INTERNAL RISK FACTORS

- 1. We do not have long-term agreements with a majority of our customers. Any changes or cancellations to our orders or our inability to forecast demand for our products may adversely affect our business, results of operations and financial condition.**

We do not have firm commitments or long-term supply agreements with our customers and instead rely on purchase orders. We also do not enter into contracts for a specific term with our customers. Accordingly, there have been no past instances of contract termination prior to the completion of their terms. The sales of our products or services to our customers are undertaken through purchase orders executed by our customers which are then fulfilled by our Company.

Particulars	December 31, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022
Number of customers catered	456	313	168	124
Number of purchase orders received	23,391	14,767	6,008	805

A few of the purchase orders placed by our customers on our Company also include provisions relating to liquidated damages and specific performance in case of delay or default in delivery of our products. While there has been no instance of cancellation of orders prior to their finalization during nine months ended December 31, 2024, Fiscals 2024, 2023 and 2022, the orders may be amended or cancelled prior to finalisation, in the future and if such an amendment or cancellation take place, it may adversely impact our production schedules. Cancellations or unanticipated variations or scope or schedule adjustments may occur due to unforeseen circumstances. The occurrence of any such events may lead to the cancellation of orders or the deferment of revenue, which may adversely affect our business, results of operations and financial condition.

Set out below are details of the number of customers catered by us, number of purchase orders received by us during the nine months ended December 31, 2024 and Fiscals 2024, 2023 and 2022:

(₹ in Lakhs)

Particulars	December 31, 2024		Fiscals 2024		Fiscals 2023		Fiscals 2022	
	Revenue from operations	% of Revenue from operations	Revenue from operations	% of Revenue from operations	Revenue from operations	% of Revenue from operations	Revenue from operations	% of Revenue from operations
Top 5 customers*	2,828.93	17.06%	2,131.35	13.31%	1,506.96	18.68%	282.59	31.25%
Top 10 customers*	3,983.87	24.03%	3,180.93	19.87%	1,945.53	24.12%	340.89	37.69%

Our top 05 and top 10 customers contribute a significant portion of our revenue from operations. Our failure or inability to continue such relationship for any reason (including, due to failure to negotiate acceptable terms or adverse change in the financial or economic conditions) could have a material adverse impact on our business, results of operations, financial condition and cash flows.

Additionally, as we do not bind a majority of our customers to any long-term agreements specifying a certain volume of business required to be transacted between us, our customers may terminate their relationship with us, with or without cause, with no advance notice and without compensation. Consequently, there is no commitment on the part of the customer to continue to place new purchase orders with us and as a result, our sales from period to period may fluctuate significantly. Our Company cannot ascertain customer turnover ratio, as some of our customers may purchase goods from us in a particular Fiscal and these customers may not purchase goods from us in the following Fiscal. However, this does not prevent such customers from purchasing goods from the Company in the future.

Further, the absence of any contractual exclusivity in relation to our business arrangements with our customers poses a threat on our ability to be able to continue to supply our products to these customers in the future. If we overestimate demand, we may incur additional raw materials costs and manufacture a higher of number of products than required. Similarly, if we underestimate demand, we may not procure sufficient raw material in a timely manner, which could impact our production and delivery schedules. While there has been no instance in the last 3 financial years and the current financial year of significant inaccuracy in demand forecasting, leading to an adverse impact on our ability to deliver products to customers in a timely manner, or at a competitive cost or any effect on our business, results of operations and financial condition, any significant inaccuracy in demand forecasting may adversely impact our ability to deliver products to customers in a timely manner, or at a competitive cost, which may adversely affect our business, results of operations and financial condition.

2. Increases in the prices of raw materials required for our operations could adversely affect our business and results of operations

We source raw material such as Butter paper for print, Fabric, Coal, Chemicals/powder, Base paper for our manufacturing operations from a combination of domestic and foreign suppliers. The table below shows the cost of materials consumed as a percentage of our total income and the percentage of parts and materials sourced from India and outside India for the periods indicated:

(₹ in Lakhs)

Particulars	For the period ended on December 31, 2024	Fiscal		
		2024	2023	2022
Total cost of materials consumed	4,475.89	4,257.37	-	-

Note : No Manufacturing Activity was involved in F.Y 2022 and 2023

The following table provides a broad overview of the types of materials we use for our manufacturing operations:

Raw Materials	Details of Raw Materials
Butter paper for print	Used for fabric printing
Fabric	Raw fabric on which dyeing and printing can be done

Coal	Raw material for generating steam which use in both paper coating and fabric printing process
Chemicals /powder	Raw material for coating of paper
Base paper	Raw material for coating of paper
Ink	Raw material for digital printing

For further risks related to our suppliers, see ***“We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on our ability to meet our manufacturing and delivery schedules”*** on page 31.

Our inability to procure raw materials on terms more favourable, or at all, may constrain our raw material supply, may adverse effect on our business, financial condition and results of operations. Any increase in price of cost of inputs as well as limitations and/ or disruptions in the supply of such inputs, will adversely affect our business and financial condition. We cannot assure that we shall be able to timely and adequately effect any prices increases corresponding to the input costs escalation. Further, any substantial delay in supply or non-conformance to quality requirements by our suppliers can impact our ability to meet our customer requirements and thus impact our business and results of operations. We typically purchase raw materials based on the order in hand and price trend of upcoming orders.

In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, environmental factors and changes in government policies and regulations. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers.

While historically, we have not experienced a shortfall or limited availability of raw materials that has affected our operations, we cannot assure you that there will not be any significant and prolonged interruption or a shortage in the supply of our critical raw materials. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins and adversely affect our results of operations. Further, an increased cost in the supply of raw material arising, from a lack of long-term contracts may have an adverse impact on our ability to meet customer demand for our products and result in lower net revenue from operations both in the short and long term.

3. *We derive majority of our revenue from trading of Ink and digital printing machine business unit and any reduction in the demand of such segment could have an adverse effect on our business, results of operations and financial conditions*

Our Company primarily generates revenue from trading of Ink and digital printing machine, business unit segment.

The following table sets forth our revenue from operations from distribution of Ink and digital printing machine, business unit segment.

(₹ in Lakhs)

Product Sales	Period ended on December 31,2024		Fiscal 2024		Fiscal 2023		Fiscal 2022

Consequently, any decline in demand for such machinery or ink may have a detrimental impact on the Company's business operations, financial performance, and overall financial condition. Such a reduction in demand could lead to decreased revenues, impaired cash flow, and may necessitate cost-reduction measures or operational adjustments, which could adversely affect the Company's ability to fulfil its obligations and achieve its strategic objectives.

4. *Fluctuation in market trends for Digital Textile Printing*

The digital textile printing industry is subject to rapid shifts in market trends, driven by evolving consumer preferences, technological advancements, environmental regulations, and economic conditions. A significant change in these trends—such as a sudden decline in demand for customized or short-run textile printing, reduced adoption of digital methods in favor of traditional techniques, or slower-than-expected growth in key markets—could adversely impact our business.

Furthermore, increased focus on sustainability and circular fashion may alter the demand for specific types of textile inks, substrates, and machinery, potentially rendering existing technologies obsolete or less competitive. If we are unable to anticipate, adapt to, or capitalize on these changes in a timely and cost-effective manner, our market position, revenue growth, and profitability may be negatively affected.

5. Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.

Majority of the working capital funds of our Company are blocked due to, firstly with the installation of new machinery for paper division in August 2024, production capacity increased, leading to a corresponding rise in inventory and debtor holdings. Consequently, the working capital cycle expanded to support the enhanced production levels. For the period ended on December 31, 2024 our Company's net working capital consisted of ₹ 3,774.57 Lakhs and As on March 31, 2024, our Company's net working capital consisted of ₹ 2,241.49 Lakhs. Further, as on March 31, 2023, our Company's net working capital consisted of ₹ 1,496.46 Lakhs as against ₹ 2.77 lakhs as on March 31, 2022. As on the date of this Draft Red Herring Prospectus, we meet our working capital requirements in the ordinary course of its business from capital, internal accruals, unsecured loans, working capital loans, from the Banks etc. This requires us to obtain financing through various means. For the period ended on December 31, 2024, our total borrowings stood at ₹ 5,876.77 lakhs and As on March 31, 2024, our total borrowings stood at ₹ 5,655.52 lakhs. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and investors interest in the Company and could adversely impact our Equity Share price.

Furthermore, the objects of the offer include funding working capital requirements of our Company. For more information in relation to such management estimates and assumptions, please see **"Objects of the Offer"** on page 76. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

In the last three (3) financial years and for the period ended on December 31, 2024, our Company has been able to raise funding from bank as and when the need has arisen and has never delayed and defaulted its financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credits which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

The working capital requirement for the FY 2022, 2023, 2024 and for the period ended on December 31, 2024. The working capital gap (WCG) has been met with an increase in the bank borrowing and capital of the Company.

