- *Some events may not be material at present but may have a material impact in future.*

### **INTERNAL RISK FACTORS**

- 1. The success of our products depends on our ability, as well as that of our customers, to anticipate market trends and understand customer preferences early on, leveraging this information successfully. Failure to do so could negatively impact our cash flows, business performance, financial condition, and overall operational results.***

Our products play a key role in the performance or quality of fast-moving consumer goods (FMCG) by our customers. As a result, our success is closely tied to how well our customers’ products perform with end consumers. The success of these products hinges on our collective ability to anticipate and accurately assess evolving consumer trends, which are shaped by factors such as economic conditions, changing work and leisure habits, disposable income, and preferences across different demographics. However, there is no guarantee that we or our customers will correctly interpret these trends or that the demand for goods utilizing our products will remain strong.

Our products are integral to enhancing the performance and quality of our customers' fast-moving consumer goods (FMCG). Consequently, our success is directly linked to the performance of our customers' products in the hands of end consumers. The success of these products depends on our shared ability to anticipate and accurately interpret evolving consumer trends, influenced by factors such as economic conditions, shifting work and leisure habits, disposable income levels, and preferences across diverse demographics. However, there is no assurance that we or our customers will accurately interpret these trends or that the demand for products incorporating our offerings will continue to be strong.

To remain competitive and achieve our strategic objectives, we may need to make substantial investments in innovation, product development, and market research to effectively anticipate customer needs and provide timely, customized solutions. These investments will generate future revenue only if they are successfully developed products that align with customer specifications, and are competitively priced, and gain acceptance in the consumer market. Furthermore, there may be a considerable delay between incurring development costs and realizing returns.

Our ability to generate revenue from these efforts is influenced by various external factors, including delays in customer product launches, inadequate promotional support from customers, unmet sales projections, changing market demands, and disruptive

innovations by competitors. Any of these challenges could adversely affect our cash flow, business operations, financial health, and overall performance.

**2. *Success in our fragrances and flavors business relies on a limited pool of highly specialized employees, making recruitment and retention critical to our ability to compete and achieve strategic objectives.***

The business demands extensive knowledge, experience, and unique skill sets. However, our collaborative approach ensures that each project involves multiple team members working together to deliver results. When an employee departs, their individual expertise leaves with them, but the collective knowledge and processes remain within the organization, minimizing the impact on ongoing projects or overall performance. While finding a replacement with the necessary expertise can be challenging, we address this through succession planning to ensure continuity and maintain operational efficiency.

**3. *A significant portion of our revenues is dependent on a few key customers, with whom we do not have firm commitments. The loss of any one or more of these major customers could have a material adverse effect on our business, cash flows, results of operations, and financial condition.***

A significant portion of our revenues is dependent on a few key customers. For example, our top five customers accounted for 49.26%, 45.08%, and 45.90% of our revenue from operations for fiscal years 2025, 2024 and 2023 respectively. This reliance on a limited number of customers exposes us to risks, including, but not limited to, reductions, delays, or cancellations of orders from these key customers, the failure to negotiate favorable terms, or the potential loss of these customers. Any of these factors could have a material adverse effect on our business, financial condition, results of operations, cash flows, and future prospects

In addition, we have not entered into long-term agreements with our customers, making the success of our business heavily reliant on maintaining strong relationships with them. The loss of one or more of these key customers, or a reduction in the business we receive from them, could negatively impact our operations, financial condition, results of operations, and cash flows

Moreover, there is no assurance that we will be able to retain the business of our current key customers or maintain the same level of business with each of them. To retain certain customers, we may need to offer terms that could place a strain on our resources. Additionally, our revenues may be negatively impacted if there are changes in our customers' supply chain strategies, a decrease in their outsourcing of products we provide, or if they choose to work with competitors. A significant reduction in the volume of business with these customers could also adversely affect our business.

We cannot guarantee that we will be able to maintain our historical levels of business or negotiate and secure long-term contracts with our significant customers on commercially viable terms, nor that we will be able to reduce customer concentration in the future. Additionally, sales volume may fluctuate due to factors such as our customers' inventory management, market demand, product pricing trends, and shifts in customer preferences. These factors may lead to decreased demand or reduced commercial success of our products, which could negatively impact our sales, cash flows, results of operations, and overall financial condition.

Additionally, we are exposed to the risk of payment delays and defaults by our major customers, and our financial position and performance are heavily dependent on their creditworthiness. There is no assurance that any or all of our customers will settle their outstanding amounts on time or fulfill their obligations, especially if they face financial difficulties, cash flow issues, a decline in business performance, or a downturn in the global economy. If any of these events occur with our major customers, our financial performance and operating cash flows could be adversely affected.

**4. *Increasingly stringent regulatory environment with regard to food, cosmetic ingredients and FMCG could result in stricter standards being applied to our products, which could cause us to incur substantial costs, which may have an adverse effect on our business and results of operations.***

Fragrances and flavours used in Food and Non-food FMCG products are subject to regulatory changes at the global level, we provide Fragrances and Flavours which comply to these changes. This is a continuous process which we follow from the beginning and are successfully able to make the changes accordingly and sustain.

