting as a comprehensive inventory record and providing valuable insights for future production planning. The meticulous approach to documentation underscores our commitment to transparency and efficiency in our operations.
11. **Dispatch:** The final stage of our manufacturing process involves the seamless dispatch of our meticulously crafted electric vehicles. Once the vehicles successfully pass all quality tests and inspections, they are carefully loaded onto tempos or trucks for dispatch to various locations in accordance with received orders. This stage is not merely the conclusion of a manufacturing process; it marks the beginning of a journey for our products, as they make their way to customers who expect nothing short of excellence. Every dispatch is not just a logistical task; it is a commitment to delivering on our promise of quality, innovation, and reliability in the electric vehicle market.

UTILITIES

Power:-

We have made the necessary arrangements for regular uninterrupted power supply at our manufacturing units and registered office. We have availed a power connection from Pashchimanchal Vidyut Vitran Nigam Ltd – for UP plant, West Bengal State Electricity Distribution Company Ltd. For West Bengal plant, and Surya Maintenance Agency Pvt Ltd. For Corporate office in Delhi. For our manufacturing unit premises with a sanctioned load of WB plant – 45 KVA Per month & UP plant – 50 KVA Per month, which is sufficient to meet our manufacturing unit requirement.

Infrastructure Facilities: -

Our registered office, Corporate Office and Manufacturing Unit are well-equipped for our business operations to function smoothly.

Water: -

Water is mainly required for the production process, washing of products, fire safety, drinking and sanitation purposes. Our Company consumes water from underground borewells for our manufacturing units and from municipal lines & filtered bottles for our registered office.

Raw Material: -

Raw materials are the basic substances or components used in the manufacturing process of a product. In the context provided, raw materials are crucial for the construction of electric vehicles (Evs). These materials are the fundamental building blocks necessary to assemble each component and ultimately create a functional vehicle. Here's an elaboration on some of the primary raw materials mentioned:

Tires: Tires are made from various materials such as virgin rubber, fabric, and steel. Rubber provides traction and absorbs shock, while fabric and steel provide structure and stability. These materials are combined and molded into the tire shape, ensuring durability and performance on the road.

Batteries: Electric vehicles rely on large batteries to store and supply power to the vehicle's electric motor. These batteries typically contain lithium-ion cells, which consist of materials such as lithium, cobalt, nickel, and manganese. These materials are combined in specific configurations to create cells capable of storing and delivering electrical energy efficiently.

MCB Switches: Miniature Circuit Breaker (MCB) switches are electrical components used for circuit protection. They are typically made from materials like copper, aluminum, and various plastics. Copper and aluminum conduct electricity, while plastics provide insulation and structural support. MCB switches help protect the vehicle's electrical systems from overloads and short circuits.

Front Glass Frames: Front glass frames provide support and structure for the windshield of the vehicle. These frames are often made from lightweight but sturdy materials such as aluminum or steel. The frames are designed to securely hold the windshield in place while also providing aerodynamic benefits and aesthetic appeal.

Bumpers: Bumpers are essential safety features that help absorb impact during collisions and protect the vehicle's occupants and internal components. They are typically made from materials like plastic, fiberglass, or composite materials. These materials are chosen for their ability to deform and absorb energy during a crash, helping to minimize damage to the vehicle and reduce the risk of injury to passengers.

These are just a few examples of the many raw materials involved in the construction of electric vehicles. Each material plays a critical role in ensuring the performance, safety, and reliability of the final product.

INVENTORY MANAGEMENT: -

Inventory management is the process of overseeing and controlling the flow of raw materials, work-in-progress, and finished products within a company's manufacturing units to ensure optimal levels are maintained. In the context provided, with manufacturing units located in West Bengal and Uttar Pradesh, inventory management is crucial for efficient operations and customer satisfaction. Here's an elaboration on how inventory management would work in this scenario:

Raw Material Inventory:

Raw materials, such as those mentioned earlier (tires, batteries, MCB switches, etc.), need to be stocked at both manufacturing units to support production processes. The inventory team monitors the levels of raw materials regularly to prevent stockouts and production delays. Just-in-time inventory practices may be employed to minimize storage costs while ensuring that enough materials are available for production.