Due to the geographic concentration of the sale of our products in Maharashtra and Gujarat, our operations are susceptible to local and regional factors, such as economic and weather conditions, natural disasters, demographic changes, and other unforeseen events and circumstances. Consequently, any significant social, political or economic disruption, or natural calamities or civil disruptions in this region, or changes in policies of the state or local governments or the government of India or adverse developments related to competition in this region, may adversely affect our business, results of operations, financial condition and cash flows. 7. *The restated examination report by our peer review auditor has provided a matter of emphasis paragraph for the company, regarding acceptance of loan from persons other than directors, their relatives, or related parties, except as permitted under the Act.*

The Company took over a partnership firm named True Colors Print on March 29, 2024. As part of the takeover, all loans appearing in the books of the partnership firm were transferred to the books of the Company, including a loan amounting to ₹239.50 lakhs, of which ₹222.40 lakhs remained outstanding as on December 31, 2024. In accordance with the provisions of the Companies Act, 2013, a company is generally restricted from accepting loans from persons other than its directors, their relatives, or related parties, except as permitted under the Act. However, Statutory Auditor

note that the said loans have been repaid as on the date of signing of the examination report, in order to ensure compliance with the provisions of the Companies Act, 2013.

The opinion of Statutory Auditor is not modified in respect of the matter stated above. Further, no show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future, or our Company will not commit any further defaults accepting loans from persons other than its directors, their relatives, or related parties, except as permitted under the Act. The happening of such event may cause a material effect on our results of operations and financial position.

8. *Our Promoter and Promoter Group are involved in a venture which is in the same line of business/unit as that of our Company.*

Our Promoter and Promoter Group are involved in a venture Fabcurate Private Limited and Inkia Inks Private Limited (group companies) that operates in the same line of business. As a result, there may be potential conflicts of interest arising from such dual involvement, which could adversely affect the operations, strategic decisions, or financial performance of our Company. Additionally, the interests of our Promoter and Promoter Group may not always align with the interests of our Company or its shareholders. The existence of such business overlap may lead to competition for resources, market share, or opportunities, and the Promoter and Promoter Group's involvement in such ventures may limit their ability to dedicate full attention and resources to the growth and development of our Company. Furthermore, any decisions made by our Promoter and Promoter Group in relation to such ventures may not be in the best interests of our Company, potentially resulting in material adverse effects on our business, financial condition, and results of operations.

9. *Our Company has experienced negative cash flow in prior periods and net decrease in cash and cash equivalents which may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

As per our Restated Financial Statements, our cash flows from operating activities were negative for the financial year ended March 31, 2023 as set out below:

(₹ in Lakhs)				
Particulars	December 31, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/(used in) Operating Activities	759.21	1,467.69	(2,046.56)	48.08

Such negative cash flows led to a net decrease in cash and cash equivalents for respective years. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, see "Financial Information" on page 157.

10. *Our business is subject to seasonal fluctuations, which could adversely affect our financial performance.*

Our business is seasonal in nature, with higher sales volumes during specific periods, such as festive seasons, weddings, and other cultural events. As a result, our revenue and cash flows are often concentrated in certain months of the year, which could lead to fluctuations in our financial performance across different quarters. The demand for digitally printed fabrics, increase significantly during festive seasons and wedding seasons in India and other markets with a large Indian diaspora. However, during non-festive or off-peak periods, we may experience a slowdown in orders, leading to under-utilization of our manufacturing capacities, lower sales volumes, and reduced profitability in those periods.

Additionally, unpredictable factors such as weather conditions, changes in consumer behaviour, or shifts in fashion trends could impact seasonal demand patterns. For instance, an unusually long monsoon season or economic slowdowns during peak sales periods could adversely affect consumer spending on apparel and textiles, leading to lower-than-expected sales during the periods when we typically achieve higher revenues. The seasonal nature of our business also requires us to manage our working capital efficiently, particularly in anticipation of peak demand periods. We may need to increase inventory levels of raw materials and finished goods ahead of festive seasons, which ties up cash flows and exposes us to the risk of overstocking if demand does not materialize as expected. Any mismatch between anticipated demand and actual sales volumes could result in excess inventory, increased storage costs, and potential markdowns to clear unsold stock, which could adversely impact our margins and profitability. Further, there are no such past instances where Any mismatch between anticipated demand and actual sales volumes could result in excess inventory, increased storage costs, and potential markdowns to clear unsold stock, which could adversely impact our margins and profitability. This can result in production inefficiencies if we are unable to align our production timelines with varying demand cycles across different regions and markets. In summary, the seasonal nature of our business poses risks of revenue fluctuations, inventory imbalances, and under-utilization of manufacturing capacities during off-peak periods. If we are unable to effectively manage these seasonal fluctuations, it could adversely impact our financial performance, cash flows, and overall profitability.

Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on our ability to meet our manufacturing and delivery schedules.

Set out in the table below is the contribution of our top 10 suppliers to Total purchases for the period ended on December 31, 2024, in Fiscal 2024, Fiscal 2023 and Fiscal 2022.

We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

We source our raw materials from a limited number of third-party suppliers from various geographies including Gujarat, Delhi, Maharashtra and China. We do not have long-term contracts with our suppliers for such raw materials. Our dependence on foreign suppliers subjects us to certain risks and uncertainties which include political and economic instability in the countries in which such suppliers are located, disruptions in transportation, currency exchange rates and transport costs, amongst others. If we fail to (i) receive the quality of raw materials that we require; (ii) negotiate appropriate financial terms; (iii) obtain adequate supply of raw materials in a timely manner, or if our principal suppliers discontinue the supply of such raw materials, or were to experience business disruptions or become insolvent, we cannot assure you that we will be able to find alternate sources for the procurement of raw materials in a timely manner. While our business depends on the timely procurement of various raw materials and components—including base paper and chemicals for sublimation paper manufacturing, digital textile printing machines and inks, as well as fabrics for our printing services—we believe the risk of supply disruption is moderated by the following factors:

In our sublimation paper business, we currently source raw materials from a few trusted suppliers, but we have access to multiple alternative sources both within and outside India. While a sudden switch may involve stricter payment terms or lead to temporary logistical challenges, we believe such transitions are manageable with prudent inventory planning or through advance stocking. In our machinery and ink division, we have built strong, long-standing relationships with multiple global suppliers of printing machines and inks. This diversified vendor base provides us with the flexibility to explore and onboard alternate partners, if required. Though initial procurement from new sources may come with tighter commercial terms or marginal delays, we believe these constraints can be addressed over time through negotiation and performance history.

For our fabric procurement, we are strategically located in Surat, one of India's largest textile hubs, with access to a wide range of weavers, yarn suppliers, and greige fabric producers. Given this ecosystem, we face minimal risk in sourcing base fabrics required for digital textile printing, and any short-term supply gap can typically be resolved through alternative vendors in the vicinity.

Notwithstanding the above, we cannot assure you that alternate sources can be secured immediately or under favourable terms in every situation, especially during global disruptions, demand surges, or geopolitical instability. Any prolonged or simultaneous supply constraint across key inputs could impact our ability to fulfil orders on time or at optimal cost. Moreover, in the event that either our demand increases, or our suppliers experience a scarcity of resources, our suppliers may be unable to meet our demand for raw materials.

While other than in the ordinary course of business, there has not been any reduction or interruption in the supply of raw materials to our Company in the Nine months ended December 31, 2024 and Fiscals 2024, 2023 and 2022, any reductions, or interruptions in the supply of raw materials, and any inability on our part to find alternate sources in a timely manner for the procurement of such raw materials, may have an adverse effect on our ability to manufacture our products in a timely or cost-effective manner. The occurrence of any such event may adversely affect our business, results of operations, cash flows and financial condition.

13. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. We do not have any formal credit policy and details of our bad debts and our debtors' age analysis can be summarised as under

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund with the respectively authorities. These delays were primarily due to server issues and a vendor's representative not filing the returns on the designated due dates. To address these issues and prevent future delays, we have taken several corrective actions, including:

Increasing Manpower: We have augmented our team to ensure that there is sufficient coverage to manage the GST filing process efficiently, even in cases of unforeseen technical issues.

Enhanced Monitoring and Vendor Follow-up: We have implemented stricter monitoring and internal tracking systems to ensure that all filing deadlines are met without exception. Additionally, we have instituted a more rigorous follow-up process with our vendors to ensure they adhere to filing deadlines, thereby preventing delays caused by external parties.

Backup Procedures: We have established backup procedures to handle technical difficulties, including ensuring that alternative systems or personnel are available to complete filings on time.

Training and Accountability: Additional training has been provided to our staff to reinforce the importance of meeting compliance deadlines, and accountability measures have been introduced to prevent recurrences.

However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filing or EPF payment in future, which may adversely affect our business, financial condition, and reputation.