Although our customers ultimately manufacture these end products, our fragrance and flavour products are often key components for such products and must therefore comply with the regulations applying to them. Food ingredients in particular are subject to complex regulatory systems globally. If these regulations were to be breached, we could face substantial legal sanctions, including fines. However, our Company has not faced any regulatory action with respect to food, cosmetic ingredients and FMCG in the preceding three years. Regulations are supplemented by strict standards imposed by self-regulating associations and certain of our key customers. Gaps in our operational processes could adversely affect the quality of our finished products and result in regulatory non-compliance. If a product non-compliance were to go undetected by us, it could subject us to customer claims and adverse publicity, recalls, penalties, litigation costs and settlements, remediation costs or loss of sales. As our fragrances and flavours are used as ingredients in many products meant for human consumption, these consequences would be exacerbated if our customers did not identify the defect and there was a resulting impact at the consumer level. Furthermore, adverse publicity about our products, including concerns about product safety or similar issues, whether real or perceived, could harm our reputation and result in an

immediate adverse effect on our sales, as well as require us to utilize significant resources to rebuild our reputation. A violation could result in the loss of customers and could have an adverse effect on our business, results of operations and financial condition.

**5. *Disproportionate increases in raw materials prices and significant dependence on a limited number of suppliers for unique raw materials could adversely affect our business, results of operations and cash flows***

The majority of our production costs, excluding personnel costs, are attributable to raw materials, such as essential oils, fruit & flower extracts, as well as other natural substances, aroma ingredients. The prices of these raw materials, have been volatile in the past. Although we have been able to pass on some increases in raw materials prices to our customers in the past, we cannot assure you that in the event of a disproportionate increase in the price of raw materials to our sales prices and the price pressures we face from the competition in the fragrance and flavour industry, we will be able to continue to transfer such increases to our customers in the future. If we are unable to increase the selling prices of our fragrance and flavour products or rework the product at the existing price to cover raw material and other input cost increases, or if we are unable to achieve cost savings to offset such cost increases, we could fail to meet our cost expectations and our profits and results of operations could be adversely affected. Further any increases in prices of our products may lead to declines in volume sold, and we may not be able to accurately predict the impact of price increases on volumes sold, which could adversely affect our financial condition and results of operations.

**6. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

We believe our employees and personnel, are critical to maintain our competitive position. Our employees are not unionized. None of our employees are currently represented by a recognized collective bargaining agreement. Although we have not experienced any material labour unrest in the past, we cannot assure you that we will not experience disruptions in work or our retail operations due to disputes or other problems with our workforce, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us in the future, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

**7. *There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to ROC***

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee of Rs.69000 as specified by RoC. Also, the company has not paid stamp duty on issue of shares since incorporation except bonus shares made by company for that company has filed application with the Collector of Stamps. No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position. Details of the delay filings is as follows:

#### **8. Increasing Competition and Industry Consolidation May Adversely Impact Our Business**

The fragrance and flavor industry is characterized by intense competition and a growing trend towards consolidation. Increasing competition and growing trend towards consolidation in the fragrance and flavour industry can result in declining prices and weaken our market share, which could adversely affect our business, financial condition and results of operations. Additionally, industry consolidation may result in larger, more resourceful competitors with enhanced operational efficiencies, and greater bargaining power with suppliers and customers.

Such developments may weaken our competitive position, erode our market share, and impact our pricing strategy. If we are unable to effectively differentiate our products, maintain cost efficiencies, or respond to competitive pressures, our revenues, profitability, and overall financial condition may be adversely affected. Furthermore, increased competition could lead to higher marketing and product development costs, which may further impact our financial performance.

Any failure to adapt to the evolving market dynamics could have a material adverse effect on our business, financial condition, and results of operations.

#### **9. Intense competition and consolidation in the FMCG industry may lead to increased price pressure on our customers. If we are unable to compete effectively, our sales and results of operations will suffer.**

A significant portion of our customers operate in the highly competitive FMCG industry, which is characterized by shorter product life cycles, increasing end-product substitutions, and intense rivalry among well-established brands. These factors have contributed to growing price pressure on our customers in recent years. Additionally, the discontinuation or replacement of certain consumer products could negatively impact our financial performance and operational results.

Global FMCG companies regularly inspect our manufacturing facilities to ensure compliance with their standards, which is essential for maintaining our position on their supplier core lists. These companies often limit the number of suppliers they work with, prioritizing those on core lists for new or modified products. To remain competitive, we must continue investing in customer relationships, anticipating their needs, delivering high-quality service, and ensuring that our products and manufacturing facilities meet required standards. Failure to do so could negatively affect our business and overall performance.

***10. Our ability to successfully implement our growth strategy is subject to various internal and external factors that may impact our expansion plans, operational efficiency, and overall business performance***

Our ability to successfully implement our growth strategy is subject to various internal and external factors that may impact our expansion plans, operational efficiency, and overall business performance. These factors include, but are not limited to, changes in market conditions, evolving customer preferences, macroeconomic fluctuations, increased competition, regulatory and policy changes, availability of capital, operational and technological challenges. Any failure or delay in executing our growth initiatives effectively, including entering new markets, expanding our product offerings, or optimizing operational processes, may adversely affect our business, financial condition, and results of operations. Additionally, unforeseen challenges such as disruptions in supply chains, geopolitical developments, or industry-specific risks could further hinder our growth trajectory. While we continue to assess and refine our strategies to mitigate these risks, there can be no assurance that we will be able to achieve our anticipated growth objectives within the expected timeframes or at all."

***11. Conflicts of interest may arise out of common business undertaken by our Company and our Group Entity***

Our Group entity, M/s Vishali F&F LLP is authorized by their memorandum to carry similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Promoter Group entity in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other entities in which our Promoters or their immediate relatives have interests. There can be no assurance that our Promoters or members & entities of our Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

***12. Our reliance on certain industries for a significant portion of our sales could have an adverse effect on our business***

A significant portion of our revenue received from fragrance industry, which contributed 94.96%, 92.05% and 91.23% of our revenue for the fiscal years 2025, 2024 and 2023 respectively. Any decline in demand from this sector could materially and adversely impact our revenue, financial condition, cash flows, and overall business operations.