Work-in-Progress Inventory:

Work-in-progress (WIP) inventory includes partially completed products in various stages of the manufacturing process. Both manufacturing units would track WIP inventory to ensure smooth workflow and identify any bottlenecks in production. Coordination between different departments (e.g., production, quality control) is essential to manage WIP effectively and minimize idle time.

Finished Product Inventory:

Finished products, i.e., electric vehicles, are stored in inventory until they are ready to be shipped to customers or dealerships. Inventory levels of finished products need to be balanced to meet demand while avoiding excess stock, which ties up capital and storage space. Demand forecasting techniques help in determining the optimal inventory levels of finished products at each manufacturing unit.

Inventory Tracking and Control:

Both manufacturing units would utilize inventory management software or systems to track inventory levels, monitor stock movements, and generate reports. Regular inventory audits are conducted to reconcile physical inventory with recorded inventory levels and identify discrepancies or potential issues. Effective inventory control measures, such as ABC analysis (categorizing items based on their value and importance), are implemented to prioritize inventory management efforts.

Logistics and Distribution:

Once products are ready for distribution, logistics teams coordinate the transportation of finished products to dealerships or directly to customers. Efficient distribution channels and transportation networks are crucial to ensure timely delivery and customer satisfaction.

In summary, effective inventory management is essential for optimizing operations, minimizing costs, and meeting customer demand in manufacturing units located in West Bengal and Uttar Pradesh. It involves closely monitoring raw materials, work-in-progress, and finished products while implementing control measures to ensure efficient inventory levels and smooth production processes.

Code on Wages, 2019

The Code on Wages regulates and amalgamates wage and bonus payments and subsumes four existing laws namely –the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. It regulates, inter alia, the minimum wages payable to employees, the manner of payment and calculation of wages and the payment of bonus to employee. The Central Government has notified certain provisions of the Code on Wages, mainly in relation to the constitution of the central advisory board.

Code on Social Security, 2020

The Code on Social Security amends and consolidates laws relating to social security, and subsumes various social security related legislations, *inter alia* including the Employee's State Insurance Act, 1948, the Employees' Provident Funds and Miscellaneous Provisions Act, 1952, the Maternity Benefit Act, 1961, Building and Other Construction Worker's Welfare Cess Act, 1996 and the Payment of Gratuity Act, 1972. The Occupational Safety, Health and Working Conditions Code consolidates and amends the laws regulating the occupational safety and health and working conditions of the persons employed in an establishment. It replaces 13 old central labour laws including the Factories Act, 1948, Contract Labour (Regulation and Abolition) Act, 1970, the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979.

C. Environmental Laws

The Environment (Protection) Act, 1986 (the "EPA")

The EPA has been enacted with the objective of protecting and improving the environment and for matters connected therewith. As per the EPA, the Central Government has been given the power to take all such measures for the purpose of protecting and improving the quality of the environment and to prevent environmental pollution. Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the EPA, including the power to direct the closure, prohibition or regulation of any industry, operation or process.

The Environmental Impact Assessment Notification, 2006 (the "Notification")

As per the Notification, any construction of new projects or activities or the expansion or modernisation of existing projects or activities as listed in the Schedule attached to the notification entailing capacity addition with change in process and or technology can be undertaken only after the prior environmental clearance from the Central government or as the case may be, by the State Level Environment Impact Assessment Authority, duly constituted by the Central government under the provisions of the Environment (Protection) Act, 1986, in accordance with the procedure specified in the notification. The environmental clearance process for new projects comprises of four stages viz. screening, scoping, public consultation and appraisal. However, in 2016, MoEF issued a notification for integrating standard and objectively monitorable environmental conditions with building permissions for buildings of different sizes with rigorous monitoring mechanism for implementation of environmental concerns and obligations in building projects. D. Intellectual Property Laws