15. Our Company, its Directors and its Promoters are party to certain litigation and claims. We may be required to devote management and financial resources in the defend or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses, and we may have to make further provisions in our financial statements, which could increase our expenses and our liabilities. Decisions in such proceedings, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities, even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations and financial condition.

For further details of litigation proceedings, please refer to the chapter titled ***“Outstanding Litigations and Material Developments”*** on page 185 of this Draft Red Herring Prospectus.

16. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Although we have obtained all the requisite licenses to operate our business, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals upon their expiry in a timely manner or at all. We also cannot assure you that the applicable authorities shall not take adverse actions against us for delayed application for the aforementioned approvals.

Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company, see ***“Government and Other Approvals”*** beginning on page 189.

17. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.

As on date of this Draft Red Herring Prospectus, we have registered the trademark  and , under class 24 and 2 the Trademarks Act, 1999, which have been assigned to our Company by our Promoter i.e. Sanjay Raghubhai Desai and Ashishkumar Durlbhbhai Mulani respectively. There can be no assurance that we will be able to successfully renew our registration in a timely manner or at all, which may affect our ability to use the trademark in the future. We may not be able to prevent

infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

Further, our efforts to protect our intellectual property in India may not be adequate. Third parties may also infringe or copy our registered trade name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India. Moreover, our ability to protect, enforce or utilize our trade name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such trade name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad. Any such event may adversely affect our goodwill and business. For further details, please refer to chapter titled “*Our Business - Intellectual Property*” and “*Government and Other Statutory Approvals-VI. Intellectual Property*” beginning on pages 99 and 189 of this Draft Red Herring Prospectus respectively.

18. *An inability to comply with repayment and other covenants in the financing agreements or otherwise meet our debt servicing obligations could adversely affect our business, financial condition, cash flows and credit rating.*

Our Company has entered into agreements in relation to financing arrangements with certain banks for working capital facilities, term loans and bank guarantees. For the period ended on December 31, 2024, we had total outstanding borrowings of ₹ 5,876.77 lakhs and as of March 31, 2024, we had total outstanding borrowings of ₹ 5,655.52 lakhs. The agreements with respect to our borrowings contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to undertaking certain matters including, among others, effecting a merger, amalgamation or scheme of arrangement, change in capital structure of our Company subject to the threshold prescribed for the shareholding of certain shareholders of our Company and effecting change in the constitutional documents or management of our Company. Further to meet the said requirements our Company has taken consent from all the lenders for the proposed IPO as required in the agreements. For further details, see “*Financial Indebtedness*” beginning on page 160. For the period ended on December 31, 2024, our total secured borrowings amounted to ₹ 4,056.06 lakhs, comprising of 69.02% of our total indebtedness and as on March 31, 2024, our total secured borrowings amounted to ₹ 3,891.46 lakhs, comprising of 68.81% of our total indebtedness. Under the terms of our secured borrowings, we are required to create a charge by way of hypothecation on the assets of our Company, together with cash in hand and bank accounts. As these assets are hypothecated in favor of lenders, our rights in respect of transferring or disposing of these assets are restricted. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, change in ownership or management control, changes in shareholding pattern and management set-up including its constitution and composition, amalgamation, demerger, merger, acquisition, corporate or debt restructuring or similar action. If we fail to meet our debt service obligations or covenants (or do not receive approvals from our lenders to undertake certain transactions) under the financing agreements, the relevant lenders could declare us to be in default of our agreements, accelerate the maturity of our obligations, enforce security, take possession of the assets. As a result, we may be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make these repayments.

19. *We will not receive any proceeds from the Offer for Sale portion.*

The Offer includes an offer for sale of up to 10,00,000 Equity Shares aggregating to ₹ [●] lakhs by the Selling Shareholders. The proceeds from the Offer for Sale will be paid to the Selling Shareholders and we will not receive any such proceeds. The proceeds from the Offer for Sale will be transferred to each of the Selling Shareholders, in proportion to its respective portion of the Offered Shares transferred by each of them in the Offer for Sale (after deducting applicable Offer-related expenses and taxes) and will not result in any creation of value for us or in respect of your investment in our Company.

20. *Our individual Promoters play a key role in our operations and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.*

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our operations and impair our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel have, over the years, built relationships with key customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and

prospects may be materially and adversely affected. However, we have encountered no such issues in the past, as majority of our promoters and both the Executive Directors have been with our company since its inception.

For further details of our Directors and Key Managerial Personnel, please refer to Chapter titled “Our Promoter”, “Our Management – Board of Directors” and “Our Management – Key Managerial Personnel” on page no. 148, 137 and 137 respectively of this Draft Red Herring Prospectus.

- 21. We have a large work force, and our employee benefit expense and contract labour charges are one of the larger components of our fixed operating costs. An increase in employee benefit expenses and, or, contract labour charges could reduce our profitability. Further, our operations could be adversely affected by work stoppages or increased wage demands by our employees or any other kind of dispute with our employees.**

We believe our employees and personnel are one of our most important assets and critical to maintaining our competitive position in our industry. Our success depends on our ability to effectively source and staff people with the right mix of skills and experience. If we are unable to effectively utilise our personnel on a timely basis to fulfil the needs of our customers, our business could suffer. Our digital textile printing business segment is human resource intensive, and our pool of employees consists of employees and workers as part of inter alia production, designing, procurement, packaging, plant maintenance, quality control, dispatch and supply chain department. Set out below are the details of our permanent employees and our employee benefit expense and labour charges for the period indicated below:

Particulars	As at December 31, 2024	As at March 31, 2024	As at March 31, 2023	As at March 31, 2022
Permanent employees and workers	613	420	104	6
Employee benefit expense and labour charges (in ₹ lakhs)	1404.19	960.14	636.82	23.35

Further, the attrition rate of our employees is in the ordinary course of business which has not had any financial impact on the Company. We cannot guarantee that we will be able to recruit and retain qualified and capable employees. In addition, our recruiting personnel, methodology, and approach may need to be altered to address a changing candidate pool and profile. We may incur significant costs to attract and recruit skilled personnel, and we may lose new personnel to our competitors before we realise the benefit of our investment in recruiting and training them. If we fail to attract new personnel or fail to retain and motivate our current personnel who are capable of meeting our growing technical, operational, and managerial requirements on a timely basis or at all, our business may be harmed.

- 22. Information relating to capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates. Under-utilization of capacity of our manufacturing facilities and an inability to effectively utilize our manufacturing facilities may have an adverse effect on our business and future financial performance.**

Information relating to our capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management and independent chartered engineer, namely, Ms. Mokani Kruti N., including proposed operations, assumptions relating to availability and quality of raw materials, potential utilization levels and operational efficiencies. For further information regarding our manufacturing facilities, including our historical installed capacity, see “Our Business - Description of our Business and Operations – Capacity Utilization” on page 99 of this Draft Red Herring Prospectus. Actual manufacturing volumes and capacity utilization rates may differ significantly from the estimated production capacities of our manufacturing facilities. Undue reliance should therefore not be placed on the information relating to our installed capacities or historical capacity utilization of our manufacturing facilities included in this Draft Red Herring Prospectus.

Our overall capacity utilization for the period ended December 31, 2024 and for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 are as follows:

Sublimation Paper Manufacturing Unit

⁽²⁾ In the Financial Year 2023-24, Production started from November, 2023.

Further, there is no guarantee that our future production or capacity utilization levels will match or exceed our historical levels. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term could increase our cost of production and our operating costs and adversely impact our business, growth prospects and future financial performance. As of the date of this Draft Red Herring Prospectus, there have been no such instances of under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term in the past. Our expected return on capital invested is subject to, among other factors, the ability to ensure satisfactory performance of personnel to further grow our business, our ability to absorb additional infrastructure costs and utilize the expanded capacities as anticipated. In case of oversupply in the industry or lack of demand, we may not be able to utilize our capacity efficiently. However, as of the date of this Draft Red Herring Prospectus, there have been no such instances in the past three years and for the period ended December 31, 2024

23. We face competition from both domestic as well as international players and our inability to compete effectively may have a material adverse impact on our business and results of operations

We operate in the highly competitive digital textile printing market, which is characterized by rapid technological advancements, evolving customer preferences, and a large number of established players as well as emerging entrants. Competition in this market is intense and includes a diverse array of participants, such as large multinational corporations with substantial financial and technological resources, regional manufacturers, and niche players specializing in specific applications or customer segments.

Our business is particularly exposed to risks arising from competition in three key areas: (i) sale of digital textile printers and ink; (ii) manufacturing and supply of digitally printed textile fabrics; and (iii) manufacturing and supply of Sublimation paper. In all the three segments, we face pressure to continually innovate and deliver high-performance products that meet industry standards for quality, speed, cost-efficiency, and environmental sustainability.