Furthermore, disruptions in the supply chain, including delays in delivery or quality-related issues, could impair our ability to meet customer demand, potentially leading to loss of sales. Any change in government policies, industry norms, or compliance standards may affect our ability to supply products to the fragrance industry. A substantial decrease in our customer base or restrictions imposed by regulatory authorities could have a negative impact on our business, results of operations, and financial stability.

***13. Our performance may be adversely affected if we are not successful in managing our inventory or working capital balances***

We assess our inventory balances by considering factors such as shelf life, sourcing expectations, known usage patterns, and anticipated demand based on forecasted customer orders and shifts in our product sales mix. Effective inventory management is essential to our business success, operational performance, and profitability. To achieve this, we must strike a balance between maintaining adequate inventory levels to meet customer demand and avoiding excessive stock that could lead to increased storage costs and negatively impact our financial results. If our raw material procurement decisions fail to align with actual sourcing conditions, customer trends, or anticipated needs, we may be required to take unexpected markdowns or impairment charges to address surplus or obsolete inventory, which could negatively affect our financial performance.

***14. Any non-compliance or delays in EPF Return Filings may expose us to penalties from the regulators***

We are required to file EPF returns with the respective authorities. However, there are certain inadvertent delays in relation to filing of EPF returns in the past for the FY 2017-18, 2022-23 and 2023-24 and company has paid total interest and damage fees of Rs. 8405 and taken the steps to improve the internal system for payment of EPF to mitigate the technical difficulties. Further there are inadvertent delays in relation to filing of form GSTR-3B for the month of March, 2020 and April, 2020 due to COVID-19 pandemic. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties

by statutory authorities on account of any inadvertent discrepancies or delay in our EPF and GST filling in future, which may adversely affect our reputation and goodwill of the company.

**15. Some of Our Group Company has incurred losses in the last three financial years**

"Our Group Company, M/s Divcare PC&H Private Limited has incurred losses on the financial year 2022, 2023 and 2024, Sachee Holdings Private Limited has incurred losses in the financial year 2022 and 2023 and Sacheerome Advance Technologies Private Limited have incurred losses in the financial years 2022 and 2023. Continued financial underperformance by our Group Company may adversely impact its operations and, in turn, may have a bearing on our business, financial condition, and reputation. While our Company operates independently, any financial distress or unfavourable market perception associated with our Group Company could potentially affect investor confidence and our ability to raise capital in the future. There can be no assurance that our Group Company will be able to achieve profitability in subsequent years, and any sustained losses could have an indirect adverse effect on our business prospects and financial position."

**16. The sale of our products is concentrated in state of Uttar Pradesh. Any adverse developments affecting our customers operations in such region, could have an adverse impact on our business, financial condition, results of operations and cash flows**

The following table sets forth our revenue from operations from Uttar Pradesh in the periods indicated:

Geography	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Amount (Rs. In Thousands)	Percentage of Total Revenue	Amount (Rs. In Thousands)	Percentage of Total Revenue	Amount (Rs. In Thousands)	Percentage of Total Revenue
Uttar Pradesh (for fragrance)	3,14,611	29.26%	309,107	36.32%	258,924	36.73%
Uttar Pradesh (for flavors)	7277	0.68%	2,482	0.29%	1,375	0.20%

Any significant social, political or economic disruption, or natural calamities or civil disruptions in this region, or changes in policies of the state or local governments or the government of India or adverse developments related to competition in Uttar Pradesh, may adversely affect our business, results of operations, financial condition and cash flows.

While we have not experienced any of the above risks that had an adverse impact on our business operations and financial conditions in the past, we cannot assure you that these risks will not arise in the future.

**17. Our Manufacturing facility and Corporate Office is not owned by us**

Our existing manufacturing facility and corporate office premise situated at F-89-4-2 Okhla Industrial Area, Phase-1, New Delhi, India, 110020 from where we operate is not owned by us, it is taken on lease rent from our promoter group M/s Vaishali F&F LLP on arm's length basis. We have renewed our rental agreement for further 9 years up till 31 March 2034. Post which we cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises after our rental agreement expired on 31st March 2034, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

**18. We are required to obtain certain approvals and licenses as part of our regular business operations and must comply with various rules and regulations. Any failure to secure, retain, or renew these approvals and licenses, or to adhere to these rules and regulations, could have a negative impact on our operations.**

We require various statutory and regulatory permits, licenses, and approvals to operate our business, some of which have already been obtained while others are in the process of being applied for. Many of these approvals are subject to periodic renewal. Failure to renew any expiring approvals, to apply for necessary approvals, licenses, registrations, or permits, or any suspension or revocation of the approvals we hold, could result in delays to our operations. Such issues may negatively impact our business, financial condition, results of operations, and future prospects.

Additionally, some of our permits, licenses, and approvals are contingent on meeting certain conditions, and we cannot guarantee that we will be able to consistently fulfil these requirements or demonstrate compliance to the relevant authorities. Failure to do so may lead to the cancellation, revocation, or suspension of these permits, licenses, or approvals, potentially disrupting our operations and having a material adverse impact on our business, financial condition, cash flows, and results of operations. Moreover, if we fail to comply with all applicable regulations, or if there are changes in regulations or their implementation, we could face increased costs, penalties, or disruptions to our business activities, any of which could adversely affect our operations. **19. Any failure of our information technology systems could adversely affect our business and our operations**

We have information technology systems that support our business processes, including product formulas, product development, sales, order processing, production, distribution and finance. These systems may be susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, breakins and similar events. Effective response to such disruptions will require effort and diligence on the part of our third-party vendors and employees to avoid any adverse effect to our information technology systems. In addition, our systems and proprietary data stored electronically may be vulnerable to computer viruses, cybercrime, computer hacking and similar disruptions from unauthorized tampering. If such unauthorized use of our systems were to occur, data related to our product formulas, product development and other proprietary information could be compromised. The occurrence of any of these events could impact our operations, subject us to increased operating costs and expose us to litigation.