The Patents Act, 1970

The Patents Act, 1970 governs the patent regime in India. India is a signatory to the Trade Related Agreement on Intellectual Property Rights (“**TRIPS**”); Under the Indian Patents Act, 1970 (the “Patent Act”) term invention means a new product or process involving an inventive step capable of industrial application. A patent under the Patent Act is an intellectual property right relating to inventions and grant of exclusive right, for limited period, provided by the Government to the patentee, in exchange of full disclosure of his invention, for excluding others from making, using, selling and importing the patented product or process or produce that product. The Patents Act, 1970 provides for the following:

- Recognition of product patents in respect of food, medicine and drugs;
- Patent protection period of 20 years;
- Patent protections allowed on imported products; and
- Under certain circumstances, the burden of proof in case of infringement of process patents may be transferred to the alleged infringer.

The Patents (Amendment) Act, 2005 has made certain changes to the Patents Act, 1970 (“Patents Act”). The definition of inventive step in the Patents Act has been amended to exclude incremental improvements or evergreening of patents. Now, (a) an inventive step must involve a technical advance as compared to the existing knowledge or must have economic significance or both, and (b) the invention must be non-obvious to a person skilled in the art. Section 3(d) of the Patents Act has been amended to exclude the following from the definition of patents:

- the mere discovery of a new form of a known substance which does not result in the enhancement of the known efficacy of that substance, or
- The mere discovery of any new property or new use for a known substance or of the mere use of a known process, machine or apparatus unless such known process results in a new product or employs at least one new reactant.

Further, copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise

Reproduction of a copyrighted software for sale or hire or commercial rental, offer for sale or commercial rental, issuing copy(is) of the computer programme or making an adaptation of the work without consent of the copyright owner amount to infringement of the copyright. B. DEFINED BENEFIT OBLIGATION

1) Gratuity

The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation. The Company does not have a funded plan for gratuity liability.

Interest cost: It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

Current Service Cost: is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period.

Actuarial Gain or Loss: occurs when the experience of the Plan differs from that anticipated from the actuarial assumptions. It could also occur due to changes made in the actuarial assumptions.

The gratuity benefit payable to the employees of the Company is as per the provisions of the Payment of Gratuity Act, 1972, as amended. Under the gratuity plan, every employee who has completed at least 5 years of service gets gratuity on separation or at the time of superannuation calculated for equivalent to 15 days salary for each completed year of service calculated on last drawn basic salary.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Prospectus and the Risk Factors given in the Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of any member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing market players would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we may face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

Significant Developments after October 31st, 2024 that may affect our Future Results of Operations

The Directors confirm that there have been no events or circumstances since the date of the last financial statements as disclosed in the Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continued to be six Working Days.
- b) Phase II: This phase has become applicable from July 1, 2019. SEBI through its Circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 ((to the extent applicable))) decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Further, SEBI through its Circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (as superseded by SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable)) decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the physical ASBA Form by an RII through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public offer closure to listing continues to be 6 Working Days during this phase.
- c) Phase III: Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days (i.e., the time duration from public offer closure to listing of be 3 Working Days) has been made applicable in two phases i.e., (i) voluntary for all public offers opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023 (T+3 Circular). The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI

mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation on compliance with SEBI Circular no. SEBI/HO/CFD/DIL2/P/CIR/2022/75 dated May 30, 2022 and SEBI Master Circular no. SEBI/HO/MIRSD/POD 1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable).

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“**DPIIT**”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT offers an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Offer Procedure – Bids by Eligible NRIs**” and “**Offer Procedure – Bids by FPIs**” on page 221 and 221, respectively.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see “**Offer Procedure**” on page 239.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