Competitors may develop or offer superior technologies or lower-cost solutions, leading to pricing pressure, reduced margins, and the potential loss of market share. In addition, new market entrants or existing competitors may engage in aggressive pricing strategies or form strategic alliances that enhance their competitive positioning. Our ability to compete effectively depends on our capacity to invest in research and development, manage production costs, maintain high-quality customer service, and protect our intellectual property.

Failure to respond effectively to these competitive pressures could materially and adversely affect our revenue growth, profitability, and long-term prospects.

24. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

In addition to receiving remuneration and expense reimbursements, our Promoters and Directors have other vested interests in the Company. They hold shares in the Company, representing their personal investments, and are entitled to dividends on the shares they own. Furthermore, our Promoters and Executive Directors, owns the Company's Factory Premise, which has been leased to the Company through a Lease Agreement. The Company pays lease rent for Factory Premise, as detailed in the section "Immovable Property" in the chapter "Our Business" on page 99 of this Draft Red Herring Prospectus. For further details regarding the interests of our Promoters and Directors beyond their normal remuneration or reimbursement of expenses, please refer to the sections titled "Our Management – Interest of Directors" on page 137 and "Our Promoters and Promoter Group – Interests of Promoters" on page 148

25. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers/ intermediaries, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors. Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost- effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

26. Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain secured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.

We propose to utilize the Net Proceeds towards repayment/prepayment of certain borrowings availed by our Company and general corporate purposes in the manner specified in “Objects of the Offer” on page 76 of this Draft Red Herring Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions, or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary the terms of any contract referred to in this Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

27. We are exposed to risks in connection with the provision of services of digital textile printers. Further, after sales service is an important aspect for our success. Any failure by us to provide satisfactory after-sale services could adversely impact our operations and financial condition.

After-sales service is a critical component of our offering in the digital textile printing machinery segment. Our customers rely on us for prompt installation, training, maintenance, spare part availability, and warranty support. Failure to deliver these services consistently could potentially impact customer satisfaction and long-term client relationships.

Our Company has established a structured support system with trained service engineers operating through regional offices across major textile hubs. However, like any service-driven business, we remain dependent on the availability, responsiveness, and technical proficiency of our engineering teams. Unforeseen service delays, regional staff constraints, or lapses in service quality could lead to customer dissatisfaction or reputational impact. Further, there have been no material instances in the past of unforeseen service delays, regional staff constraints, or lapses in service quality which resulted into customer dissatisfaction or reputational impact.

To mitigate the said risk our company focuses on in-house engineering capabilities, strong training mechanisms, decentralised service hubs, and the fact that our business model promotes ongoing relationships through ink and consumable supply contracts, which reinforce customer engagement beyond the initial machinery sale. Nonetheless, there can be no assurance that occasional service issues, if not promptly addressed, will not adversely affect our customer relationships or our ability to generate future sales.

28. An inability to manage our growth could disrupt our business and reduce our profitability.

We have experienced high growth in recent years and expect our business to grow significantly as a result of favourable government policies and increased demand in digital textile industry. We expect this growth to place significant demands on us and require us

to continuously evolve and improve our operational, financial and internal controls across the organization. In particular, continued expansion increases the challenges involved in:

- maintaining high levels of client satisfaction;
- recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- adhering to health, safety and environment and quality and process execution standards that meet client expectations;
- preserving a uniform culture, values and work environment in operations within and outside India; and
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems.

Any inability to manage our growth may have an adverse effect on our business and results of operations.

29. Our Directors do not have any prior experience of being a director in any other listed company in India and this may present certain potential challenges for our Company and in the event of any material non-compliance where our Directors are held liable and responsible, we may have to appoint new directors.

Our current Board comprises seven directors, none of our Directors are currently a director in any other listed company in India. While our Board members are qualified and have relevant experience in their respective fields, not having any significant contemporary experience of being a director in any other listed company in India may present certain potential challenges for our Company. In the event of any material non-compliance where our Directors are held liable and responsible, we may have to appoint new directors or replace our current Directors, which could be time consuming and may involve additional costs for our Company. For further details, see “Our Management” on page 137 of this Draft Red Herring Prospectus.

30. We may encounter delays in the implementation and execution of our orders.

We have not in the past encountered any delays in relation to the completion of our orders. There can be no assurance that future orders will be completed in the estimated time frame. We cannot assure that all potential liabilities that may arise from delays will be covered or that the damages if any, that may be claimed from customers/third parties for such delay, shall be adequate to cover any loss of profits resulting from such delays. Further, any delay in completing our orders may also result in an increase in the total cost of implementing the contract which could exceed the original estimate or further cost escalation. Such delays and cost overruns will adversely affect our business, cash flows, and results of operations.

31. Our contingent liabilities as stated in our Restated Financial Statements could adversely affect our financial condition.

Below are the contingent liabilities, for the period ended on December 31, 2024 and for the Fiscal ending March 31, 2024, March 31, 2023 and March 31, 2022 as disclosed in our Restated Financial Statements in accordance with applicable accounting standards:

For further details of the contingent liabilities and commitments of our Company for the period ended December 31, 2024 as on March 31, 2024, see “Restated Financial Information” on page 157 of this Draft Red Herring Prospectus. If a significant portion of these liabilities materialize, fully or partly, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

32. Our Company has taken short term unsecured loans that may be recalled by the lenders at any time.

Our Company has availed unsecured loans which may be called by their lenders at any time. As on March 31, 2024, the unsecured loan amounting to ₹ 1,214.12 lakhs were decreased to Rs 1,164.92 lakhs on December 31, 2024. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. In the event any of such unsecured lenders seek a repayment of any these loans, our company would need to find alternative sources of financing, which may not be available on

commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. However, Company has managed to repay their loan on demand in the past from various means. Therefore, any such demand shall not adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page no. 160 of this Draft Red Herring Prospectus

33. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “Dividend Policy” on page 156 of the Draft Red Herring Prospectus.

34. We have in past entered into related party transactions and we may continue to do so in the future

As of the date of Draft Red Herring Prospectus, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “Restated Financial Information” at page 157. While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

35. We face risks associated with currency exchange rate fluctuations

We transact business in other currency other than the Indian rupee and have significant suppliers abroad, which subject us to currency exchange risks as we import digital textile printers, ink, sublimation paper and Fixed Assets; and make payment in foreign currency. Our reporting currency is in Indian rupees, and we transact a significant portion of our business in other currency, primarily the U.S. Dollar. Accordingly, changes in exchange rates may have a material adverse effect on our profitability and margins. A portion of our purchases, expenses and fixed assets are denominated in foreign currency and we face foreign exchange rate risk to the extent of our purchase, expenses and fixed assets that are denominated in a currency other than the Indian Rupee. Set out in the table below is our Purchase denominated in foreign currency:

36. We are completely reliant on third-party logistics service providers for transport of input materials and finished products.

We procure input materials from domestic and international suppliers, which are brought to our manufacturing units through third party logistics providers including overland transport companies. Similarly, our finished products are transported from our manufacturing units to distribution points by overland transport. The logistics service providers are, therefore, integral to our

Company's business operations. While we have over the years engaged the services of various logistics service providers for our business operations, we do not have, and we do not propose to enter into, contractual arrangements with such third-party logistics providers. While these third-party logistics service providers have generally, in the past, been reliable, we cannot assure you that they will continue to be available to us as required. If such third-party logistics service providers discontinue their services for a reasonable length of time and, if we are unable to obtain the services of other service providers, our business operations could be adversely impacted, at times, significantly. Further there have been no material past instances where our business operations could be adversely impacted due to discontinuation of third-party logistics service provider. Moreover, we cannot assure you that we will not be liable for acts of negligence or other acts which may result in harm or injury to third parties. Any such acts could result in serious liability claims (for which we may not be adequately insured) which may, in addition to resulting in pecuniary liability also entail personal liability, which could significantly adversely impact our business operations and financial condition. Further there are no such past instances where we were made liable for acts of negligence or other acts which has resulted harm or injury to third parties.

37. *Absence of comparable publicly listed companies may adversely affect investor perception, valuation, and marketability of Our Securities*

There are currently no publicly listed companies that are directly comparable to us in terms of our business model, product offerings, market positioning, or operational scale within the digital textile printing industry. The absence of such comparable listed entities may adversely affect the ability of prospective investors, financial analysts, and other market participants to accurately assess our business, competitive positioning, financial performance, and growth prospects.

In the absence of directly comparable peers, investors may face increased uncertainty when evaluating our valuation metrics, risk profile, and overall investment potential. This may result in reduced market confidence, diminished demand for our securities (in the event of a public offering), increased volatility in the market price of our securities, and potentially an undervaluation relative to our intrinsic or fair market value. Additionally, the lack of industry benchmarks may hinder the ability of investors to make informed comparisons, thereby impairing the liquidity and broader marketability of our securities.