**20. We are required to obtain certain approvals and licenses as part of our regular business operations and must comply with various rules and regulations. Any failure to secure, retain, or renew these approvals and licenses, or to adhere to these rules and regulations, could have a negative impact on our operations.**

Many of these approvals are subject to periodic renewal. Failure to renew any expiring approvals, to apply for necessary approvals, licenses, registrations, or permits, or any suspension or revocation of the approvals we hold, could result in delays to our operations. which may affect our ability to use such trade marks in the future. If we are unable to renew or register our trademarks for various reasons, or if any of our unregistered trademark are registered in favour of or used by a third party in India or abroad, we may not be able to claim registered ownership of such trademark and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill in India and abroad. Apart from this, any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future.

Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third party claim on any of our unprotected intellectual property may impact our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad.

For further details see “*Our Business - Intellectual Property*” and “*Government and Other Statutory Approvals*” on pages 99 and 181 respectively.

**23. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

We believe our employees and personnel, are critical to maintain our competitive position. Our employees are not unionized. Although we have not experienced any material labour unrest, we cannot assure you that we will not experience disruptions in work or our retail operations due to disputes or other problems with our workforce, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us in the future, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

**24. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.***

Our company faces potential risks related to incidents of theft or damage to inventory located at manufacturing unit. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on our results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company. Though, there had been no of such instances in past, we may not able to assure such incident will not happen in the future.

**25. *We are susceptible to risks relating to unionization of our employees employed by us.***

None of our employees are currently represented by a recognized collective bargaining agreement. We cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. If not resolved in a timely manner, these risks could limit our ability to provide our services to our clients, or result in an increase in our cost of employee benefits and other expenses. If any of these risks materialize, our business, results of operations and financial condition could be affected.

**26. *We have experienced negative cash flows from operations in the recent past, and we may have negative cash flows in the future.***

Net cash flows (used in)/generated from financing activities	17,652	13,130	(87,084)

If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

**27. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.**

The details relating to insurance expenses incurred by our company in the reporting period is mentioned below:

We may be exposed to various risks which we may not be able to foresee or may not have adequate insurance coverage. Our insurance coverage may not be adequate to cover such loss or damage to life and property, and any consequential losses arising due to such events will affect our operations and financial condition. Further, in addition to the above, any such fatal accident or incident causing damage or loss to life and property, even if we are fully insured or held not to be liable, could negatively affect our reputation, thereby making it more difficult for us to conduct our business operations effectively, and could significantly affect our business, availability of insurance coverage in the future and our results of operations.

While we believe that the insurance coverage that we maintain is in accordance with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our cash flows, results of operations and financial performance could be adversely affected. In the event that our Company files a claim under the applicable insurance policy, there is no assurance that we will be able to recover all, or part of the losses incurred.

**28. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.**

However, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

**46. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.***

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

**47. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.***

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighbouring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

**48. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.***

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**49. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's

normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

**50. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

**51. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

**52. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

**53. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.***

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

**54. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

**55. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

**56. *We will continue to be controlled by our Promoter and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.***

As on the date of this Prospectus, our Promoter and Promoter Group hold 100% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled "Capital Structure" beginning on Page 48 of this Prospectus.

**57. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

**58. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time***

Following the Issue, we will be subject to a daily "Circuit Breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

**59. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

**60. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.***

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

**61. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

**62. *QIBs and Non Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/ Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors and Eligible Employees can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment within Three Working Days from the Bid/Issue Closing Date, or such other period as may be prescribed by the SEBI, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, financial condition or cash flows may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

**63. *Pursuant to listing of the Equity Shares, we may be subject to pre emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre emptive surveillance measures, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization etc. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, networth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

**64. *The determination of the Price Band is based on various factors and assumptions and the issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the issue. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLM is below their respective issue prices.***

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the issue Price of the Equity Shares will be determined by our Company, in consultation with the Book Running Lead Manager through the Book Building Process.

The Issue Price will be based on numerous factors, including the factors described in "Basis for Issue Price" on page 81 and may not be indicative of the market price for the Equity Shares after the Issue. Further, the BRLM has previously handled issues wherein the market price of the issued shares declined below the Issue price of shares within 30 days of their listing and in certain cases continued to trade at a price lower than their Issue price on the 180th day from listing. For details of the price information of the past issues handled by the BRLM, see "Other Regulatory and Statutory Disclosures" on page 187.

In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, there can be no assurance that the investors will be able to resell Equity Shares at or above the Issue Price resulting in a loss of all or part of the investment.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

#### Direct Taxation

##### Concessional corporate tax rates - Section 115BAA of the IT Act

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfilment of certain conditions. The option to apply this tax rate is available from Financial Year ('FY') 2019-20 relevant to Assessment Year ('AY') 2020-21 and the option once exercised shall apply to subsequent AYs. The concessional rate is subject to a company not availing any of the following deductions under the provisions of the IT Act:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation;
- Section 32AD: Investment allowance.
- Section 33AB/33ABA: Tea coffee rubber development expenses/site restoration expenses
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development.
- Chapter VI-A except for the provisions of section 80JAA and section 80M.

The total income of a company availing the concessional rate of 25.17% (i.e. 22% along with surcharge and health and education cess) is required to be computed without set-off of any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives.

A company can exercise the option to apply for the concessional tax rate in its return of income filed under section 139(1) of the IT Act. Further, provisions of Minimum Alternate Tax ('MAT') under section 115JB of the IT Act shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed.