38. *If we are unable to manage attrition and attract and retain skilled professionals, it may adversely affect our business prospects, reputation and future financial performance.*

Our business depends upon our ability to attract, develop, motivate, retain and effectively utilize skilled professionals. We believe that there is significant competition in our industry for such professionals who possess the technical skills and experience necessary to execute and manage projects, and that such competition is likely to continue for the foreseeable future. We seek to hire and train a significant number of additional professionals each year in order to meet anticipated turnover and increased staffing needs. Our ability to execute existing projects and to win new contract awards depends, in large part, on our ability to hire and retain qualified personnel. The following table sets forth the attrition rates for our full-time employees for the periods indicated.

Particulars	2024	2023	2022
Employee Turnover Rate (%)	10.21	5.77	-

39. *Any failure in our quality control processes may damage our reputation, and adversely affect our business, cash flows, results of operations and financial condition. We may face reputational harm or proceedings if the quality of our products and services does not meet our customers' expectations.*

It is possible that our products and services may contain quality issues or undetected errors or defects, especially when first introduced or when new products are developed, resulting from manufacturing defects and negligence in storage or handling of our products or other raw materials. We set internal quality standards, including consistent definitions of defects to be detected. However, given the high volume of raw materials and scale of production of finished goods, we are not able to inspect every single item, and may rely instead on selective methods such as sampling. Although there have been no material instances in the past, we cannot assure you that our quality standards will be adhered to, and if they are not, that our quality control processes and inspections will accurately detect all deficiencies in the quality of our products at all times before such products reach the customers. We have, from time to time, due to quality defects, exchanged or accepted returns of products sold to our customers, or otherwise. In the event the quality of our products is not in accordance with our standards or our products are defective, our customers may return our products, we may be required to recall or exchange such products at additional cost to us and our reputation may be impacted. Any deficiencies in the quality of our products may cause adverse reactions to users of such products. This may expose us to product liability claims and legal proceedings brought against us by customers. Although there have been no such actions against us in the past, we cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. Product liability claims, successful or otherwise, may adversely affect our reputation, brand image and sales. Our inability to avoid or defend product liability claims may adversely affect our business, cash flows, results of operations and financial condition.

42. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have an adverse effect on our business and financial condition.

We have obtained an insurance policy in connection with our operations as given in chapter titled “Our Business – Insurance” on page 99. While we are of the opinion that the insurance coverage which our Company maintains would be reasonably adequate to cover the normal risks associated with the operations of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Although there are no instances in the past wherein the company had suffered losses which was in excess of its insurance coverage Our Company’s insurance policy may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. Although there is no instances in the past wherein the company had suffered losses which was in excess of its insurance coverage

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

43. We have not independently verified certain data in this Draft Red Herring Prospectus.

44. The Objects of the Offer for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Offer”.

The fund requirement and deployment, as mentioned in the “Objects of the Offer” on page 76 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter Objects of the Offer is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency and the audit committee of the Company will monitor the deployment of funds and provide disclosure for the same as per applicable provisions. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter Objects of the Offer will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

45. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Red Herring Prospectus, our Promoter and Promoter Group hold 74.40% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders’ approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further details regarding our shareholding, please refer to chapter titled “Capital Structure” beginning on Page 62 of this Draft Red Herring Prospectus.

46. Any future issuance of Equity Shares or convertible securities, including options under any stock option plan or other equity linked securities may dilute your shareholding, and significant sales of Equity Shares by our major shareholders, may adversely affect the trading price of our Equity Shares.

Future issuances of Equity Shares by our Company after this Offer will dilute investors holdings in our Company. Further, any significant sales of Equity Shares after this Offer may adversely affect the trading price of our Equity Shares. In addition, the perception that such issuance or significant sales of Equity Shares may occur may adversely affect the trading price of our Equity Shares and impair our future ability to raise capital through offerings of Equity Shares.

47. After this Offer, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including

- Volatility in the Indian and global capital market;
- Company’s results of operations and financial performance;
- Performance of Company’s competitors,
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India’s economic and fiscal policies; and
- Significant developments in India’s environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Offer. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Offer or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Offer.

48. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to Sell your Equity Shares at or above the Issue Price

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 84 of this Draft Red Herring

Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

49. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Individual Investors can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Offer within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

50. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

51. Delay in raising funds from the IPO could adversely impact the implementation schedule

The proposed fund requirement, for working capital requirement, general corporate purposes and Offer expenses, primarily, as detailed in the chapter titled "*Objects of the Offer*" beginning on page 76 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

52. Pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Offer and our business and financial results may suffer.

53. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs.1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

EXTERNAL RISK FACTOR

54. Natural calamities and force majeure events may have an adverse impact on our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

55. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.

The goods and service tax ("GST") that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules ("GAAR"), The general anti avoidance rules ("GAAR") provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an "impermissible avoidance arrangement", if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

56. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page 92 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

57. A third party could be prevented from acquiring control of us because of the anti-takeover provisions under Indian law

There are provisions in Indian law that may discourage a third party from attempting to take control over us, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Under the Takeover Regulations an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. These provisions may discourage or prevent certain types of transactions involving an actual or threatened change in control of us.

58. Our ability to raise foreign capital may be constrained by Indian law

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Regulatory restrictions may limit our financing sources for our projects under development and hence could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that an adverse effect on our ability to raise foreign capital, which in turn may affect our business, prospects, financial condition and results of operation.

59. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

A public limited company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain their existing ownership, prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by a three-fourths majority of the equity shareholders voting on such resolution.

If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

60. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

61. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

62. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

63. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company and the Promoter Selling Shareholders in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

DETAILS OF THE OBJECTS OF THE OFFER

1. Funding working capital requirements:

The company operates three key divisions: Machinery & Ink Supply (Import & Distribution), Digital Textile Printing, and Sublimation Paper Manufacturing & Supply; each with distinct working capital requirements.

The Machinery & Ink Supply (Import & Distribution) Division sources inks and digital textile printing machines for local manufacturers, requiring payment to suppliers within 45-60 days, while offering customers credit periods of 90-120 days. To meet recurring and surge demands, the division maintains 60-90 days of ink inventory. With sufficient working capital, the company can offer more competitive credit terms and pricing, potentially boosting profitability.

The Digital Textile Printing division engages in own manufacturing and job work, with receivable cycles of around 90 days and additional inventory blockage of 40-60 days for fabrics in own manufacturing. Payable terms are typically 50-60 days.

Meanwhile, the Sublimation Paper Manufacturing & Supply Division has recently undergone significant expansion and continues to increase capacity, resulting in higher raw material requirements. While payment and receivable cycles are similar to other divisions, inventory holding requirements are higher. Effective working capital management is crucial for optimizing operations and profitability across all three divisions.

We fund a majority of our working capital requirements in the ordinary course of business from various banks, unsecured loan and internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements and unlocking the internal accruals deployed in working capital. The funding of the incremental working capital requirements will lead to a consequent increase in our profitability, ability to utilize internal accruals for growth opportunities and achieving the proposed targets as per our business plan.

Basis of estimation of incremental working capital requirement:

Our Company proposes to utilize upto ₹ 4890.00 Lakhs of the Net Proceeds in Fiscal 2025 – 2026 and 2026-2027 respectively towards our Company's working capital requirements. The balance portion of our Company's working capital requirement shall be met from the working capital facilities availed and internal accruals.

The incremental and proposed working capital requirements, as approved by the Board pursuant to a resolution dated April 14, 2025 and key assumptions with respect to the determination of the same are mentioned below. Our Company's composition of working capital as at December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 on the basis of restated financial statements and expected working capital requirements for Fiscal 2025, Fiscal 2026 and Fiscal 2027 are as set out in the table below:

Justification for “Holding Period” levels

The table below sets forth the key justifications for holding levels:

Sr. No.	Particulars	Details
Current Assets		
1.	Inventories	Stock holding capacity depends on the availability of Working capital on hand. With growth in business and profit plough back company has shown increasing stock holdings from 3 days, 26 Days and 42 Days respectively for Fiscal 2022, 2023 and 2024. Projections for Fiscal 2025 is at 50 days with better working capital on hand. Fiscal 2026 and 2027 is expected to have holding levels of 67 and 84 days considering holding of High value inventories and more options of inventories in hand for customer. Increased holding will help achieve quick delivery and grabbing of spontaneous opportunities.
2.	Trade Receivables	Average Holding periods were 41 days till Fiscal 2024. However, with changing market trend overall segment showed higher holding period of around 65 days in fiscal year 2025. But for better selling prices and better opportunity to sell products (with higher credit periods), Fiscal 2026 is estimating 95 days of holding cycle. This will increase profit margins on sales. Further in Fiscal 2027 the same will be kept even more liberal to 115 days to get additional advantage of higher rates to higher credit policy.
Current liabilities		
1.	Trade Payables	Trade payable is directly related with blockage of working capital in receivables and inventory. Fiscal 2022, company operated for 2 months only and hence had low payables of 27 Days. But Fiscal 2023 and 2024 showed same level of holding levels for payable i.e. 40-45 days. With better credits from suppliers the same increased to 63 days for Fiscal 2025. However higher credit period comes with higher cost. So, company is planning to utilize its working capital to maximize bulk discounts and advance payment benefits to pay its payables to average holding days of 56 days and 48 days for fiscal 2026 and 2027 respectively. This will improve bottom-line of the company.

Global Economy

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October. The overall picture, however hides divergent paths across economies and a precarious global growth profile. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.

Growth Projections (Real GDP Growth, % Change)

(Src: <https://www.imf.org/en/Publications/WEO/Issues/2025/01/17/world-economic-outlook-update-january-2025>)

Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and strong supportive financial conditions. Growth is projected to be at 2.7% in 2025. This is 0.5% point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labour markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

In the *Euro area*, growth is expected to pick up but at a more gradual pace than anticipated in October, 2024, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2% point to 1.0% in 2025. In 2026, growth is set to 1.4%, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat. In other *Advanced Economies*, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds-including the sharp uptick in trade policy uncertainty are expected to keep investment subdued.

In *Emerging Market and Developing Economies*, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1% point to 4.6%. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty property market drag. In 2026, growth is projected mostly to remain stable at 4.5%, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labour supply. In *India*, growth is projected to be solid at 6.5% in 2025 and 2026, as projected in October and in line with potential.

In the *Middle East and Central Asia*, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3%-point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In *Latin America and Caribbean*, overall growth is projected to accelerate slightly in 2025 to 2.5%, despite an expected slowdown in the largest economies of the region. Growth in *sub-Saharan Africa* is expected to pick up in 2025, while it is forecast to slow down in *emerging and developing Europe*.

Conversely, Advanced Economies are anticipated to record a comparatively more modest CAGR of 4.0%. Nevertheless, this marks an improvement from past figures, driven by positive employment prospects in the United States and rising consumption trends in Europe. This optimistic long-term economic outlook is poised to stimulate global investments and bolster demand in vital sectors, such as healthcare.

Indian Textile Industry

According to Crisil Ratings, the organized retail apparel sector is projected to achieve revenue growth of 8-10% in the current financial year, driven by rising demand from a normal monsoon, easing inflation, and the festive and wedding seasons. The increasing preference for affordable, trendy fashion clothing that mimics high-fashion designs is expected to be the primary revenue driver this fiscal year. India's textile sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textile sectors at one of the spectrums, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk, and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralized power looms/hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world. In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

The market for Indian textiles and apparel is projected to grow at a 10% CAGR to reach US\$ 350 billion by 2030. Moreover, India is the world's 3rd largest exporter of Textiles and Apparel. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$100 billion. The textiles and apparel industry contributes 2.3% to the country's GDP, 13% to industrial production and 12% to exports. The textile industry in India is predicted to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade.

Textiles and apparel exports from India (US\$ billion)

Textile manufacturing in India has been steadily recovering amid the pandemic. The manufacturing of textiles Index for the month of June 2024 is 106. Global apparel market is expected to grow at a CAGR of around 8% to reach US\$ 2.37 trillion by 2030 and the Global Textile & Apparel trade is expected to grow at a CAGR of 4% to reach US\$ 1.2 trillion by 2030. India's home textile industry is expected to expand at a CAGR of 8.9% during 2023-32 and reached US\$ 23.32 billion in 2032 from US\$ 10.78 billion in 2023. The Indian Technical Textile market has a huge potential of a 10% growth rate, increased penetration level of 9-10% and is the 5th largest technical textiles market in the world. India's sportech industry is estimated around US\$ 1.17 million in 2022-23. The Indian Medical Textiles market for drapes and gowns is around US\$ 9.71 million in 2022 and is expected to grow at 15% to reach US\$ 22.45 million by 2027.

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027. India is the world's largest producer of cotton. In the first advances, the agriculture ministry projected cotton output for 2023-24 at 31.6 million bales. According to the Cotton Association of India (CAI), the total availability of cotton in the 2023-24 season has been pegged at 34.6 million bales, against 31.1 million bales of domestic demand, including 28 million bales for mills, 1.5 million for small-scale industries, and 1.6 million bales for non-mills. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers. It is expected to surpass US\$ 30 billion by 2027, with an estimated 4.6-4.9% share globally.

In 2022-23, the production of fibre in India stood at 2.15 million tonnes. While for yarn, the production stood at 5,185 million kgs during the same period. Natural fibers are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$ 138 billion to US\$ 195 billion by 2025. Textiles exports from India during October were about 11.56% higher on YoY basis at US\$ 1,833.95 million. Apparel exports from India during October were about 35.06% higher on YoY basis at US\$ 1,277.44 million. India's textile industry is on the brink of expansion, with total textile export projected to reach US\$ 65 billion by FY26. India saw a 36.4% increase in industrial design applications, particularly in textiles, accessories, tools, machines, health, and cosmetics.

According to ICRA, Indian apparel exporters are projected to achieve revenue growth of 9-11% in FY25, driven by the gradual reduction of retail inventory in key end markets and a shift in global sourcing towards India. During FY24, the total exports of textiles (including handicrafts) stood at US\$ 35.9 billion. Exports of textiles (RMG of all textiles, cotton yarns/fabs/made-ups/handloom products, man-made yarns/fabs/made-ups, handicrafts excl. handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 35.90 billion in FY24. In FY24, exports of readymade garments including accessories stood at US\$ 14.23 billion. India's textile and apparel exports to the US, its single largest market, stood at 32.7% of the total export value in FY24.

In FY25 (April- June) the total exports of textiles stood at US\$ 9.17 billion. In FY25 (April-June), exports of readymade garments including accessories stood at US\$ 2,244 million. India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

India's Textile Industry: Growth, Investments & Competitive Edge

Competitive Advantage

- Abundant availability of raw materials such as cotton, wool, silk and jute. India enjoys a comparative advantage in terms of skilled manpower and in cost of production relative to other major textile producers.

- In July 2022, the Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, and Textiles, Mr. Piyush Goyal, stated that the mantra of 5 F's - Farms to Fibre to Fabric to Fashion to Foreign export – will help make India a strong textile brand globally.

These developments have been particularly significant in addressing the industry's need for both quality and efficiency, with digital textile printing manufacturers focusing on creating solutions that can handle various fabric types while maintaining consistent output quality.

The market is witnessing a notable shift in production dynamics and business models. Digital textile printing has enabled a more flexible and responsive production approach, allowing manufacturers to optimize inventory management and reduce warehousing requirements. The technology has facilitated the transition from longer batch runs to shorter, more targeted production cycles, enabling better alignment with client needs. This transformation has been particularly evident in the implementation statistics, with leading textile printing manufacturers like ColorJet reporting the successful deployment of over 4,000 textile printing solutions across 315 cities globally, demonstrating the widespread adoption and practical application of digital textile printing technology.

Digital Textile Printing Trends

Growth of Personalization of Clothing Items in the Fashion Industry

The fashion industry is experiencing a fundamental shift toward personalization and customization, driven by changing consumer preferences and the need for unique, individualized clothing items. Digital textile printing technology has emerged as a crucial enabler of this trend, allowing designers and manufacturers to create intricate patterns faster and more efficiently than ever before. The technology enables fashion brands to implement a "see-now, buy-now" strategy, where consumers can immediately purchase

garments they see, effectively negating the current fatigue shoppers experience with traditional retail models and increasing barriers for fast fashion brands attempting to copy designs.

The rise of personalization has led to a significant transformation in production timelines, with digital fabric printing offering immediate execution compared to traditional screen printing's two to three-month timeline. This shift has been particularly evident in the emergence of micro-brands and independent designers who can now offer customized clothing with minimal inventory risks. The technology allows for unlimited color combinations and superior color accuracy, enabling designers to create highly detailed, personalized designs that meet specific customer requirements without the constraints of traditional printing methods.

➤ **Automated Workflows**

The integration of automated workflows in digital textile printing has revolutionized the production process by enabling superior demand forecasting and just-in-time production capabilities. Advanced digital printing technology involves sophisticated workflow automation tools that allow textile mills to produce designs rapidly, meeting the needs of designers and brands with quick changeovers in the fashion industry. These automated systems have significantly improved inventory management, resulting in reduced overstocking and warehousing requirements while enabling better matching of products to client needs.

The development of automation workflow software has enabled companies to schedule digital textile printing tasks in the most optimized ways, incorporating features like order management systems, pre-flighting environments, and sophisticated scheduling systems. These automated workflows have been particularly beneficial for managing larger numbers of short-run orders, which are increasingly common in the personalized fashion market. The integration of technologies such as AI, IoT, machine learning, and data analytics has further enhanced the automation capabilities, enabling superior print personalization even for large-volume orders while maintaining consistent quality and reducing human error in the production process.