The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

The Company has already opted for the concessional tax rate benefit for the FY 2023-24 relevant to the AY 2024-25 as mentioned in the Section 115BAA for which declaration in Form 10-IC has already been filed with the income tax authority

### GLOBAL ECONOMY

#### Macroeconomic Environment

As per the International Monetary Fund's (IMF) World Economy Outlook, April 2024, report, global growth estimated at 3.2% in 2023, is projected to continue at the same pace in 2024 and 2025. The forecast for 2024 is revised up by 0.1% point from January 2024 *World Economy Outlook (WEO) Update*, and by 0.3% point from the October 2023 WEO. The pace of expansion is low by historical standards, owing to both near-term factors, such as still-high borrowing costs and withdrawal of fiscal support, and longer-term effects from the COVID-19 pandemic and Russia's invasion of Ukraine; weak growth in productivity; and increasing geoeconomic fragmentation. Global headline inflation is expected to fall from an annual average of 6.8% in 2023 to 5.9% in 2024 and 4.5% in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies.

Src: World Economic Outlook, April 2024

Economic activity was surprisingly resilient through the global disinflation of 2022-23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. Growth in employment and incomes held steady, reflecting supportive demand developments including greater-than-expected government spending and household consumption-and a supply-side expansion amid, notably, an unanticipated boost to labor force participation. The unexpected economic resilience, despite significant central bank interest rate hikes aimed at restoring price stability, also reflects the ability of households in major advanced economies to draw on substantial savings accumulated during the pandemic.

### INDIAN ECONOMY

*India to stay the fastest-growing large economy in 2024 among key nations*

After a better-than-expected 7.6% this fiscal, India's real GDP growth will likely moderate to 6.8% in fiscal 2025. The next seven fiscals will see the Indian economy crossing the US\$ 5 trillion mark and inching closer to US\$ 7 trillion. The transmission of the rate hikes effected by the Monetary Policy Committee(MPC) of the Reserve Bank of India (RBI) between May 2022 and February 2023 still continues and is likely to weigh on demand next fiscal. On the other hand, regulatory actions to tame unsecured lending will have a bearing on credit growth.

Among the major economies, India with a growth rate of 9.1% was the fastest growing economy in 2021, followed by China at 8.4%. The country also overtook the UK as the fifth-largest economy in the world in the April-June quarter of 2022 and registered GDP growth of 6.8% in 2022. India is expected to grow faster than China in 2023 and 2024 as per the IMF forecast.

#### India's macroeconomic assessment

##### *India's capital formation story has begun to unfold*

The Indian government's economic growth strategy rests on two pillars: growth through infrastructure buildout, and inclusion through empowerment. Overall, public sector spending on capital investment rose from ₹7.9 lakh crore in fiscal 2017 to a budgeted ₹18.6 lakh crore in fiscal 2024. As we begin the countdown to the next decade, the Indian economy is expected to achieve some key milestones:

1. Over a seven-year period (fiscal 2025-2031), economist expect India to sustain average GDP growth of 6.7%. This, over a similar growth rate seen in the past decade (pre-pandemic), is expected to compound the gains for the economy.
2. The economy is expected to expand to US\$ 6.7 trillion by fiscal 2031 from US\$ 3.6 trillion this fiscal. That would mark a growth of 1.9 times in the next seven fiscals.
3. Fiscal 2031 will mark the year when India enters the upper middle-income country club with per capita income rising to US\$4,500. Such a shift augurs well for consumption. India's close peers that are currently in this club include Indonesia, South Africa, Thailand and Brazil.

##### *US\$ 7 trillion now in sight for India's GDP*

The Indian economy will close this fiscal at US\$3.6 trillion. It is interesting to note that the pandemic years did not materially deflect the economy's march towards US\$ 5 trillion and subsequently US\$ 7 trillion for the following two reasons: -

- Nominal GDP was only 2.8% below its pre-pandemic trend level in fiscal 2024 (the pre-pandemic trend level is the forecast value of nominal GDP for fiscal 2024 in the absence of the pandemic).
- A slower pace of rupee weakening. The rupee weakened 4% on average over fiscals 2021-2024, compared with 4.3% in the pre-pandemic decade.

This forecast is based on India's improved growth premium, investor confidence and inclusion in global bond indexes, which will help keep the balance of payment comfortable and moderate the pace of currency depreciation. S&P Global estimates suggest that just the inclusion of India's bond indexes could attract an initial inflow of US\$20-40 billion, which could increase to US\$180 billion over the next decade.

At US\$6.7 trillion, the economy is expected to be 1.9 times in seven years.

### ***Make in India***

Indian government launched the 'Make in India' initiative in 2014 to boost local manufacturing and to make India a global manufacturing hub. The scheme involved focused investments to increase innovation and intellectual property, develop best-in-class manufacturing infrastructure and promote favorable policy initiatives. The scheme currently focuses on improving twenty-seven key sectors, fifteen of which are manufacturing sectors with tailored 'Action Plans'. The Department for Promotion of Industry & Internal Trade (DPIIT), which also manages 'Invest India' to facilitate foreign investments into the country, has chosen twenty-four sub-sectors (including automobile, chemicals, medical devices, auto-components, defence manufacturing, electronic systems etc.) to boost local manufacturing based on local competency, potential for import substitution, opportunities for export and potential for increased employment opportunities.