➤ **Direct-to-Garment Printing**

Direct-to-Garment (DTG) printing has emerged as a transformative technology in the textile industry, offering unprecedented flexibility and efficiency in garment decoration. The technology enables direct printing onto garments using specialized digital printers, eliminating the need for traditional intermediate steps and allowing for immediate production of custom designs. Modern DTG printing printers have achieved remarkable capabilities, with some models offering print resolutions up to 1,200 x 1,200 dpi and the ability to print on a wide range of fabrics including cotton, polyester, cotton-polyester blends, Lycra, viscose, silk, leather, denim, linen, and wool.

The advancement in DTG printing technology has led to significant improvements in production speed and efficiency, with some printers capable of completing a garment in as little as 15 seconds in high-speed production mode. This technology has particularly benefited small to medium-sized businesses by enabling them to offer on-demand textile printing with minimal setup costs and inventory requirements. The versatility of direct to garment printing has also expanded its applications beyond traditional t-shirt printing to include various fashion items, accessories, and home textile products, making it an increasingly vital tool for fashion brands looking to offer personalized products.

➤ **Reduction in Per Unit Cost of Printing with Digital Printers**

Digital textile printing has revolutionized the cost structure of textile production by significantly reducing per-unit printing costs through various technological and operational improvements. The technology has minimized waste in the overall print market through superior demand forecasting and just-in-time production capabilities, leading to substantial cost savings in materials and inventory management. Digital printing systems have demonstrated remarkable efficiency in dye consumption and waste material formation, enabling printers to effectively reduce costs while simultaneously contributing to environmental sustainability through reduced water consumption, chemical usage, and power consumption.

The cost advantages of digital printing become particularly evident in the comparison with traditional rotary screen-printing methods. While the initial investment in digital printing equipment may be higher, the elimination of screen engraving costs for each color and the ability to produce any possible color without additional adjustments significantly reduces the per-unit cost for varied designs. This cost efficiency is further enhanced by the technology's ability to handle smaller batch sizes economically, enabling fashion brands to print what is already sold instead of selling what is already printed, thereby eliminating the need for discount sales to clear excess inventory and reducing overall operational costs.

Different types of Digital Textile Printing Segments

❖ **Roll-to-Roll Printing Segment in Digital Textile Printing Market**

Roll-to-roll printing dominates the digital textile printing market, commanding approximately 65% market share in 2024.

This printing method involves printing directly onto rolls of fabric instead of individual garments, making it highly efficient for large-scale production. The technology uses specialized ink that becomes part of the final product, preventing issues like cracking, peeling, or fading. Roll-to-roll digital printers are extensively utilized across textile and decor, soft signage, and industrial applications, including interior decor, home textiles, linens, upholstery, drapery, sportswear, and clothing. The segment's dominance is attributed to its versatility in handling various applications from carpets and posters to banners, flags, vehicle wrapping, wallpaper, building material, and POS displays.

❖ Direct-to-Garment Printing Segment in Digital Textile Printing Market

Direct-to-garment printing is emerging as the fastest-growing segment in the digital textile printing market, with a projected growth rate of approximately 13% from 2024 to 2029. This growth is primarily driven by increasing demand for personalized and customized clothing items in the fashion industry. The technology specializes in highly detailed short production run prints on cotton garments, making it ideal for custom-printed trends and brand owners adapting their marketing messages on clothing. The segment's rapid expansion is further supported by significant developments in machinery, software, and web-to-print technologies. Independent retailers, wholesalers, and independent designer micro-brands have been the key players in adopting this printing method, particularly due to its ability to handle complex designs and provide quick turnaround times for small batch productions.

Different Types of Digital Textile Printing

❖ Sublimation Segment

The sublimation segment dominates the digital textile printing market, accounting for approximately 61% of the total market share in 2024. This segment's prominence can be attributed to its versatility and efficiency in producing high-quality prints on various substrates. Sublimation digital printing technology uses heat transfer to apply images to intended substrates, commonly used for decorating apparel, signs, banners, and other items with sublimation-friendly surfaces. The technology offers significant advantages including HD and photographic printing quality, a wide range of color options, higher printing and drying speeds, and simple setups per customer requirements. The process requires six main components: inkjet printer, sublimation ink, transfer paper, RIP software, heat transfer machine, and fabric. As colors are embedded in the substrate rather than printed on the surface, images won't fade or crack even after multiple washes, making it particularly attractive for fashion and textile applications.

❖ Reactive Segment

The reactive segment represents a significant portion of the digital textile printing market, with its versatility in usage across natural fibers, particularly cotton, being a key driver of its growth. Reactive inks are highly valued in the conventional textile printing industry due to their flexibility and ability to print on natural fibers, with cotton being the most important application. The segment is experiencing substantial growth due to its ability to produce high-quality colors, especially when printing on cotton or viscose, and achieve high wash fastnesses. These characteristics are crucial since they ensure that textiles can be washed frequently without losing their color, making them essential for fashion brand applications. The technology involves a chemical reaction during the steaming process that bonds color molecules to the fiber, resulting in superior color retention and durability.

❖ Remaining Segments

The polyester and other substrates segments continue to play crucial roles in the digital textile printing market. Polyester remains a popular choice for sportswear and outdoor applications due to its durability and excellent color retention properties, particularly when used with sublimation printing techniques. The other substrates category, which includes materials like nylon, Lycra, and various blended fabrics, serves specific niche markets and specialized applications. These segments are particularly important in technical textiles and industrial applications where specific material properties are required. The continuous innovation in ink formulations and printing technologies has enabled better printing results on these diverse substrates, making them increasingly viable options for digital textile printing applications.

Enhancing Operational Efficiency and Cost Optimization

To improve our overall operational efficiency and reduce long-term costs, we have implemented a series of strategic initiatives

across our organization. With the support of our management consultant, we undertook a comprehensive restructuring of internal workflows, digitalized key processes, and adopted bottom-up information flow mechanisms to ensure transparency and accountability at every level. This transformation included defining clear roles and responsibilities, decentralizing task ownership, and fostering a data-driven work culture. To achieve this, we undertook a 6-month organization development (OD) project. The intervention was broken down into several key modules in the form of organizational restructuring, process optimization and people & culture development.

As part of the intervention, the consultants worked closely with the leadership team to restructure the organization. This involved creating vertical-wise business heads to decentralize decision-making and increase accountability across functions. Reporting structures were streamlined, and Key Result Areas (KRAs) were developed for each department. Comprehensive process mapping was carried out across procurement, production, marketing and sales to identify inefficiencies and implement standardized Standard Operating Procedures (SOPs). Additionally, internal software tools were integrated to provide better visibility into operations and enable real-time data tracking from the ground level.

As a result of these initiatives, we witnessed a consistent improvement in our operating performance. Our EBITDA margin increased from 7.50% in Fiscal 2022 to 14.71% for the nine-month period ended December 31, 2024, while the PAT margin improved from 5.46% to 8.44% over the same period. This progression reflects the effectiveness of our operational strategies and our continued focus on profitable growth.

The consulting engagement also focused on people and culture development. Department heads were empowered with greater autonomy and were supported through the implementation of a performance dashboard, which enhanced ownership and transparency. Capacity-building workshops were conducted to instill a results-oriented mindset across teams. As a result of these initiatives, we achieved better co-ordination across departments, improved decision-making timelines, and enhanced operational clarity. The new structure allowed the company to scale effectively while maintaining quality and cost efficiency.

This transformation has positioned our Company to capitalize on future growth opportunities with a robust and professional internal framework.

In the fiscal years 2024 and 2023, repeat customer rates stood at 58.33% and 71.77%, respectively—underscoring the sustained confidence our clients place in us.

Note: *Company was incorporated on 9/10/2021

Through regular training sessions led by external experts, we focus on key areas such as leadership excellence, customer-centricity, sales effectiveness, and operational efficiency. Additionally, our robust career progression frameworks and succession planning initiatives are designed to cultivate a deep bench of future-ready leaders. This strategic emphasis on talent and learning ensures we build a resilient, future-focused organization poised to thrive in a dynamic, multi-vertical business environment.

Building a Strong and Scalable Organization

As our Company evolves into a diversified enterprise, spanning fabric printing, sublimation paper manufacturing, printing machine distribution and ink sales which are our core focus remains on building a scalable, agile, and system-driven organization capable of delivering sustainable growth across geographies and business verticals.

To institutionalize this growth, we have adopted a structural organizational architecture anchored on clear task ownership, inter-departmental coordination, and real-time performance reporting frameworks. These systems empower our leadership with end-to-end visibility and agility across the value chain enabling proactive interventions and strategic decision-making.

In line with our forward-looking vision, we are in the process of evaluating and implementing advanced digital infrastructure, including ERP systems and data intelligence tools, to enhance operational speed, accountability, and data-driven decision making. As a strategy step in this journey, we have adopted Turbo software for our sublimation paper production unit. This deployment has improved workflow visibility, optimized resource planning, and reduced lead times—supporting better consistency and efficiency in production. This digital transformation not only streamlines operations but also significantly reduces key person dependencies, ensuring business continuity and operational consistency as we scale.

We are also actively decentralizing operational command by empowering vertical-specific business heads with P&L ownership and standardized KPIs. This approach ensures that each division functions as a self-sustaining, growth-oriented unit, driving innovation and accountability at the ground level. This scalable, systems-based organizational framework positions our Company to seamlessly expand into new regions, product categories, and customer segments—both within India and internationally. It also lays the foundation for a professionally governed, future-ready organization, capable of navigating market complexity while delivering consistent value to all stakeholders.

Effective Working Capital Management

I. Sublimation Paper:

The production of sublimation paper involves a combination of precision coating technology, paper engineering, and quality control to ensure high ink transfer and print clarity. The following are process diagram and steps taken in the manufacturing process of sublimation paper: -

➤ Base Paper Selection

The process begins with the selection of high-quality base paper, typically made from wood pulp or recycled fibers. The paper must have specific properties such as smoothness, weight (commonly 30–100 GSM), and dimensional stability.

➤ Coating Preparation

A specialized sublimation coating is prepared using a mixture of chemicals and additives, including silica, binders, crosslinking agents, and water. This step is crucial as the composition of the coating directly influences the final properties of the coated paper—such as its gloss, printability, and ink absorption. The ingredients are mixed to the right viscosity and composition to ensure smooth application and optimal performance. This coating formulation is crucial to control ink absorption and drying speed.

➤ Coating Application

Once the coating is ready, it is evenly applied to the surface of the base paper using advanced machinery. Uniform coating ensures that the surface is consistent in texture and finish, which is vital for high-quality printing and usage. Depending on the type of paper product being manufactured, this step may involve single or multiple layers of coating.

➤ Drying & Curing

After application, the coated paper passes through a drying and curing process. Heat is applied to remove moisture and to cure or set the coating, so it bonds well with the base paper. This step stabilizes the coating, preventing smudging or surface defects while enhancing the paper's mechanical and visual properties.

➤ **Calendering**

In this step, the coated and dried paper is passed through calendering rolls to improve its surface finish. This process involves pressing the paper between heated rollers, which smoothens the surface and enhances gloss or desired texture. It gives the coated paper a uniform thickness and an appealing look and feel, depending on whether a matte, glossy, or satin finish is required.

➤ **Slitting & Rewinding**

After finishing, the large master rolls of paper are slit into smaller rolls of required widths. The slit paper is then rewound into compact rolls, making it easier to handle, transport, and distribute to customers. This step allows customization of the paper roll sizes as per customer or printing press requirements.

➤ **Quality Control & Testing**

The final stage involves rigorous testing to ensure the coated paper meets all quality standards. Various tests are conducted to assess ink absorption, printability, gloss, smoothness, thickness, and other physical properties. Only the paper that passes these tests is approved for packaging and dispatch, ensuring that end users receive a product that performs reliably under printing and usage conditions.

This manufacturing process enables sublimation paper to deliver vibrant color reproduction, quick drying, and superior transfer properties, which are vital in the textile printing and apparel industry.

II. Textile Printing

Textile printing is a well-integrated process that blends advanced digital printing technology with a highly coordinated workflow to deliver consistent, high-quality output for the fashion and apparel industry. The process can be broken down into the following stages based on different fabrics:

Polyester Fabric Printing Process:

Following is the detailed explanation of each step in the process:

➤ **Receiving and Storing Fabrics**

The process starts with the arrival of raw polyester fabrics at the warehouse. These fabrics are carefully logged into the inventory system to ensure accurate tracking and management. They are then stored under controlled conditions to prevent any damage, dust, or contamination. Proper storage is essential to maintain the quality of the fabric until it is ready for further processing.

➤ **Fabrics Inspection**

Before any treatment or printing is carried out, each roll of fabric undergoes a thorough inspection. This step involves checking for visible defects such as holes, stains, or inconsistencies in the weave. The goal is to identify and remove substandard fabrics so that only high-quality material proceeds to the next steps. Ensuring defect-free fabric is crucial for achieving premium end results.

➤ **Fabric Ready for Dyeing/Printing (RFD Preparation)**

The inspected fabric is subjected to RFD (Ready for Dyeing) preparation, which typically includes a softening treatment. During this step, any residual impurities are removed from the fabric's surface. This treatment enhances the fabric's ability to absorb dyes or inks uniformly during the printing process, ensuring vibrant and even color distribution.

➤ **Design Printing on Sublimation Paper**

Customer-approved designs are digitally printed onto sublimation paper using high-resolution printers. These special papers are designed to hold the ink in a way that allows it to be transferred later onto the fabric. The digital printing allows for intricate, detailed, and customized designs, meeting specific client requirements.

➤ **Design Transfer via Heat**

Once the sublimation paper is printed, it is aligned with the fabric, and the design is transferred using a heat press machine. The application of heat causes the ink on the sublimation paper to convert into gas and bond with the fabric fibers. This creates a vibrant, permanent print that is embedded into the fabric rather than sitting on top of it.

➤ **Softening Process**

After the printing is complete, the fabric goes through another softening treatment. This step is important to enhance the tactile feel of the fabric, making it smooth, soft, and comfortable to wear or use. It ensures that the printed fabric is not only visually appealing but also pleasant to the touch.

➤ **Final Inspection**

Before packing, the printed fabric undergoes a detailed final quality inspection. This includes checking for print alignment, color accuracy, and ensuring there are no visible defects. It is a critical step to make sure that the end product meets all quality standards and customer expectations.

➤ **Packing and Dispatch**

Once the fabric passes the final inspection, it is carefully packed and labeled according to order specifications. This packaging process ensures the fabric is protected during transit and ready for delivery to customers or for further use in garment production.

(The remainder of this page is intentionally left blank)

Cotton/Viscose Fabric Printing Process:

Following is the detailed explanation of each step in the process of Cotton Fabric Printing:

➤ **Receiving the Fabric**

The process begins with the arrival of raw cotton or viscose fabric at the warehouse. This step includes logging the incoming material, checking for basic compliance with order specifications, and preparing it for initial processing. Proper storage and handling are ensured to avoid any physical damage or contamination before printing begins.

➤ **Quality Check**

Before moving forward, the fabric undergoes a primary quality inspection. This involves visually and manually examining the fabric for defects such as holes, stains, weave irregularities, or any other issues that may affect the final print outcome. Identifying and removing defective fabric at this stage ensures the production of premium quality printed textiles.

➤ **Preparation for Dyeing/Printing**

To prepare the fabric for printing, a special coating or treatment is applied. This chemical treatment enhances the fabric's capacity to absorb and retain the ink, ensuring bright, vibrant, and long-lasting colors. This preparatory step is crucial to maintain consistency and improve ink adhesion during the digital printing process.

➤ **Digital Printing**

In this stage, intricate and custom designs are printed onto the fabric using digital printing technology. High-resolution digital printers spray tiny droplets of ink directly onto the pretreated fabric, achieving high precision and detailing. This method allows for flexibility in design and is well-suited for both short and long runs.

➤ **Heat Curing**

After printing, the fabric is subjected to a heat curing process. Heating helps in fixing the ink into the fabric fibers, enhancing color durability and wash-fastness. This step ensures that the colors stay vibrant and do not fade easily with washing or exposure to sunlight.

➤ **Washing/Drying**

Once the ink is cured, the fabric is washed to remove any leftover coating, unbound ink particles, or chemical residues. This step is essential for softening the fabric and preventing any post-printing discoloration or staining. After washing, the fabric is thoroughly dried to prepare it for final treatment.

➤ **Finishing Touches**

The dried fabric undergoes final finishing processes to enhance its hand feel, drape, and appearance. Finishing treatments might include softening, calendaring (for smoothness), or adding other functional properties like anti-pilling or wrinkle resistance. This gives the fabric a professional, premium finish suitable for end use.

➤ **Final Inspection**

A comprehensive final quality check is conducted before the fabric is dispatched. This includes checking the alignment, sharpness, and consistency of the prints as well as overall fabric condition. Only fabrics that meet all visual and technical standards are cleared for packaging and delivery, ensuring customer satisfaction.

The time duration from public Issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular No. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“**DPIIT**”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Issue Procedure – Bids by Eligible NRIs**” and “**Issue Procedure – Bids by FPIs**” on page 218 and 218, respectively.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see “**Issue Procedure**” on page 218.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.

The Equity Shares have not been and will not be registered, listed, or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.