### ***Atma Nirbhar Bharat Abhiyan***

In the midst of the COVID-19 epidemic, the Government of India announced the Atma Nirbhar Bharat Abhiyan (or 'Self-reliant India') in May 2020. The campaign's principal goal was to recover from the economic impact of the pandemic and become self-sufficient on five key pillars: economy, technology-driven infrastructure, infrastructure, demand, and demographics. The Indian government unveiled a combined economic package worth INR 20 trillion (approximately 10% of India's GDP) to support a variety of projects aimed at benefiting enterprises, MSMEs, farmers, and the agriculture sector.

Reducing import dependence and promoting the growth of domestic manufacturing industry was one of the key emphases of the government in this scheme. Under Atma Nirbhar Bharat, the government also plans to introduce parameters for better quality of output to meet international standards so that Indian products can compete in the global market.

### ***Production-Linked Incentive (PLI) scheme***

India introduced the PLI scheme in 2020 to promote domestic production through subsidies and encourage exports while cutting down on cheap imports. The scheme is available across fourteen key manufacturing sectors including specialty steel, telecom, auto

components, drone components etc. It is designed to provide incentives which are linked to investment and turnover size. The government sanctioned over INR 1.9 lakh crore to be periodically utilized for the scheme.

### ***Ease of doing business***

India ranks 63rd in the 'Ease of Doing Business' ranking by World Bank. This is a massive improvement over its position just a decade back, when it stood at 142nd rank in 2014. The improvement in ranking is driven by simplification of the business ecosystem through government initiatives such as 'Make in India', 'National Single Window System (NSWS)' etc. The government has been focusing on initiatives to empower India as an export destination and capitalizing on the opportunities arising out of global China plus one strategy. Thus, improving the overall ease of doing business in the country is a major milestone on the path towards manufacturing success.

## **GLOBAL FRAGRANCES & FLAVOURS INDUSTRY**

The global flavours and fragrances market, valued at USD 32.2 billion in 2023, is expected to grow at an annual rate of 3.3%, reaching USD 43.6 billion by 2032, as shared by Imarc. This growth is fueled by the expanding food and beverage industry, rising interest in personal grooming and hygiene, changing consumer preferences, urbanization, and a growing demand for natural and organic ingredients.

The rise in disposable income, particularly in emerging economies such as India and China, coupled with population growth, is expected to augment demand for personal care and cosmetic products. ### Indian Flavours Market: Growth Drivers & Trends

The Indian flavours market is experiencing robust growth, driven primarily by the expanding food processing industry and increased demand for packaged, ready-to-eat foods and beverages. According to a report by IMARC Group, the market size reached INR 4,287 Crore in 2023 and is projected to grow at a CAGR of 7.1% from 2023 to 2032, reaching INR 8,100 Crore by 2032.

The utilization of flavoring ingredients in various products—such as bakery items, confectioneries, ice creams, smoothies, and energy drinks—is significantly contributing to this growth. The rise of urbanization and Western food trends further boosts demand for these flavoring agents.

Additionally, the popularity of processed and shelf-stable food products like noodles, soups, cake mixes, RTD tea and coffee, and juices—especially among millennials—is accelerating market expansion. The Food Safety and Standards Authority of India (FSSAI) has also introduced stringent regulations on flavor quality, which supports market growth by ensuring higher standards for processed food products.

A key trend is the rising consumer preference for natural flavours over synthetic alternatives. The market is seeing a shift towards natural ingredients due to growing health concerns and awareness of flavoring agents. According to a report by Grand View Research, the natural flavours market in India is expected to grow at a CAGR of 8.2% from 2023 to 2030, highlighting the increasing consumer shift towards natural and organic options.

The emergence of quick-service restaurants (QSRs) and the expanding café culture in India are also driving demand for innovative and diverse flavours. Moreover, government initiatives such as the 'aroma mission' of CSIR-CIMAP, the Aroma Park in Uttarakhand, and the Purple Revolution in Jammu & Kashmir aim to cultivate new aromatic ingredients and harness India's rich aromatic heritage. These initiatives are set to revolutionize the industry, create rural employment opportunities, and promote sustainable practices.

### Conclusion

The global and Indian flavours and fragrances markets are experiencing robust growth, driven by innovation, rising consumer awareness, and an increasing focus on natural and sustainable products. The Indian market, in particular, is seeing rapid expansion due to changing consumer preferences, growing disposable incomes, and the influence of social media. This presents significant opportunities for businesses to tap into the growing demand for unique, high-quality flavours and fragrances, and to meet the evolving needs.

#### **PRODUCT CREATION AND MANUFACTURING PROCESS OF FRAGRANCES & FLAVOURS:**

Research & development to create innovative product creation is the essential elements of our business. Creation of new products often begin with a customer's brief which provides customer's technical and commercial requirements for the desired product.

We develop and provide the challenges & matching of the existing products to our customers, based on our consumer insights and market research, which is a unique skill of Sacheerome. During the creation stage, our perfumers and flavourist develop new creations keeping abreast of customer requirements and specifications. These products are then evaluated as per protocol by our Head - Evaluation & expert evaluation panel, and if the results are satisfactory to Perfumers (for Fragrance) & Flavourists (for flavours) then samples of oils or applicated end product are sent to the customer for their evaluation & approval and for standardization by our quality control department.

On approval from the customer, the fragrance or flavour formulation go for manufacturing as per the process standardised by our research and creative teams in collaboration with our specialized production team. Trained and experienced specialist monitor the production process.

Upon receiving order from client, the order is shared with the production which in turn gets the raw materials inventories checked by the store teams and requisite raw materials procurement request share to the sourcing teams. The sourcing teams send out requests for quotations to regular vendors and after negotiation place orders to them. After receipt of raw materials, they undergo Quality checks and are then sent to the inventory. After completion of production, the produced material undergoes quality checks and after approval is packed in requisite packings. Alongside billing, the material transport is arranged and goods are dispatched as per the terms.

Most of the time, the logistics are made as per the requirements of the customer, otherwise, the logistics services of regular agencies are availed for domestic and export orders.

The manufactured materials/Finished goods are then analysed by our Quality check teams and upon satisfactory results, the materials are packaged and dispatched to the customer.

The following diagrams provide an overview of product creation, manufacturing and blending process.

**MANUFACTURING OF LIQUID FRAGRANCE OR FLAVOURS**

**1. Production Order Issued from Manufacturing Software:**

A production order is generated and issued through the manufacturing software system. This order includes details such as batch size, ingredient list, and specific instructions for the production of the liquid fragrance or flavour.

**2. Quality Check approved Ingredients dispensed by automated robotic dispenser:**

Ingredients required for the batch are dispensed using an automated robotic dispenser. The robotic system ensures precise measurement and dispensing of ingredients according to the production order specifications.

**(i) Automatic Dispensing from CDL Machine:**

The ingredients are further dispensed using the Compact Dispense Line (CDL) machine. This machine handles large volumes of ingredients and ensures consistent flow rates for the mixing process.

**(ii) Automatic Dispensing from Cluster Machine:**

The Cluster machine dispenses bulk ingredient quantities that require precise control. It works similar to the CDL machine and maintains ingredient accuracy.

**(iii) Automatic Dispensing from HCSD Machine:**

The High-Capacity Sample Dispenser (HCSD) machine dispenses small quantity ingredients that require special handling and dosing precision.

**(iv) Manual Dispensing from MDS Station:**

Certain ingredients that cannot be dispensed automatically due to their properties are manually dispensed at the Manual Dispensing Station (MDS). Operators ensure these ingredients are measured and added accurately.

**3. Mixing in Designated Blending Vessel:**

All ingredients from the various dispensing stations are collected in a designated blending vessel. The ingredients are mixed together according to the specific mixing protocol for the product. The mixing process is automated to ensure consistency and homogeneity of the batch.

**4. Quality Control (QC) Sample Collection:**

After the mixing process is complete, a batch sample is collected by the Quality Control (QC) team. The sample is tested to ensure it meets all the required specifications and quality standards. Approval from QC is required before the batch can proceed to the next stage of production or packaging.

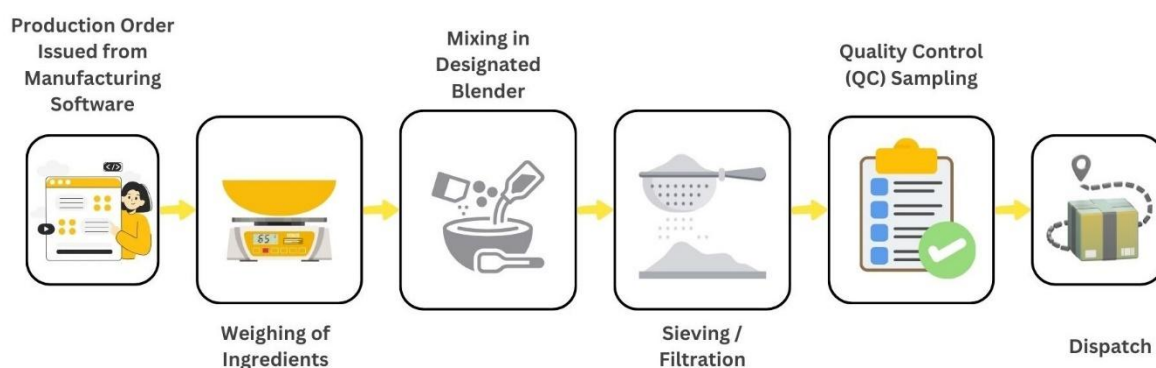

## 5. Dispatch

After Quality check approval, the material is packed in requisite packaging. The material description, including batch number, lot number, date of manufacturing, expiry and quantity, is recorded on the packaging. An invoice, Eway/ Shipping Bill, and challan are prepared, and an entry is made for stock out in the records. Weighment will be done, and an entry will be made in the gate outward records while the material is loaded into the vehicle.

## PRODUCT CREATION AND MANUFACTURING PROCESS OF DRY FLAVOURS:

The Creation of new products drives our flavour business and product development is a key element of our business. Our Manufacturing process for liquid, dry mixed flavours and spray dried flavours are as under:

### MANUFACTURING OF DRY MIXED PLATED POWDER FLAVOURS & SEASONINGS

#### 1. Production Order Issued from Manufacturing Software:

A production order is generated and issued through the manufacturing software system. This order includes details such as batch size, and specific instructions for the production of the liquid, dry, mixed, plated powder flavours or seasonings.

#### 2. Weighing of Ingredients:

All raw materials, including liquid Flavours, powder raw materials, and base materials, are accurately weighed according to the formula specified in the production order.

#### 3. Mixing in Designated Blender:

The Weighed ingredients are transferred to the designated blender. The blending parameters are set according to the standard operating procedure for the specific product.

#### 4. Sieving/Filtration:

The mixed powder undergoes sieving or filtration to achieve the desired particle size and remove any lumps or foreign particles.

#### 5. Quality Control (QC) Sampling:

After process is complete, samples are collected from the sieved/filtered powder for quality control testing.

#### 6. Dispatch

After QC approval, the material is packed in requisite packaging. The material description, including batch number, lot number, date of manufacturing, expiry and quantity, is recorded on the packaging. An invoice, Eway/ Shipping Bill, and challan are prepared, and an entry is made for stock out in the records.

## MANUFACTURING OF SPRAY DRIED FLAVOURS

### **1. Production Order Issued from Manufacturing Software:**

A production order is issued from the manufacturing software, detailing the quantity, recipe, and specific requirements for the spray-dried flavour. This order triggers the process and initiates material requisition.

### **2. Weighing of Ingredients:**

All raw materials, including liquid flavours, powder raw materials, and base materials, are accurately weighed according to the formula specified in the production order.

### **3. Mixing in Designated Blender:**

The Weighed ingredients are transferred to the designated blender. The blending parameters are set according to the standard operating procedure for the specific product.

### **4. Homogenization:**

The mixed ingredients are then passed through a homogenizer. This step ensures that the mixture achieves a consistent particle size distribution, improving the efficiency of the drying process and the quality of the final product.

### **5. Filtration:**

After homogenization, the mixture is filtered to remove any large particles or impurities. This step ensures that only fine particles enter the next stage, preventing blockages and ensuring a smooth drying process.

### **6. Slurry Formation:**

The filtered mixture is transferred to a mixing tank where it is thoroughly stirred to form a uniform slurry. The slurry must have the correct viscosity and consistency for optimal spray drying.

### **7. Spray Drying:**

The slurry is pumped into the spray dryer, where it is atomized into fine droplets by a high-pressure nozzle or a rotary atomizer. The droplets are exposed to a stream of hot air inside the spray dryer, causing the water content to evaporate rapidly. The dry particles form and fall to the bottom of the drying chamber, where they are collected.

### **8. Collection of Spray-Dried Flavour:**

The spray-dried flavour particles are collected from the dryer. The collected product is in a powdered form, with a consistent particle size and moisture content as per the product specifications.

### **9. Addition of Fillers and Blending:**

Fillers or carriers (such as maltodextrin) are added to the dried flavour to achieve the desired bulk and flow properties. The spray-dried flavour and fillers are blended in a secondary blender to ensure a homogeneous final product.

#### 10. Quality Control (QC) Sampling:

After process is complete, samples are collected from the sieved/filtered powder for quality control testing.

#### 11. Dispatch:

After Quality check approval, the material is packed in requisite packaging. The material description, including batch number, lot number, date of manufacturing, expiry and quantity, is recorded on the packaging. An invoice, Eway/ Shipping Bill, and challan are prepared, and an entry is made for stock out in the records.

At the time of market slowdown, the demand falls which has adverse impact on our business.

### Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have

greater resources than those available to us. While service quality, technical ability, performance records, etc. are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing market players would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we may face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

### **Significant Developments after September 30<sup>th</sup>, 2024 that may affect our Future Results of Operations**

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

This decline was primarily due to a reduction in interest income from ₹1,445 thousand in FY 2024 to ₹725 thousand in FY 2025; a decrease in gain on the sale of assets from ₹318 thousand to ₹71 thousand; and the absence of sundry balances written back in FY 2025, which amounted to ₹6,755 thousand in FY 2024. However, this decline was partially offset by an increase in foreign exchange gain from ₹345 thousand in FY 2024 to ₹985 thousand in FY 2025, and a rise in miscellaneous income from ₹335 thousand in FY 2024 to ₹349 thousand in FY 2025

In Fiscal 2024, Changes in inventories of finished goods and stock-in-progress was ₹ 12,276 Thousands against (₹ 2,717) Thousands expenses in fiscal 2023. This was due to a decrease in closing inventory levels as a result of increased sales volumes.

### Employee Benefit Expenses

### Finance Costs

The finance costs for the Fiscal 2024 was ₹ 2,043 Thousands while it was ₹ 4,972 Thousands for Fiscal 2023. The decrease of 58.91%. This decrease was primarily due to reduction in interest expenses as a result of lower cash credit limit utilization.

### Profit/ (Loss) after Tax

The company achieved 78.06% PAT growth in FY24, significantly outpacing its 20.72% revenue growth over FY23. The additional 56.38% PAT growth is majorly attributed to:

- Increase in Other Income (+10.43% PAT impact): Other income surged 198.62%, reaching Rs.13,025 thousand in FY24 from Rs.34,362 thousand in FY23. This was driven by:
  - Arise in interest income from Rs.35 thousand to Rs.1,445 thousand due to increased fixed deposits.
  - Rs.318 thousand gain on the sale of assets.
  - A significant increase in sundry balances written back, from Rs.57 thousand to Rs.6,755 thousand.
- Lower Employee Cost (+18.08% PAT impact): Employee benefit expense stood at Rs.103,449 thousand in FY 24, with only Rs.97,888 thousand charged to P&L due to Rs.5,561 thousand capitalized for the YEIDA project. In contrast, the full Rs.93,089 thousand was expensed in FY23. Due to lower employee cost growth relative to turnover growth and capitalization, this contributed positively to PAT.
- Reduction in Finance Costs (+4.09% PAT impact): Finance costs declined 46.27%, from Rs.4,899 thousand in FY23 to Rs.2,632 thousand in FY24, primarily due to lower interest expenses from reduced cash credit utilization. The slower growth in finance costs relative to revenue growth further supported PAT expansion.
- Lower Travel & Business Promotion Expenses (+22.90% PAT impact): These expenses dropped 42.15%, mainly due to reduced foreign travel (as the World Perfume Congress held in FY23 did not occur in FY24) and the absence of WPC exhibition costs. The slower growth in these expenses, compared to turnover growth, further enhanced profitability.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI pursuant to its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI pursuant to its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. ## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the FDI Policy of the Government of India and FEMA and the circulars and notifications issued thereunder. While the FDI Policy prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases.

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“DPIIT”), formerly known as Department of Industrial Policy and Promotion issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Up to 100% foreign investment under the automatic route is currently permitted in the “Services” sector. For details, see “*Key Regulations and Policies*” on page 121.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.
